Roether Proves an Alibi in the Celebrated Bedford Case.

The jury in the case of the Commonwealth against Roether, for burning Jackson Stickley's barn, at Bedford, rendered their verdict at 12 o'clock Saturday night of "not guilty." The case was argued on the part of the Commonwealth by Mr. Reed and Hon. J. M. Reynolds, and for the defense by Hon. J. H. Longenecker and J. H. Jordan. Judge Barr completed his charge at 11 o'clock, when the jury retired to their room. At 12 o'clock the court bell rang, which was the signal that the jury had agreed upon their verdict. Even at that late hour the court room was crowded with citizens eager to learn the verdict. After the verdict was read John Roether was warmly congratulated. He is still in jail on the charge of poisoning Reitinger's horses, which case cannot be tried until April session. He will probably be discharged on bail meantime. It is said that the defendant will bring suit against Stuckey for malicious prosecution. The evidence of Walter and two or three members of his family that Roether was at his house the night of the fire from 6 till 9 o'clock, was the strongest evidence for the defense, as the proof was that the barn was burned about 8 o'clock in the evening.

Our Harrisburg Letter.

From our Special Correspondent.

Harrisburg, Feb. 11, 1887.

The House made its customary adjournment from Friday noon until Monday evening at 8 o'clock, and nearly all the members go home. This is done by the city members and those living close the line of railroads. It is all wrong, as much good legislation could be done in the interval wasted in pure idleness. An effort was made to prevent an adjournment, but it failed. The only way to cure this growing evil is for the people to make it a question at the polls and elect only such men as will stay here and do the work speedily and well. Why the average legislature should go home every Friday and not return until Monday evening is a question which might puzzle the most philosophic mind; surely, if their business is so urgent, they had better stay at home and let some one come who has the time to spare, and who could remain here during the session. These adjournments, however, are not wholly fruitless to the industrious member. It gives him an opportunity to read and study the bills, answer letters, and prepare speeches for such bills as he wants to support or oppose.

The Speaker on Monday evening reversed his ruling that it required a two-thirds vote to take up and consider the Constitutional Amendment Resolution out of the regular order and accordingly, at 10:30, he ordered the same to be read, for the first Tuesday evening was set for the second reading, which was largely attended, especially by the ladies of the W. C. T. U. An effort was made by Representative Mackin, Democrat, to amend the resolution by adding a compensation clause. This was voted down, after some discussion, in rather a novel way. A second resolution was offered by the same gentleman, when the previous question was moved, and this ruffled the sturdy Democrat's temper, and he withdrew the same, with a remark of depriving the people of their rights. This brought Representative Robinson to his feet, who insisted that instead of depriving the people of their rights, the resolution contemplated giving them precisely what they wanted.

Burns, of Erie, was the next speaker. He opposed the resolution on constitutional grounds, and made decidedly the best speech of the evening. He was replied to by Representative Elkin, of Indiana, and the debate closed. The yeas and nays being called, the vote stood 125 for, and 21 against. On Wednesday at noon the resolution was called up for third reading. The House was impatient and did not want any more discussion; however, Deane managed to get in a speech, and several members asked to have their remarks printed, when the vote on final passage stood 130 for to 60 against, the Democrats voting against the resolution with a few exceptions, and the Republicans, with a few exceptions, for it. A few did not vote at all, and a number claimed the privilege, under the rules, to insert the reasons for their votes on the journal. There was considerable speculation upon the final result, as to the advantages and disadvantages the Republican party will derive from this action, not a few claiming that two years hence the State and Legislature will be Democratic. This is hardly the time to venture a prediction. The party stood bound to the resolution when it was placed in the platform, and could do nothing else. In fact, the opinion of the very best Republicans was that it was the duty of the Republican party to pass it, plain and simple, and without any, or at least little, discussion. There was no room for a difference of opinion. The party has now redeemed its pledge, and it behooves the milk and water Republicans of the State who did so much to shatter it for the past few years, to do all in their power to heal the wounds, as they must be convinced by this time that the only safety the temperance people have is within the ranks of the Republican party, and the worst enemy to the cause is the Democratic party. They ought to be convinced of the fact by this time.

Nothing was done in the Senate of any importance. The House passed a few bills on first and second reading, and adjourned on Thursday afternoon until next Wednesday evening, to give the members an opportunity to go home and attend the Spring elections. This motion to adjourn was strongly opposed by the country members, but was carried. All the members have gone home, and the House is quite deserted.

The encampment for the Department of Pennsylvania G. A. R. was in session in this city for three days this week. Over one thousand delegates were in attendance, and a number of prominent Grand Army men from other States. The session was harmonious, and much good work was done. Representatives Pugh and Miller were alternate delegates from Somerset Post, and attended the sessions.

More anon,

Philip.

The Lancaster *New Era* wants somebody to sit down on the bill to appropriate $50,000 to the State Agricultural Society. It says: "The very name of this society is deceptive. It has nothing whatever to do with practical agriculture. It is not worth one farthing to the agricultural interests of the State. The county agricultural societies which have sprung up in every county in the State are doing the work the State society was organized to do. They are doing it far better than the latter ever did. They do it without costing the Commonwealth a single dollar."

Mt. Pleasant Institute.

This prosperous institution will hold its Sixth Annual Book Reception February 22d. Many of our readers are interested in this Institute, and will be glad to learn that the results of these receptions greatly exceed the expectations of those who instituted this plan of establishing a library at Mt. Pleasant. No one can regret helping on such a cause by donating a book or two. Send to ReRoy Stephens, President.

Blank Forms of Application for Mexican Pensions.

The Commissioner of Pensions has had prepared a letter of instruction and blank forms of application and affidavits of witnesses for the use of applicants for pensions under the Mexican Pension law of January 29, 1887. These blanks, he thinks, will facilitate the business of his office and enable applicants to have their rights promptly adjudicated without unnecessary correspondence, trouble or expense. The Commissioner expects to have the blanks printed and ready for use on Wednesday, February 16th. He invites direct application to his office of expectant pensioners. Upon receipt of an individual application an appropriate letter of instructions and a set of blanks will be forwarded to the applicant. The letters of instruction are full and explicit, and the blank forms plain, and all may be easily understood without the necessity of legal advice.

Teachers' Institute.

The following article on the recent Somerset County Teachers' Institute is taken from the current number of "The Ohio Educational Monthly and National Teacher:"

"We spent holiday week with the teachers of Somerset County, Pa., in their annual institute. Somerset is one of the southern counties of the state, bordering on Maryland. The institute was held at Somerset, the county seat, a borough of 1,900 people, beautifully situated near the summit of the Alleghanies. The sessions were held in what was originally a skating rink, now handsomely fitted up as an Opera House. It was well filled at every session, and crowded to its utmost capacity afternoons and evenings. School directors, clergymen, lawyers, and citizens generally, seemed scarcely less interested than the teachers. We made the acquaintance of one clergyman who came with his wife and daughter from a remote part of the county and attended all the sessions. We also met two ladies, not teachers, who drove twelve miles to attend one of the evening sessions. The Institute in Pennsylvania seems to be an occasion of great interest to the whole community, and there is evidently, on the part of the people, greater sympathy and more hearty co-operation with the teachers than in Ohio. The teachers of Ohio have themselves to blame. They have, in a measure, isolated themselves, and have not sufficiently sought the sympathy and co-operation of the people. We do not wish to be censorious; but we love Ohio—her people and her institutions, and we do not like to see her outstripped, especially in matters of education.

"The chief instructors in the Somerset institute were Dr. Theo. B. Noss, Principal of the State Normal School at California, Washington county, and the writer. There was at each of the day sessions a report from one of the leading teachers of the county, on a topic previously assigned. The exercises were enlivened at frequent intervals with soul-stirring music, conducted by that prince of music masters, E. O. Excell, of Chicago. Miss Bell Tomer, a Pittsburgh vocalist, and Mr. Excell both sang at the evening sessions.

"A prominent feature was the course of evening lectures. County Superintendents, who have the sole management of the Institutes in Pennsylvania, vie with each other in securing the most popular and attractive lecturers for the evening sessions. Monday evening's lecture was delivered by Dr. E. E. Everest, of Harrisburg, on 'The Winning Side of Life.' Rev. A. A. Willits had been engaged for Tuesday evening, but was unable to meet the engagement. Mrs. Monroe, of Washington City, was substituted, and gave vivid and entertaining sketches of life at Washington and the leading actors there. Joseph Cook's 'Ultimate Atheism' was announced to be an immense audience on Wednesday evening; and on Thursday evening, Ex-Congressman Hoar, of Michigan, discussed 'The Labor Question.' It was the most witty and entertaining as well as the soundest, treatment of the subject we have ever heard.

"County Superintendent J. C. Weller's management of the institute was admirable. Every detail was wisely and skillfully carried out. His second term of three years will soon expire, when he proposes to retire to give 'some other man a chance.' A rare combination of suavity and efficiency has made Mr. Weller very popular with the teachers. We heard among them many strong expressions of commendation. A beautiful gold watch and chain, presented near the close of the institute, was a fitting expression of the estimation in which he is held.

"One afternoon was given up to the school directors (about fifty were present), who entered very heartily into the discussion of such topics as the length of school terms, supply of apparatus, directors' duties, etc.

"We have been impressed with the liberty accorded to an institute instructor in Pennsylvania. In neither of the two institutes we have recently attended in that State was there the least disposition even to make suggestions to the instructors. Each was left at full liberty to choose his own subjects and present them in his own way. The practice in many of the Ohio institutes is very different, managing committees often undertaking to direct instructors both as to matter and method. Such interference borders on impertinence.

"We have the impression that women are less influential in school matters in Pennsylvania than in Ohio. Not one lady member of either of the two institutes permitted her voice to be heard, except in song, and not one lady filled an office or even a place on a committee. Women do not seem to have monopolized the business of teaching to so great an extent as they have in Ohio. The schoolmaster is still abroad in Pennsylvania. There was a larger attendance of men than of women at the Somerset Institute.

"It is, perhaps, but justice to say that we do not believe Pennsylvania is in advance of Ohio in everything pertaining to her schools. She has made better provision for her country schools. In the management of her institutes in her State normal schools, county supervision and township organization, her superiority, we think, must be conceded; but we do not believe the borough schools of Pennsylvania are equal to those of Ohio. In the absence of county supervision Ohio has developed and utilized city and town supervision more fully than Pennsylvania has. It may be a question whether the boroughs of Pennsylvania have not depended on the county superintendents for the supervision of their schools, to their own serious loss. We were surprised to find that many of the smaller boroughs have but five months of school in the year. The town of Somerset, a county seat, has school but five months, and pays her male principal but $300, or $60 a month. A first-class article cannot be obtained at such a price. It should be said in this connection that there is now a movement all over the state to secure an increased length of school term; and if we mistake not there should be a movement in the direction of more efficient supervision of the borough schools. Nothing in connection with public education is more fully settled than that no system of schools can produce satisfactory results without skilled and efficient supervision."

DIED.

WALTER.—At her home in Somerset Township, Mrs. Elizabeth Walter, wife of Jacob Walter, aged 72 years, 8 months and 27 days.

Over ten years ago Mother Walter was stricken down with paralysis, and during all these years she has been a helpless invalid. Her right side was entirely powerless, and her speech was also affected, so that toward the close of her life it was with difficulty that she could even make her desires known. Loving hands waited on her most attentively, and ministered to her wants as well as they were able. Death finally came to her relief, and though even those nearest to her by earthly ties, having the sweet assurance that she now enjoys the rest of those who die in Christ, feel that it is far better for her to be absent from the body and present with the Lord, yet the vacant chair and silent voice still bring to the heart a sense of loneliness and a burden of grief, which time only can remove. A large company of friends and neighbors assembled to honor the memory of the departed, and show their sympathy with the bereaved.
