"Glad to see you looking so well. The last time I saw you you were pale and I was worried by your depression. What have you been doing?"

"I bought a pair of glasses. That was all."

"The manager of a large business establishment on Union square had not a friend whom he had not seen before in months, and the former's renewed health was the subject of the conversation."

"You remember how I felt last spring. I was hardly able to work. I had shooting pains through my head, and I felt drowsy after I had been an hour in the office. I thought I was ill, and I took enough pills to start a drug store. They only made me feel worse. I went to a doctor. He said I must take a vacation. I did so. The first day I was in the country I lapsed into the open air, and the next morning I felt better than I had done in months. That day I rolled into a hammock and read a novel. The next morning I was as badly lamed as before. I rested one day and felt better the next. Finally I began to recover the use of my eyes, and my doctor, who had been to the nearest village, brought a pair of spectacles, and that very day I began to improve. When I arrived home I went to an oculist and had glasses of the right power prescribed. I use those in reading and working, and since then I have been a different man. I am no longer nervous, and I don't dread death, and I feel of getting married next year and intend to dance at my grandchild's silver wedding. Simple cure, wasn't it?"

A Chinese Solomon.
