I P. THOMAS SON & CO.

For the same reason you don't tie up nour horse to an empty manger for months at a time, you don't want to put in your wheat this fall without an ample quantity of 1600 -enough to grow a full crop of wheat-and succeeding grass. To supply this plant food in the proper shape is our business. We say proper shape because most anybody

can mix a little South Carolina rock and Kainit together

and call it fertilizer.

But 23 years experience, with our complete facilities, has enabled us to make fertilizers that will produce the desired results; there's no question about it. You'll say so, too, if you've used our goods and if you haven't, you can get them, and all desired information from our agents. The Thomas Phosphates are standard, and thoroughly guaranteed.
