A PRAIRIE NEW YEAR. How the Cowboys Celebrate on the Western Plains.

A few days before the New Year's preparations are begun for the big dance which inaugurates the season's festivities on the western plains. The ranch where the ball or "fandango" is to be held is literally given over to the boys for the occasion, and they never fail to make the most of it. Invitations are sent over the neighborhood within a radius of 20 miles, and nearly every one is accepted, for a ride of 20 miles to one accustomed to spending 10 or 12 "Does it satisfy, does it pay, to live as hours a day in the saddle is a mere

Sky Scraping Trees.

What are said to be the tallest trees in the world are to be found in the forests of Victoria, Australia. They belong to the cucalyptus family, and range from 350 to 500 feet in height. One of them that had fallen was found by measurement with a tape to be 438 feet from the roots to where the trunk had been roken off by the fall, and at that point the tree was three feet in diameter. The tree grows with astonishing rapidity. A tree of this species planted in Florida grew 40 feet in four years with a bole of a foot in diameter. Trees of the same species in Guatemala grew 120 in 12 years. The same one was nine feet thick.
