Glovas of Human Skin. "Gloves which are sold as kill are often made a human skin," said Dr. Mark L. Fardyl, the Greek physiciro, vesterday. "The skin on the breast," continned the physician, is soft and pliable, and may be used in the making of gloves. When people buy gloves they never stop they are made. The shopkeeper himself may be in ignorance, and the purchaser has no means of ascertaining whether the material is human skin or not The fact is, the tanning of human skin is extensively carried on in France and Switzland. The product is manufactured into gloves and these are imported into this country. Thus, you see, a person may be wearing part of a distant relative's body and not know it.
