The them hisn-of-War Built Up in Lake Michigan Is an Exact Counterpart of tire Massachusetts-An Illustration of Ses Life.

(Special World's Pair Letter.) However dilatory and careless Uncle Sam may be in some things, when he sets out to make an exhibit of his resources he accomplishes that end promptly and thoroughly. At the Conennial exposition, and all expositious, at bome and abroad. Uncle Sam has been first in the Sent, and whatever he displayed made the best possible ap This has been true at the world's fair, where the government has been easily first in point of promptness in completing buildings as well as installation of the exhibits. Vexations delays that characterized nearly every other department of the exposition were missing in the government's section. Uncle Sum is a hard toskimuster, and contractors who work for him rarely fail to keep to the letter of their agreement. Hence it was that when the exposition opened Uncle Sam was ready to receive the visitors.

Aside from the aquaria of the Fisheries department (and they are the special exhibit of the national fish ssion) Uncle Sam's naval exhibit is the most popular with all classes of world's fair visitors. Persons who are familiar with the ocean and its ships are pleased to examine the fidelity of detail which the exhibit shows; while residents of the inland find great delight in getting a whiff of marine odors and an insight into the methods of the marine soldiery. The battleship Illinois is so like in appearance to e genuine ironclad that a majority of the visitors are in ignorance of the fact that they trend the decks of a brick and mortar man-of-war. The structure, which to all appear-

ance is a destructive battleship, has been crected on piling in the lake at the northeast portion of the park. Bredberg, the expert chimer of St. Having the appearance of being moored to the pier, with long landing | ices have been secured for the purpose.

American naval commodores from revdutionary days down to the lion hearted Farragut, are there. Documents that prove the valor and unquenchable fire that burn within the breasts of patriot sendogs whose home was Columbia are in evidence, where the youth of the land may call and imbibe some of the spirit of patriotism that induced great men to lay down their lives in the nation's cause. Relies of the civil war are common in this

nderful collection. The hydrographic survey department s one of the interesting places for landsmen. Here one may see models of the bed of the sea. The attendant will point out the craters of the submerged volcanoes and locate exactly the site of the lost Atlantis. The ocean's depths are laid before the eye while the secrets of the deep are un locked by the apparatus used by deep sea sounders who wear Uncle Sam's badge. In the ammunition department are shown the shells, cartridges, projectiles and other missiles of war. The apparatus for hoisting the steel deathducers from the hold to the gun ek is kept in perfect running order. and the exercise of loading and training the mounted rifled cannon can be observed at almost any time between S a. m. and 5 p. m. It's no trick at all for the marines and gunners to send a steel projectile from the ammunitionroom via the big guns into the hull of a rival vessel five miles distant within

The best time to visit the Illinois is not later than 8:30 in the morning, when the marines are put through their morn-PAUL DE H. SWEENEY.

Concentrate guards will not be allowed to flirt any more. An order requiring them to keep away from the stands where pretty girls are employed has been issued.

THE sixteen foreign countries dissatisfied with the single judge plan of making awards at the world's fair have decided to enter into competition

THE chime of nine bells in Machinery hail will be played each day from 9 to 920 a. m. and 6 to 7 p. m. by Prof. C. E. James' Episcopal church, whose serv-

BATTLESHIP "HAINGIS" AT NIGHT.

stages thrown out fore and aft, the illusion is more complete. The structure has all the fittings that belong to Royal Cortissor Discusses the an actual modern war vessel, such as guns, turrets, torpedo tubes, torpedo ets and booms, with boats, anchors, davits, awnings and deck fittings, toeather with steam winches and other ppliances for working the same. Officers, seamen and marines have been detailed by the navy department during the exposition period, and the dise and mode of life on United States war vessels are completely illustrated. While the complement of men is not so great as actually employed on war vessels, the number is sufficient to carry out the gun drills, torpedo drills effective by the soaring dome of the and other ship exercises dai

The destructive force of the Massachusetts, one of the crack ships of the United States navy, is amply presented in its counterpart, the model battleship Illinois. The dimensions of the model are those of the Massachusetts—length, 548 feet; width amidships 69 feet 3 inches depth from water line to main deck, 12 feet. Centrally situated on the main deck is a superstructure 8 feet high with a hammock berthing above 7 feet high, and above these are the bridge. chart house and small boats. At the forward end of the superstructure is a cone-shaped tower called the "military mast," near the summit of which are two circular "tops," intended as lookouts for sharpshooters. The height from the water line to the summit of the military mast is 76 feet, and above is placed a flagstaff for signaling.

The battery is powerful and murder-ous. The shells thrown from the big guns will pierce almost any armor own save that "nickel armor" plat which is used exclusively by United States vessels. There are four 13-inch eech-loading rifled cannon, eight 5inch breech-loading rifled cannon, four 6-inch rifles, twenty 6-pound rapidounted as in a genuine battleship, and every point of the compass is within range of some of these deadly guns | Agricultural building when the vessel is at anchor. On the starboard side of the ship-the side | the mass, a mingling of dignity with tion craft. Steam launches and cutters ride at the booms and all the outward appearance of a real warship is

The superstructure shows the cabins. staterooms, messrooms, galleys, lavatories, perthings, lockers and fittings for the erew, and the manner in which in which the rapid-firing guns, search lights and boats are handled. The entrasce to the couning tower is from the deck, and in this are all the appurconneces that the captain has at his sparal when taking the ship into battle and during the progress of a fight wea. so much for figures. Details are imible in the limits of a newspaper ticle. The general outline of the exbit may be stated in a comprehensive ay by affirming that with the excepon that the crew is not up to the full is in evidence at Jackson park. But a day for my living expenses in Chiin place of the tons of stores and ammunition carried on the Massachusetts. the flimois is filled with relies of naval | English newspapers that I had seen. warfare dating back to revolutionary I was simply surprised when I found days, a museum of paintings and other that these figures were two or three partment, an exhibit from the naval at the fair will be of much value in plays that appeal directly to the peo-ple who help Uncle Sam keep up his naval war department. naval war department.

abled Commodore Perry to send that Victoria nouse, Great Britain's tattle of Lake Erie; oil paintings of | to a

NOBLE ARCHITECTURE.

The buildings surrounding the Court of Honor are classic, says Royal illuminated at numberless points by ness and animation, by color and lightness. Taken in one comprehensive view, they have also something peculiarly modern in a skyline full of graceful modulations and abrupt, telling transitions; this in spite of the practical uniformity of the cornice height. The latter is not dis-

Administration building, the lower but equally graceful roofs of Machinery firing guns, six 1-pound rapid-firing hall, which are given further variety guns, two Gatling guns in the tower by little turrets on the pavilions at the There is charm in the outline and in

nearest the pier, ye landsmen-is piquancy in the Court of Honor as it is shown the torpedo protection ust, seen from the top of the Administrareaching the entire length of the imita- tion building. The charm is there when the vision is directed over the Machinery and Agricultural buildings on its roofs, the latter crowned with the Diana of Mr. St. Gaudens. It is there when the eye travels straight down the center of the court, and sees between the majestic facades Mr. the officers and enlisted men live is French's noble statue of the Republic, On the superstructure and behind it the peristyle bearing lumbus quadriga, a triumphal group looming superbly against the sky.

"I believe the world's fair at Chi cago is the greatest enterprise of modern times," Lieut. Gen. Dunham Massey, of the British army, said after a stay in Chicago of ten days. "The worth an inspection. They are filled with interesting things, too. Foreign Before I went to Chicago I had gained my ideas of it from foreign newspapers, and I fully expected to pay \$20 cago. Statements that this would be ished in

in the World's History Has There Been a House Like It. The Children's building at the world's fair, says St. Nicholas, is 150x90 feet in size. It is built of staff-a material which gives elegant and substantial effects without the enormous labor

WOILD'S FAIR CHILDREN'S BUILDING. that would be required in using ordi-

nary materials. It is decorated in colors, light-blue predominating. Among other decora-tions are sixteen medallions of the children of all nations in their national costumes: Indian, Japanese, Dutch, French, Spanish -- children of every

The first floor contains the creche, large, airy, cheerful room, where one hundred children can be cared for at a time, while their mothers are out sightseeing. The assembly room is also upon this floor, and this is, perhaps, where more interest will center than in any other part of the house. It is furnished with chairs, like any audience room, except that the seats are of several different sizes. There is a platform from which will be given to the older boys and girls stereopticon lectures about foreign countries, their languages, manners and customs, and important facts connected with their istory. These facts will be told by experienced teachers and kindergartners, who will then take groups of children to tee exhibits from the countries about which they have just heard. In the assembly room there will also be dramatic, literary and musical entertainments carefully adapted to suit the intelligence of varying ages. Di finguished people who are visiting the exposition will be asked to give familiar talks about their special lines of work. Authors, artists, musicians and scientists will be called upon to min-ister to the happiness of the fortunate little people.
On the second floor kindergarten and

kitchen garden departments will be in full operation for the benefit of mothers and others interested in the best methods of instructing children. Here will be also the cooking school from and in twenty days he had accomthe Drexel institute in Philadelphia. The Ramona school for Indians is to a copy of the original drawing, for be brought from Santa Fe, N. M. which we are indebted to our contem-There are thirty pupils, and they will bring all their furniture and decorations and will do their native basket weaving and other characteristic Indian work. There will also be a school for deaf mutes, where the interesting ess of teaching to speak and to read from the lips will be shown.

The library is as nearly a model one for children as can be secured. Por-traits of writers for children, with autographs whenever that is possible, are upon the walls. The favorite home papers and the familiar magazines are to be found, ready either to be merely glanced at or to be read at leisure. On the roof, above all this busy lesson life, is the playground. This is a lovely garden, all inclosed with a wire screen for safety. It is full of flowers and plants, and live birds are flying about in per-fect freedom. Toys of all nations are on exhibition here, from the crude child trinket of the savage to the talking, walking, working playthings of France. And they are not for show merely, but for the children to play

Greatest Show on Earth, "The fair cannot well be described, it is so great and has so many features that are elaborate, valuable and in-structive," said Robert P. Porter, superintendent of the census. "It is the greatest thing of the kind ever attempted, and the people of the east should see it to appreciate it. The immense buildings are worth a visit to Chicago in themselves. They literally form a city which is of oriental splendor and regal magnificence. They have arisen as if at the rubbing of Aladdin's lamp. No one person can ever know all the beauties they contain, for there is so much that it will one may get a general idea of the fair by a trip around the White City, and however long he may stay there will find enough to entertain and instruct him, whatever may be his tastes. No of the World's Columbian exposition, one should go with the idea that he and a strong contrast to some of the will see it all, but no one can spend features which are to be seen in the his time within the gates without get- park for which an admission charge is ting his money's worth."

Washington Monument in Coins. World's Fair Director Fred W. Peck has at last succeeded in his plan of having a pile of the silver souvenir ins stacked up in an architectural Arrangements have been completed to begin building a reproduc tion of the Washington monument at the capital in souvenir 50-cent pieces. This solid silver model will be eighteen coins, but its appearance will be most attractive and is expected to excite an additional call for the souvenirs. The silver monument will be erected in the center of Manufactures building, under the great white clock tower. An atbuildings are immense and all well tendant will be placed in charge to

Wisconsin Pearls on View. What is said to be the finest collection of fresh water pearls ever got together has been placed on exhibition the Wisconsin pavilion in Mines and Mining building. The finest speci-mens run to dark blue, blue black, pencock, dark purple and dark green shades. Among them, however, are have marks of great value on them. All these pearls were taken from mus-

Indians at the World's Fair. Prof. Putnam has added to his Indian exhibit on the lawn between the The Annapolis department is chiefly ing in the right hand a staff floating sisting of a man and two women besmall band of Navahoe Indians, contographs and autographs that collectors would give vast sums to acquire. In the exhibit of the naval authorities are relies that crowds linger about with reverent awe. Old-fashioned cannons, ruined with rust, that enmembers of the tribe may arrive in a ney general under Lord Salisbury's thrilling message, 'we have met the hitherto exclusive home, will be open few days. WORLD'S FAIR GOSSIP

THE Columbian gift of the Illinois board of lady managers to the Chil-dren's building is a case filled with Chi-

circular urging the people to visit the world's fair and denying the charges of extortion. Col. Culp, of the committee on cere-

nonies, is preparing plans for an im-sosing celebration at Jackson park on the Fourth of July. THE committee on awards has had C. F. Sanders, of St. Albans, England,

appointed a judge in the department of floriculture to examine the orchids. A DATE tree over fifty feet in height and measuring about fourteen feet in diameter was received at the California state building. The tree came from the Santa Barbara valley.

Los ANGELES county, Cal., is represented in the Horticultural building by a large liberty bell made of oranges, between eleven and twelve hundred being used, and by an immense column containing 13,878 oranges. Both de-

signs excite much interest. THE live stock committee of the na tional commission has completed its investigation of the live stock depart ment, and has made a report to Presi dent Palmer. The report says that the affairs of the department are in excel-lent shape, the buildings being all nearly completed, and the pavilion for stock exhibitions being especially

serviceable. Another exhibit has been installed on the battle-ship Illipois which is full of interest to the student of the naval history of the United States. It is a full-rigged model of the steam frigate Colorado, which with its sister ships, the Franklin, the Wabash, the Ning ara and the Merrimac, prior to the breaking out of the civil war, constituted the most formidable fleet in the

THE Nebraska state building occupies 6,000 square feet, being 60 by 100 feet and two stories high. It is surrounded by porticos. All the rooms and accessories of a modern club-house, including a post office, toiletrooms and check-rooms may be found. Nebraska is represented in all of the departments of the exposition and makes many special exhibits in the state building.

TYPICAL FRANCE. Falguiere's Symbolic Figure at the World's Columbian Exposition.

The commissioners of the French section of the Chicago exposition having decided upon the execution of a symbolic figure for the commercial section of the French exhibit, a statue of France was immediately thought of, and, in spite of the shortness of the time at their disposal, Mr. Roger Ballu,

spector of the beaux arts, asked the take the task. Mr. Falguiere accepted, plished the work honorably. We give porary, L'Illustration.

France is represented seated and wearing a cuirass, the right arm being raised with a proud but pacific gesture. The left arm rests on a tablet bearing the inscription "Droits de l'Homm (Rights of Man), while the left hand holds the national sword. The head, which is characterized by a calm and serene beauty, is ornamented with a diadem symbolical of liberty, equality and fraternity.

The statue is seven feet ten inches high and will be erected on a pedestal nine feet ten inches high. It will orna-ment the French section, which is very remarkable as a whole and will attract

Bread-Making at the Fair. New points and improvements are constantly being discovered even in the most familiar processes. Many of these were gained by housekeepers who at the Woman's building at Jackson park listened to Mrs. Rorer's lecture on the art of bread-making with yeast. She gave the relative values of high and low yeast, and high yeast in its growth in bread was illustrated by the growth of the plant in soil. She said: "The idea of letting the sponge stand over night has gone out of date Bread-making is easy if the cook will understand a few essential principles." Mrs. Rorer advocated the theory that six o'clock dinners were best for health, and said the idea of heavy meals at noon was against the action of nature. During the next lecture she made Dutch corn pudding with apricots, hominy croquettes and meat

It matters little whether the crowd at the fair is large or small, Woman's building always gets its share, which generally fills it to overflowing. The lectures which take place daily in this building show the educational features

A PECULIAR FLOWER. It Comes from South Africa and Canno

Everything is big at the world's fair. You see and hear there the biggest men, the biggest buildings and the biggest lies in the world. Even the flowers are big. Over in the greenhouse there is one that opened the other day. There is nothing as big as feet high and two and a half feet wide | it in America. It is 44 inches long and at the base. It will make a big draft | is the first of its kind ever bred in this on Treasurer Seeberger's stack of part of America. It comes from southeru Africa and it is known as the Arostolochia Gigas Sturtevanti, which in plain English means Sturtevant's big birthwort. The uncanny-looking blossom is hard

to describe. It looks like a great many not very pretty things. Sir Samuel Vernon Steele, standing behind it, said: "It looks like a lobster!"

Mr. Hughes, standing in front of it

"It looks like a parrot!"

It did look like both parrot and lobster. It also looked like a musician's bag, a green gooseliner and a roquefort cheese. But it is a mighty rare and lavenders, browns and whites that thed green in color and hanging by a slender rope from a net of leaves which its growth has spread under the glass roof of the greenhouse. It comes from southern Africa and was brought back here by the Stanley expedition. In Africa the flower sometimes grows to a length of seventy-two inches. The leather exhibit and the south pond a Arostolochia Gigas is akin to the plant known as the "Dutchman's Pipe."

> British Day at the Fair. Great Britain will celebrate its day August 29, and those in charge of the the notable law cases in England.
