This is the way a horse and a poor blanket look at the end of winter. Why is it that of two horse blankets which look and feel equally well one won't wear at all, and the other wears well?

Horse Blankets which are strong and have a reputation are always imitated in poor qualities which look like them, but having fewer warp threads are not as strong. Some dealers buy these poor the suspension of the State Treasurer by the imitations for a few cents less and by saying they are "just as good," sell them at the same price as the strong blankets to parties who do

not know the difference. You cannot tell whether horse blankets are strong by the look or feel, as the warp threads do found that the shortage would fall under not show on the face. How then are you to know?

In order that you cantell a strong blanket from a weak one, the manufacturer of 5 Horse Blankets sews the above 5'A Trade Mark inside of each blanket. This is a guarantee that it is the strongest blanket made for the money and will wear well.

. Many poor imitations have been sold as 54 blankets. Remember none are genuine unless the 5/4 Trade Mark is sewed inside.

THE system all the form LABEL. DIRECTIONS.—Take Part of a Wine
