DAY OF THE DEAD IN PARIS. Carious Scenes During the Pilgrimage to

the Graveyards. Paris, it is said, thinks once a year of those whom she has lost. The truth is she thinks very much oftener of them, for their touching devotion to the memory of the dead is one of the finest sides of the French character. A Floral Detective of Long Ago.

In early times the Dutch farmers of the up river farms of New York had an ingenious way of recovering pocket knives that might have been dropped or mislaid while plowing or gardening was going on. Cutlery was not as cheap their and abundant as in these days; so the farmers took the thrifty precaution of lecoing two or three sunflower seeds in their knife handles. Then if the knives fell upon broken ground and could not be readily found, the owners would wait until the seeds sprouted, and an isolated sunflower stalk or blossom in field or patch would signalize the possibility of a missing article's being at its root. True, the owner did not always realize the result of the scheme, because a pass ing boy who understood the token often "got there" before the planter.-New York Tribune.
