

CRAZED BY FIRE

The Rescue of Horses and Cattle From a Burning Building.

From St. Louis (Globe-Democrat).

The panic that is inspired in the minds of horses by a phenomenon so strange as fire can be understood only by those who have witnessed a fire in a large stable where numbers of horses are kept. The scene that ensues is one of the most frightful that can be conceived. The horses are rescued from the burning building with the utmost difficulty, and only with most serious peril to the lives and limbs of the rescuers. The animals go mad with fright, rear, kick and dash from side to side so wildly as to make an attempt at rescue as perilous as an advance on a hostile battery. When rescued they will often break away from those who hold them and charge back at full speed into the burning building, there to perish in the flames. They resist every attempt to take them out. They have been known to throw their rescuers with their teeth, to throw them on the ground and trample them, to kick out at their brains. As the fire of the flames increases so does the panic of the unfortunate animals. They scream out in agony as the fire reaches their bodies, yet they will not, for all that, seek a place of safety in the open air. They are crazed with fear, and yet remain to be rescued from the burning building, and to be carried to some place of safety.

There is but one way to get them out and that is to blind them with some convenient cover, such as a coat or a blanket, and thus, unable to see the danger ahead them, trembling in every limb, apparently ready to fall to the earth with fear, they may be led out. But the cover must not be too quickly removed from their eyes, in fact it should not be taken off until the animals are out of sight of the burning building, otherwise they will break away from the person leading them and, in spite of the stoutest efforts, will dash back to perish in the flames.

For cows a burning building does not seem to have the same fascination it possesses for horses. It is said that when a cow stable is burning the animals may be led out without serious difficulty, save that which may result from their fright and the use they may make with their horns in their own frantic efforts to escape. It is a singular fact however, that has often been noticed along the line of railroads, that the headlight of a locomotive engine on a mile and a half from the station of their mothers also, a species of fascination nearly akin to hypnotism. Engineers tell very many stories of this peculiar fact. Not long ago, on a railroad running out of this city toward the south, the engineer of a night train dangled something ahead of him on the track. At first the train stopped, but the engineer, seeing this, he blew his whistle, put on his brakes and guardedly approached the spot where the object was observed. It was seen soon to be a calf that stood with wide open eyes at the headlight. The whistle screamed a shrill alarm, the calf did not move, the bell was violently rung, but the animal headed it out. With some difficulty the train was brought to a halt within a few feet of the fascinated calf, that stood with head erect gazing at the light as though petrified. The fireman jumped from the cab, seized the calf by the ears and dragged it from the track, when instantly the moment his eyes were taken from the light, the full possession of every faculty seemed to return, and, with a bellow of fright the calf broke from his hands and ran away at full speed.

On the Supreme Bench 33 Years.

Last Sunday was the 33rd anniversary of Judge Field's appointment to the Supreme Bench. But two Supreme Court Judges have exceeded his term of service. One was Marshall, who served 33 years; the other was Story, who served 33 years. Judge Field is 75 years old; but he is also one of the most delightful old men you ever saw. He is very lame—a doctor treated him wrongfully 40 years ago or more; but in the operations of his mind he is as learned and vigorous as he must have been 20 or 30 years ago. —*Washington Capital.*

A False Diagnosis.

La Grippe is confounded by many persons with a severe attack of influenza, and the moment the gaze is directed from the object that fascinated it, the spell was broken and the calf ran away.

Four Household Familiars.

Salt on the fingers when cleaning forks, meat or fish will prevent slipping.
Salt thrown on a coal fire when broiling steak will prevent blazing from the dripping fat.
Salt as a gargle will cure soreness of the throat.
Salt in solution inhaled cures cold in the head.

Salt in water is the best thing to clean willow ware and matting.
Salt in the oven under baking tins will prevent their scorching on the bottom.
Salt puts out a fire in the chimney.
Salt and vinegar will remove stains from discolored tea-cups.
Salt and soda are excellent for bee stings and spider bites.

Salt thrown on carpet which has fallen on the seat will prevent stain.
Salt put on ink when freshly spilled on an carpet will help in removing the spot.
Salt in whitewash makes it stick.
Salt thrown on a coal fire which is low will revive it.
Salt used in sweeping carpets keeps out moths.
Vinegar will "set" deluged greens and blues in gingham.
Vinegar is an antidote for poisoning by alkalis.
Vinegar will brighten copper.
Vinegar and brown pepper will heal bruiser or "black eye."
Vinegar and sugar will make a good stove polish.
Vinegar and salt will strengthen a lame-back.
Vinegar used to wash the wall before papering will help the paper to stick.
Vinegar for soaking lamp wicks makes a brilliant light.
Kerosene simplifies laundry work.
Kerosene in starch prevents its sticking.
Kerosene is a good counter-irritant.
Kerosene will remove rust from bolts and bars.
Kerosene will remove tar.
Kerosene on cloth will prevent flatirons from scorching.
Kerosene cleans brass, but it should be afterwards wiped with dry whiting.
A solution of ammonia cleans sinks and drain-pipes.
Ammonia takes finger marks from paint.
Ammonia in dish-water brightens silver.
Ammonia in water keeps flannels soft.
Ammonia is good in washing lace and fine muslin.
Ammonia cleanses hair-brushes.
Ammonia bleaches yellow flannels.
Ammonia brightens windows and looking-glasses.—*N. Y. World.*

Bits From Life

"Yes," said the first, "I suppose I'm ready, as far as my trunk goes, but I've decided not to leave till spring."

Kitty—"Not one of our parlor chairs stand straight; they have all lost a castor or something."

Tom—"An! I suppose every one of them has a history."

"Do you think that marriage is a failure, Mr. Askin?" said Miss Elder, to a young man whom she knew to be engaged.

"I haven't got that far yet," was the frank reply, "but I'm pretty well convinced that courtship is bankruptcy."

"I have learned the whole of the one hundred and nineteenth Psalm by heart," said Benny Bloomer to his father's visitor.

"What is that for, Benny? So that people will give you a quarter to hear you recite it?"

"No. So that they will give me 50 cents not to." —*Life.*

A Humorous Fact

About Hood's Sarsaparilla—it expels bad humor and creates good humor. A battle for blood is what Hood's Sarsaparilla vigorously fights, and it is always victorious in expelling foul taints and giving the vital fluid the quality and quantity of perfect health. It cures scrofula, salt rheum, boils and other blood diseases.

Hood's Pills act easily, yet promptly and efficiently on the bowels and liver.

Three Great Men and a Ham Bone

In the newly published life of Sir Richard Owen comes the following:—A footman came over from Fenwick Lodge with a large bone wrapped up in paper, and a note from Lord John Russell requesting over to let him know to what animal the bone belonged. The professor looked at it and said, "It is a ham bone." "What do you mean?" said the footman. "I mean a ham bone." "What do you mean?" said the professor. "I mean a ham bone." "What do you mean?" said the footman. "I mean a ham bone." —*Life.*

Entitled to Confidence.

Mr. G. W. Benford, druggist, should have the confidence of this community; his calling is one of responsibility; very often precious lives are entrusted to his care; taking the agency for selling the celebrated Red Flag oil should be a guarantee, it will do all that is claimed for it, and no remedy excels it for the quick cure of rheumatism, neuralgia, sprains and all bodily pain. Price 25 cents.

It May Do as Much for You.

Mr. Fred Miller, of Irving, Ill., writes that he had a severe kidney trouble for many years, with severe pains in his back and also that his bladder was affected. He tried many so-called kidney cures but without any good results. After a year he began the use of Electric Bitters and found relief at once. Electric Bitters is especially adapted to cure of all kidney and liver troubles and often gives almost instant relief. One trial will prove our statement. Price only 50c. For large bottles of Snyder's drug store, Somerset, Pa., or at Brallier's drug store, Berlin, Pa.

Unnecessary to Specify Which Noon.

Two young ladies on the street were discussing an approaching marriage, apparently oblivious of all else that was passing, and this was the conversation as overheard by others on the car:—"The invitations are just out, understand?"—"Yes, I got mine to-day."—"At what hour is the ceremony to take place?"—"The invitation reads, 'noon.'"—"High noon, you mean?"—"No. The invitation simply reads, 'noon.' It's taken for granted that every one will know it means 'high noon.' She's too aristocratic to be married at low noon." —*Detroit Free Press.*

Knights of the Maccabees.

SHE WAS "SOT" IN HER WAYS

And her Husband Thought it Best for the Stranger to Go.

From the Detroit Free Press.

One day I was telling up a rough trail road in the Cumberland mountains of Tennessee, I encountered a small brown sparrow. She has a little chirp of a voice, also, and she uses the English language with variations.

I had always taken a great deal of interest in the house opposite because of Tangle Curis, the doctor's little daughter. Tangle Curis was 3 years old, fat and dimpled and merry, with big brown eyes that were fond of looking across the street at me in my window.

"Is that the little Sylvia is sick," said she, wiping her eyes on her calico apron, "so sick I fear she die."

"She's worried to death, Harry, for it's her only child. Maybe you might save the little thing's life." "I don't see how I can do a thing for the matter," said the doctor, easily.

Nevertheless, he found time to go to see the child. There was no one with her but the half-blind and childish grandmother, who could not speak a word of English and who regarded him with suspicion and distrust.

"She's worried to death, Harry, for it's her only child. Maybe you might save the little thing's life." "I don't see how I can do a thing for the matter," said the doctor, easily.

Nevertheless, he found time to go to see the child. There was no one with her but the half-blind and childish grandmother, who could not speak a word of English and who regarded him with suspicion and distrust.

"She's worried to death, Harry, for it's her only child. Maybe you might save the little thing's life." "I don't see how I can do a thing for the matter," said the doctor, easily.

Nevertheless, he found time to go to see the child. There was no one with her but the half-blind and childish grandmother, who could not speak a word of English and who regarded him with suspicion and distrust.

Nevertheless, he found time to go to see the child. There was no one with her but the half-blind and childish grandmother, who could not speak a word of English and who regarded him with suspicion and distrust.

A Simple Story.

She is a washerwoman and her name is Ellen Johnson.

Every Tuesday morning she comes to the house of the doctor, who lives opposite, to do the family washing. She is small and wiry and wears a calico gown, and whenever I see her quick, short steps, I am reminded of a small brown sparrow.

"I had always taken a great deal of interest in the house opposite because of Tangle Curis, the doctor's little daughter. Tangle Curis was 3 years old, fat and dimpled and merry, with big brown eyes that were fond of looking across the street at me in my window."

"Is that the little Sylvia is sick," said she, wiping her eyes on her calico apron, "so sick I fear she die."

"She's worried to death, Harry, for it's her only child. Maybe you might save the little thing's life." "I don't see how I can do a thing for the matter," said the doctor, easily.

Nevertheless, he found time to go to see the child. There was no one with her but the half-blind and childish grandmother, who could not speak a word of English and who regarded him with suspicion and distrust.

"She's worried to death, Harry, for it's her only child. Maybe you might save the little thing's life." "I don't see how I can do a thing for the matter," said the doctor, easily.

Nevertheless, he found time to go to see the child. There was no one with her but the half-blind and childish grandmother, who could not speak a word of English and who regarded him with suspicion and distrust.
