Let's oftener talk of noble deeds. And mrev of the baddays. And sing about our happy ones. We are not made to fret and sigh, And when grief sleeds to wake

That takes the pains to win it. in ! there's a slumbering good in all And we perchance may wake it : Our hands contain the magic wand-This life is what we make it. Shed light and joy about them,

This life is what we make it. Progress in Farming and Improvemen in Farming Implements.

The following paper was read by Henry Rauch, Esq., of Jenner township, before

Agriculture may be defined as the art of disposing the soil in such a manner as to make it produce in the greatest abundance and perfection those cereals and vegetables which are useful to man and the animais depending on him for subsistance. The earth, in a state of nature, possesses a certain degree of fertility, so as to produce plants more or less suitable for the su'sistence of man and beast, but its spontaneous productions are small in consparison with those which can be raised from it by man's industry and intelli-

Savage nations, as well as some of those living in tropical climates, usually rest content with the natural production and they are accordingly found to be few in proportion to the surface which they possess, and oftentimes live in the lowest state of misers. But wherever man has possessed intelligence, he has applied himself to cultivate the soil so as to make it capable of supporting in comparative half a century or more ago were rough sire to get a glimpse of New York socie-

first settlers or pioneers of Somerset coun-The earliest efforts in farming by the ty, have been few, and limited in their object. The land was cleared and plowed, the cereal grains-wheat, rye, oats, buckwheat, etc., were sown, and such a crop as nature gave was contentedly repeated; no more was done than merely to take advantage of the natural fertility f the soil, and in this manner farming was carried on to within about the last thirty or forty years, and in some locali-

in the last ten years.

The leading varieties of grain raised in Somerset county are wheat, rye, oats, an almost endless extent. No one can last her eyes opened, and in a strange, extensively raised now than formerly, and instead of shipping wheat out of the labor-saving machinery. It may have Oh, the anguish and remorse that I

planted on nearly every farm, but neglected to some extent in the way of improving the quality of the fruit. Grafting and budding was not as well understood as at present. Orchards of improved fruits ought to be a matter of considerable attention in this county, as apples, peaches, cherries, etc., thrive in the greatest beauty and luxuriance. The orchard itself is an ornament on the farm twice a year-once when it is in full bloom : next, when the trees are laden with fruit; besides, it vields a luxury to the farmer and his it? family that could not be supplied by anything else.

Let us now take a glance at the inside

of the farmer's house and see what the

loing. Household manufactures of woolen and linen were made to a great extent; many families spun, wove, and made up their own clothing; sheeting, table-linen, quilts, coverlets, stockings will never never leave me. and mittens were made in the family. These, perhaps, were neither so fine nor bard man. Pamela and I were his only made so expeditiously as those of a regular tradesman, but they were produced for domestic use, at a time when there was no other employment, and in this manner may be said to cost very little except the material from which they were made. Nearly all the clothing worn | she had grown to be a young lady: by the farmer was home-made; the same may be said of soap and candles, which were all made in the family. Cooking stoves were then a novelty; the cooking was all done in the fireplace; the cooking utensils were few and simple. The first cooking stoves brought into the country were made to burn wood, and were a kind of heating and cooking stoves com-

were better supplied than the farmer of fire-wood. Plows were exceedingly clamsy in construction, and dragged with much difficulty; harrows were about the same. New beginners would sometimes drug a heavy bruch over their fields to cover became exhausted in one field, the farm their grain instead of a harrow. Very the important discovery that they used breaking up new land, of which they had that, and raked by hand; the raking was ed "how do you ever manage to pass the stythe, and sometimes very poor ones at an abundance within reach, than manur-mostly done by women and boys; horse haunted orchard after nightfall?" ing and fertilizing old and worn out rakes and hay elevators and carriers were
