The Origin of Easter.

Rev. Minot J. Savage, of Boston, preached an unusual Easter sermon Sonday saving :

monly supposed, that Easter began to be celebrated after Christ was born, after His supposed resurrection and ascension and that this day has been confined exclusively to the history of the church as setting forth its belief in this great hope of a future life. Easter is older than Christianity. It is older than any historic form of religion with which we are accurated. It finds its spring and source deep down in the heart of man, and therefore with all its flowers, with all its faith and inspiration, it belongs not to any church, not to any race, not to

any religion, it belongs to man. The word Easter, as no doubt you are aware, is simply an anglacized form of the name of an ancient Tentonic goddess, the Goddess of Spring ; and, although the name occurs once in the New Testament. it is there by a curious anachronism. for it was unheard of in the church until hundreds of years after the New Testament was written, known and long familiar in the church when the Bible was translated. It was put there to were declared the nominess of the party, stand for the Greek because it was the subject to the rules governing the organi- popular word that was familiar to the
