REPORTS OF GOVERNMENT CHEMISTS

As to Purity and Wholesomeness of the Royal Baking Powden

"I have tested a package of Royal Buking Powder, which I purchased in the open market, and find it composed of pure and wholesome ingredients. It is a cream of tartar powder of a high degree of merit, and does not contain either alim or phosphates, or other injurious substances.

E. G. Love, Ph.D.

The Royal Baking Powder received the highest award over all competitors at the Vienna World's Exposition, 1873; at the Centennial, Philadelphia, 1876; at the American Institute, New York, and at State Fairs throughout the country.

No other article of human food has ever received such high, emphatic, and universal endorsement from eminent chemists, physicians, scientists, and Boards of the country of the cou

Note.—The above Diagram illustrates the comparative worth of various Baking Powders, as shown by Chemical Analysis and experiments made by Prof. Schooler, A pound can of each powder was taken, the total leavening power or volume in each can calculated, the result being as indicated. This practical test for worth by Prof. Schedler only proves what every observant consumer of the Royal Baking Powder knows by practical experience, that, while it costs a few cents per pound more than ordinary kinds, it is far more economical, and, besides, affords the advantage of better work. A single trial of the Royal Baking Powder will convince any

While the diagram shows some of the alum powders to be of a higher degree of strength than other powders ranked below them, it is not to be taken as indicating that they have any value. All alum powders, no matter how high their strength, are to be avoided as dangerous.
