Carlyle and Scott.

"To read of Scott," says Temple Bar, "makes most others, even of the noblest and best, appear small by comparison." The writer illustrate: his meaning by pointing to the contrast between Carlyle and Scott in the matter of sleep. Nothing, he says, short of a "treacle sleep," in which he could lie "sound as a stone" for hours, could satisfy Carlyle.

His naps were serious things, and if any inroad from without or within were made upon them, anathemas and "waes me's" would be sure to follow, while constant nights of waking and aching would be met by Scott with scarce a grumble or by a playful one.

A dog, whose yelping had disturbed his slumbers, moved Carlyle to the jocosely savage wish that he had the animal by its hind legs within reach of a stone wall.

"Bilions and bendache this morning," notes Scott, under the influence of a like infliction occurring in the very midst of his sea of troubles. "A dog howled all night and left me little sleep. Poor cur!" with an outgoing of sympathy toward the unconscious troubler of his repose. "I dare say he had his distresses, as I have mine."

Shakespeare's Heroines.

The fact that boys acted his beroines may have impelled Shakespeare to present his Rosalind, Imogen, Julia and Viola in doublet and hose, because i male attire the boys must have looked conceive a male representative of Ludy Macbeth than of Juliet, but we, with our advantages, can never be wholly reconciled to the idea of a woman played by a man. The greatest revolution in the history of the modern drama the stage. This change was caused not merely by art considerations, but arose in part from the laxity of morals and of manners at the restoration; but nevertheless what a mighty and beneficent change it was! What gifts and grace, naut. what loveliness, purity, tenderness, genius, charm, have been shown to the delighted world since women have been played by women within the confines of the magic wooden O! How did, how could, the players of Shakespeare's time procure boys of such intelligence, beauty, delicacy of mind, that they could worthily personate pure, lovely, noble

Could we now tolerate any youth in such parts as Imogen, Desdemona, Juliet? Still it must be remembered that the boys who first acted such characters were probably trained, inspired, instructed by the master himself, and he may well have done wonders. It was a hard condition, and twin born with Shakespeare's dramatic greatness, that he should see his women played by lads. Could he ever have been wholly satisfied with the result? - Gentleman's Magazine.

He Was Too Realistic. Last winter a number of literary peo-

ple indulged from time to time in amateur theatricals. During February they produced a comedy. One of the actors played the part of a burglar, and had to climb up the outside of the house in which the entertainment was given and enter through the window which was at the rear of the improvised stage. He hurried round from the dressing

rooms and valiantly commenced to struggle up the wall, when a policeman grasped him by the neck, thinking him a veritable burglar.

He started to explain, but the minion of the law would have none of it. The andience was wondering in the meantime why the play did not proceed, and the young actors and actresses on the stage were eagerly waiting for the burglar to enter and give them their cue, Strand Magazine.
