EDITOR HERALD. From the nature of things, there is some danger of farmers getting into too much of a hurry to secure their crops. Owing to the very wet month of June it is a question whether, with the best of care, the wheat will make a very good quality of flour. The experience of the writer, who, by the way, began milling over forty years ago, has been, that a dry June The bran will be thinner, the flour whitbread; hence the advantage in using a little care in securing the crop. Have it well ripened before cutting, and well cured in the shock, to avoid all danger of heating and mow-burning. This will counteract, to a large extent, the ill ef-

Parker & care bestowed on it then, for I know that it would be simply impossible to take better millers, and why not better bakers than we had then. We have all had a
