The Disciplined Brains of Great Soldiers. Beautiful and Agreeable, She Is Surrounded The Hop Pillow of Our Verefathers-A Plan That Would Cause Architects Trouble-Wet the Head.

If any ususually acute inventor could tell us of an infallible contrivance for going to sleep just when we wish to do be secured for mankind. Some fortunate mand sleep the moment they lay their heads on the pillows, others find themselves all through life sleeping the sleep of the just every night, without difficulty being experienced as to occasional wakefulness, except when illness happens to

The Duke of Wellington, who always slept on a camp bedstead, had a maxim that when a man turned in bed it was time to turn out; and here it may be remarked that great soldiers appear to be poculiarly constituted in their power to sammon sleep at will. Possibly this may be due to the limbits of discipline which they have learned. They say to their brains, "Go to sleep," and at once the word of command is obeyed.

WITH HEADS TO THE NORTH. We are all familiar with the stereotyped advice in cases of this kind to "turn the pillow," to "think of something else," or to imagine and count a wakeful brain worker attempted to carry these and similar prescriptions into practice, usually with results disproportionate to the efforts involved.

It may be said without much exaggeration that the man who can first finagine authorship, editorship and preparation a flock of sheep, then a half open gate, for festivity, and to elegant revelry in and then can force his hypothetical sheep | the evening. The lady of the house when to go through one by one without crowding or dodging or turning tail, is fit for treason, stratagens or writing the sublimest poetry. He is no ordinary man, in it and in her wondrous jewelry as and it is for ordinary individuals that the saving prescription is required.

Among prescriptions of a more or less sensible Lind which have been at various timed propounded and actually put into use for inducing sleep may be mentioned the kep pillow, in which our forefathers being supposed to be exceedingly sopo-

The Lop pillow was used by George III from its ennia. Then S. A. Ellis long ago announced us a grand discovery to the Scottish Curative Mesmeric association that sleep was all a matter of which way one's hend points.

In a cermin direction the electricity of the curch, which is supposed to flow between the pules, purses along the body, and so tends to the enjoyment of repose. Persons withing to avoid sleeplest nights must therefore, Mr. Ellisadvists), always at the Hotel d'Aquila, which she after lifty miles above where he was then enpointing in their latter direction, and was then for three or four years the two, an old bull and a cow. At my reing to dumber if their had lies east and

The idea boasts come supporters nowasal prevalence would lead to extraordimore results. For example, architects would have greater difficulties in building suitable private residences than they emperator even now, if they were obliged to just their doors and fireplaces so that every apartment would allow of a bed being situated in exactly the same position all over the house.

Let us imagine also a country house, where the gentlemen all retired to bed about 12 o'clock, the ladies having departed to rest long before. What a rule awakening would ensue for the latter when they were suddenly roused by hearing borrible rumblings as of thander in the rooms on every side, and above them! They would think it was an earthquake without doubt; whereas, as a mere mutter of fact, it would be only that each guest was simultaneously attempting to shift his four poster into consonance with the teachings of electrical science.

A PROPOUND SECRET.

There was, moreover, a London gentleman who years ago really believed he had found an absolutely certain prescription for banishing wakefulness, and he was willing to impart his knowledge to others for a handsome fee on the express condition that the information should "go no further."

When the sleep practitioner died one of his patients informed an expectant world that the grand secret was simply this: A person lying in bed and attempting to sleep usually breathes through his nostrils, and the breath so emitted is, in cold weather, quite visible.

All that has to be done is for the subject to think of his own breathing, to imagine that he sees every breath that issues from his noctrils, and in a moment or two he will fall into a refreshing slumber. There may be some virtue in this prescription, though common sense would be inclined to suppose that the mere bother of imagining anything whatever would be so tiresomens to excite the brain and braish sleep much farther off than ever.

complete officacy of the breathing plan. Alfred Smee, the author of "Elements of Electro-Biology," also attempted to solve the puzzle why sleep, when much needed, is often altogether denied. He referred the whole matter to the region of "the bio-dynamic circuit," but the practical prescription was to wet the top of the sufferer rest when every other means baye failed.

All these spirited endeavors are worthy prescription for avoiding elecpless nights or parts of nights is not to take heavy suppers, to go in for exercise and not to sit up late, exciting the brain.-London Standard.

A MODERN CLEOPATRA.

LINE BONAPARTE'S NIECE.

by the Wise, the Witty and the Powerfal-A Great Sorrow That Came Through Her Love for Her Little Daughter.

Never say that one is fortunate till you witness the close of his or her life. You must have seen in your diplomatic wanso there can be no doubt whatever of the derings in Paris, Turin, Florence, Rome substantial benefit which would thereby and Madrid that worthy niece (in regard to beauty and so on) of Pauline Bonaindividuals, like Napoleon I, can com- parte, Marie Lectitia Bonaparte-Wyse, successively, by her marriages, Comtesse de Solms, Signora Rattazzi and Dona de

Was there ever a human being whose life seemed so rosy as hers, or whom nature had made more proof to the vexations and troubles which lie heavy on most daughters of Eve? In many respects this fair offshoot of the Bonapartes afforded a parallel to Cleopatra, who. Mrs. Jameson says, was bewitching to the last because she exercised the sorcery of good nature, Like Cleopatra, Marie Bonaparte-Wyse was sparkling, genial, magnificent, of a happy-go-lucky temper and Bohemian, if one looks upon Bohemianism as emancipation from cant and mind crippling prejudices, some of which, I own, may have their social

HER GUESTS AT THE "FOLLY,"

She had always in her train the most emment men of the different capitals, in which she turned up periodically to shine number of mountain sheep going through out for a short time in splendid belonga gate. Many a time and oft has the too ings and surroundings. She also shone as a muse, whose fingers were never soiled with ink, and who stole from Venus ker girdle and cortege of graces. Her house, or palace, or chalet, near Aix, was in the daytime given up to she saw company (and nobody ever knew when she was not swring it) was in raiment of damning beauty. But she looked pleased as a child in a pretty Sunday freek, and courted admiration in a way that enhanced her sowers.

I never saw Lady Blessington, she havof similarity between her Gore house had considerable faith, the narcotic es parties and those of the particular great big lot of fossil ivery which his tribe sential oil which produces the hop scent | niece of the great Napoleon of whom I | had eached near the village.
