Why do we Have Eggs at Easter Easter is observed among all Christian people as the anniversary of the great event of the resurrection of Christ. He was dead, but returned to life. The egg is taken as emblematic of areturn to life. It is to all appearance dead, but we know that if placed under proper condi-tions, life will come forth from it. The use of eggs at Easter was adopted from an usage older than our era. It was the custom in very early times to celebrate the return of spring by making presents of eggs. "Why does not Easter always fall

upon a fixed day. Christmas is always on December 25th, why should not Easter be fixed with equal certainty? Easter must always be on Sunday. It is not a particular date that is observed, but a particular Sunday. How to decide upon the Sunday, gave the very early churches much trouble, and there were differences on that account, but the matter was settled at a council held at Nice, in the year 325. The rule was adopted that: Easter day is always the first Sunday after the full moon, which happens upon or next after March 21st, and if the full moon happens on a Sunday, CUTTER & TAILOR, Easter day is the next Sunday after. This gives Easter day a wide range of dates, as it may occur on any Sunday from Maren 22nd to April
