People who have traveled through this county somewhat can have but a faint idea of the immense apple crop. Wherever there is an apple tree it is bearing heavily the weight of beautiful fruit. Some are so heavy that they are bent to the ground. The apples are unusually good, too. Some are round and healthy, they present a striking contrast to the crops of recent years. They are crisp—dirt clean. It is a clear case of over-production. In many cases the prices for the fruit would not pay the farmer for transporting them to market. Cider, too, is cheap and good. It is being manufactured in immense quantities.
