Uniformity in butter is a paying vir-

Do not saw the horns off of old cuttle unless they are dangerous.

The wise man uses mixed foods. He feeds all parts of the animal system. If you have taken the dehorning mul-

ady, do the deed before the calf is a moth old. It is not cruel or even painful The cows should be put up in the stable at night when first turned out to grass, and even given some dry food to check

the laxity of the bowels. They will relish even straw and a little will do them If sheep are ticky, shear them early, Come to think, they should be sheared early anyway. It is cruel to leave the wool on after the weather gets hot. It

makes the sheep poor. Shear early and keep the sheep out of storm and cold. The lesson may be learned even yet. Why is it that farmers will not heed? The most of them have kept their cattle in the yards during the day all winter and froze out the profits when they might If we allow this to go on, where will have been in the stables and saved half

of the fodder. When the cows go out to the pasture poor and hide-bound, resolve solemnly that next winter they shall be housed all the time and the stable shall be warm. Just see how long it will take them to pretty late, wifey, dear, so don't sit up for gain flesh enough to make any profit over their feed. Will it be half of the

The farmer who lives on a lacking in fertility should make close calculations. how many calves can be raised and how many good ewes can be kept. He will not be up to his privileges if he does not have a big field of fodder corn to help out the cows in dry weather and the hav-

mow in winter. A night pasture is the thing for the cows. Have one handy and keep it for years. The cows will make it rich, and seed scattered over it early in the spring will renew the swar l. The seed might be good for the grass. A good scratching of the surface would spread the manure and start things afresh. New idea, but a good one.

Cows are often mude sick by overfeeding and night are times chough to feed cow or other cattle coarse folder. It is morning and night, and meal only at noon. The best way is to moisten the hay or straw and sprinkle meal over it. save you the trouble of coming home and Then it all pusses into the rumen together and is masticated. The way to feed to get rue best results with horses or cattle is to cut the fodder and wet it and mix the meal with it. Where labor
