BY W. B. WALKER.

The subject of manure is one of great importance to everyone that is interested in agriculture and is one of the muchneeded restoratives of exhausted soil. Barnyard manure has been used as such Commercial fertilizers are of more recent the difference in age, the daughter was date and is a formula of mineral fertilizing ingredients whose component parts are formulated by the aid of the science

That these fertilizers have proven an important factor in the growing and maturing of crops has been demonstrated, not by theory, but by actual practical

9 to 15 lbs. nitrogen. 9 " 15 " potash. 4 " 9 " phos. acid. Constituents having a quotable value

These mineral substances are the three principal ingredients of "quotable" value ounces of silver to the ton. in all manures, whether home-made or complete commercial. In yard manure there is a great deal of non quotable material in the form of carbonaceous matter which is very valuable in the formation of good soil. The great bulk of quicken- all deaths are from Consumption. When ing and decaying matter which it con- we think over this fact it is really awful tains and the effect it has on the soil is though each case istarted with a simple of great importance and should not be cough or cold. Realize how important it overlooked nor underestimated, being it is to check this terrible malady, which is not quoted in the analysis; because can be done by using Pan-Tina Cough barnyard manure can not be measured and Consumption Cure. Price 25 and only by the nitrogen, potash and phos. cents. Trial bottles free

Concentrated manures do not contain this humas or organic matter in such form that it may be of any benefit. In A Russian letter says: A curious and this it is lacking in agricultural value. unusual sight has just been witnessed by We may avoid these disadvantages by the inhabitants of Bjeigorod, in the following a judicious clover rotation or south of Russia. A few days ago at by plowing under other green crops, enormous flight of eagles were seen Clover and commercial fertilizers should fly past the town and settle in an adjago together, and together will make a cent forest. The woodmen who were it complete substitute for barnyard manure. the forest at the time fied in dismay A complete fertilizer contains the same from the place. It was well they did, for leading elements in its composition, but when these unwelcome visitors had taknot in the same proportion as would a en their departure it was found that they fair sample of yard manure.

phorie acid it contains.

cial fertilizers we have the following :

A single ton of these goods will con-

166 lks nitrogen

176 " phosphoric acid. Or 407 pounds of fertilizing matter

having quotable value, and would, there fore, by applying the trade table of vaiues, cost from \$45 to \$50 per ton at point dure manuf Tosse goods could not be manufactured (as some might suppose) for \$10 or \$20 per ton.

The application of such a fertilizer would not be very economical, because of its high value, except on exhausted and barren soil. It depends however, that may be said of him.—Boston Tranon how we have treated and applied our yearly supply of barnyard menure and on what plant food we have taken from the soil. Some land may require a complete treatment; one field may require two ingredients; an adjoining field or farm may require but one.

From these comparisons we summarize the following:

Of all manures, birnyard manure should have the preference. Commercial fertilizers may be substituted in connection with clover.

How Squaws Cure Fever.

Late in the evening of the second day, while I was lying on the bear skin with swimming brain and a fevered brow, he came back, but not slone. Two strong, athletic square, each toting a large pack, were his companions. The elder of the two was about as

tough, leathery-looking a specimen of

aboriginal ugliness as I have ever fallen

in with, and, making due allowance for their loads unceremoniously aside, and the elder proceeded at once to business. Watching me closely as she did so, she rolled a large handful of leaves in her hand until they were partially pulverised, then passed them over to the younger squaw, who soon made a pint of very bitter tea from them, which I was told to drink. I managed to gulp it down, Yard manure contains a composition of hot and bitter as it was, and the old
