From the News, Muskegon, Mich. Licut. Chas. M. Pausler, a carpenter and fruit grower, has lived in Ottawa County, Michigan, for thirty years, and in Bass River eleven years past. He served in the War of the Rebellion in Company D. Third New York Cavalry, and was a good soldier. He was found by the Morning News reporter engaged in building a house a short distance from Bass River. He left his work and in response to an inquiry in reference to Dr. Army Life.

There are few pleasanter drives in this part of the country than the one along the South Grand river road, ranning between matism, how, I do not know. I would get through my work during the day and go home, and before midnight I would be all most wild with pain. I was resiless nights, and the only way I got any sleep was by taking laudanum or some other opinte. A year ago this fall was almost helploss, and in the winter I became entirely so. I had to be helped up and down in a chair, and could not get to bed alone. Through the hips and back I was paralyzed, or felt as if I was. I had no feeling in that region of the body. The pain in my feet was to great that I could hardly step on them. I was what you would call completely used up. My usual weight was about 160 pounds, and I had lost fisch until I weighed only about 130 recents. I had been doctoring and using all kinds of medicines, but they did me no good. The doctors told me I could not becard, and that I would in time be all drawn up. I was completely discouraged.

I did not have any faith that they would do me any good, but I procured a box of A. J. White, the druggist, and, taking them for three days, I began to feel bester. The first improvement I noticed was in my feet. I could step better and with a great deal less pain. By the time I had finished the third box I could walk nutural and without pain. Previous to that it had taken me twenty minutes to walk sixty rods. By the time I had finished using the third box the numbness in my back and hips had entirely said: "I was in the army for three years, and it was while there I contracted the rheumatism. it was while there I contracted the rheumatism. After coming out I was hame and sore a good deal of the time, but was not sick enough to go to bed. At first I was not very bad, but as time went on I became worse. About a year ago I was so bad that I had to give up my work on the farm. I had doctored with doctors and taken a great deal of medicine, and had become kind of discouraged. Nothing seemed to help me, and finally I went to the drug store of A. J. White and asked him if he had anything to kill or cure me. He said By the time I had finished using the third box the numbness in my back and hips had entirely gone, and by the time I had used the fourth box my rheumatism had practically disappeared. I have recommended the pills to all my afflicted friends, and they have been benefit and anything to kill or cure me. He said he had Dr. Williams' Pink Pills for, Fale People, and he thought if I would take them they would help me. I purchased a box and before taking all of them I felt better, and I knew they had helped me. HEROISM IN MINES.

"A boy told me ones," he proceeded, that after an explosion ene of the men who was with him brought him along a considerable distance in the workings. At last they met the afterdamp. The lad was so terrified, so anxious to get out, that he wanted to rash through and make his way to the shaft. If he had gone on, he certainly would have dropped, but the man would not let him. He stopped him by force, and though the lad bit and fought like a little demon he stuck to him and held him near to the ground, so that they could breathe. How do you think he calmed the boy at last? Mang comic A SUBJECT OF INTEREST TO SOLsongs to him. Well, they had to keep where they were for about five hours, and then, when the air had got better, H. B. Knowlton, Fifth Michigan Cavthe man started off and ought the youngster out safely, the h once he was nearly suffocated by the afterdamp. Now, there's a case that nobody would have heard of probably if the lad hadn't

happened to have told me about it." As an instance of heroism in this direction that is known, however, I recall a story I heard near the bank of the Hyde pit after the explosion in 1889. You know that the slightest delay in fiving for the shaft may mean death. In the neighborhood of Bolton some few years ago one man out of a party of colliers stopped behind for a minute or so to look for his son, a boy of 14, who was working close by. The two met, but, alas, they perished there together and were found clasped in each other's arms. And paternal devotion as thus manifested has cost many a brave

fellow his life. Well, on the occasion referred to a mon pamed Haslam brought from the man named Haslam brought from the workings, comet as he was scurrying along to the pit mouth, a youth about 16, and throughout the terrible journey he shack to the lad with the most heroic Paxtonville, Sayder Co., Pa., Aug. 24, 36. determination. Twice the boy stumbled and fell, but the noble collier dragged him to his feet and urged him to push on with all speed. Other mishaps befell them, yet both, I rejoice to say, gained the surface alive and comparatively

Something About Partridges. Among the habits of the partridge one is that when a covey is roosting on the ground, with their tails bunched together in a circle, the bunch is surmounted by a line of watchful heads, like sentinels on duty. Another is that they run the instant the ground is touched after a "flush," the dogs often trailing them in rabbit hunting fashion. Their sense of smell is evidently very noute, for during the nesting season, if the eggs, which number from 10 to 20, are disturbed in any way or a hand even inserted in the nest, it will be immedi-ately deserted and a new one built. A short time previous to the nesting the Somerset, Vannear, Priday, males are often involved in desperate combats for the choice of mates, who tund by and enjetly watch the encour ter, seeming not to care which one becomes the victor. The incubation is performed entirely by the female, the male, when not feeding, often being perched on some slight elevation, encouraging her by his mellow toned call of "bobwhite." Two and sometimes three broods of young are reared during a senson, the nesting beginning as early as May 1. Later in the fall the broods of young occasionally join forces, but whether from a want of company or for

protection is not known. When feeding, the birds are sometimes scattered several yards apart, but at the first sign of danger an alarm is given, and they immediately "bunch," with their heads placed close together, as if in consultation. The first shot into a covey will often cause them to break and fly in all directions, and if not disturbed again for several minutes "scatter calls" will be heard on every side. These are made to collect the remaining birds, who again bunch. Many of the market gunners seem to have no qualms of conscience and very often kill without hesitation an entire covey, when at the same material or color, though House." > Question of Adipose. A criminal lawyer of long experience

at the bar was heard to say the other

"I have made juries in murder cases an especial study. There are a large number of men, larger than most people suppose, who have scruples about finding death as a punishment for a murderer. I used to make it my business to study jurymen's faces and see if I could read by the lines whether or not they had scruples about the death sentence. I gave this un, though, as being beyond my power of comprehension. Later continued study of the jury box led me to a discovery. That was that in nine cases out of ten a jury composed mostly of tall, lean men would, when the evidence was sufficient, never have the slightest hesitation about fixing extreme sentence. On the other hand, a jary where short, fat men predominated in number would occupy twice as much time in finding its verdict, and when brought in it would generally be a term of imprisonment for the murderer."-

UPPER TURKEYFOOT. Hensel D. C. Heinbaugh D.

Is a special boon to business men who, having drifted unconsciously into the drink habit and awaken to find the disease of alcoholism fastened up in them, rendering them unfit to manage af-fairs requiring a clear brain. A four weeks course of treatment at the PITTSBURG KEELEY INSTITUTE, No. 4216 Fifth Avenue,

restores to them all their powers, mental and physical, destroys the abnormal appetite, and restores them to the condition they were in before they included in atimulants. This has been done in more than 1600 cases treated here, and among them some of your own neighbors, to whom we can refer with confidence as to the ab-olute safety and efficiency of the Keeley Cure. The fullest and most searching investigation is nvited. Send for pamphlet giving full information.

IMPORTANT TO ADVERTISERS. The cream of the country papers is found in Remington's County Seat Lists. Shrewd advertisers avail themselves of these lists, a LIME!
