A BICYCLE TOUR

Three gentlemen for a European tour purchased new hundred dollar bicycles. One a Columbia—the others of well-known high-grade manufacture. They had an agreeable trip—particularly the Columbia rider. Before returning to America, it being late in the year—and wishing to buy new machines in 1897—they sold their wheels to a London dealer. The Columbia bicycle brought \$65.00. The others \$40.00 and \$35.00 respectively. But one of the many proofs of Columbia superiority. If you look a year ahead there is wise

School For Lovemaking.

"Speaking of colleges, how I wish some one would found a college for training in the art of lovemaking." said Miss Lillian Bell, the writer, in the course of a recent talk. "I suggested once of a kindergarten for the training of husbands. Now I want to change that and have a college for lovers, with a post graduate course for husbands. As it is now-well, almost any girl can do almost anything with a man. You know how easily one girl can rob another girl of her lover. He, poor, blind being, never suspects it.

"A girl would know in a minute if another man was trying to win her ing the great merit of Ely's Cream from her lover. She has intuitions Balm, the most reliable cure for calike atennæ which tell her the very nature of every approach. But with a 10 cent trial size can be had of your man it is different. He sees only 'a druggist or we mail it for 10 cents. sympathetic soul' in the girl who leads | Full size 50. him away by all the deliberate arts of which she is mistress.

"But there, one can go on all day talking about these things. Everybody likes to talk about love. People ask me if I am not 'uplifted' by the success I have had, but I tell them elaimed for it.-B. W. Sperry, Hartthat it was not any great inspiration ford, Conn. on my part. When I began to talk of love, I had the ear of the world.

Governor Hastings denies the story "I do not write out of my mind that the State will be required to pay for simply. Why The Beer Tax is \$1.44

There is much curiosity as to why the tax on beer was made \$1.44 a barrel, instead of \$1.45 or \$1.50, says the Chicago Record. The rate adopted sounda good deal as if the senate committee was imitating the bargain counters in the department stores, but there is a deep and important significance to the figures. They were adopted for the sake of convenience in mathematical calculations. One hundred and fortyfour is the multiple of 2, 3, 4, 6, 8, and 12, which are the divisions used by the brewers in the sale of beer. In estimating and computing the taxes upon fractional parts of a barrel \$1.44 is much more convenient than \$1.50 or \$1.40 or \$1.45. Thus the tax on one half a barrel of beer will be 72 cents, the tax on a quarter of a barrel, 36 cents; on a third of a barrel, 48 cents; on a sixth of a barrel, 24 cents; on an eighth of a barrel. Is cents. Even cents, and no fractions enter into the calculation.

And the state of t

Sow An Army Officer Stood the Supre

PROOF OF SINCERITY.

In the days of the "old army" on the frontier, when military posts were cometimes hundreds of miles from any civilized place, there was little to do in the way of amusement in the winter time when the post was snowbound, and it was then that the reputation the

was gained. And it is true that a great deal of both was done at that time. It was in these days that an even transpired that showed that the principal actor had the courage of his convictions, and that he was most certainly born under a lucky star. It was after a very "wet" stag dinner party, and all had partaken most freely of the wine, strange as it may seem, the subject that came up for discussion was the mans believe in fate. To them a man's fate is written above, and the time of his death is set, and nothing can advance it. Well, this belief had been discussed long and earnestly. The pros and cons had been gone over at length, till one officer wanted to know of what use was reason if every one was born with a tag of destiny attached. One officer finally arose and said there was no use of discussing the matter any further. The only way was to make a practical test of the question, and he would give himself as a subject. Could a man willfully dispose of his life when the fatal moment had been chosen at his birth from above?

He could get no one to try the experiment on him. Finally a wager wa

He placed the pistol against his temple and pulled the trigger. The pistol missed fire. agents, deputy collectors of internal revenue, storekeepers, gaugers and examin-"A joke," yelled the crowd.

The fatalist smiled, and, recocking the pistol, aimed it with a steady hand at the clock on the wall. He fired, and the bullet crashed through the center of the dial.

"Apologize to me now," he said. "I have won the bet. I always believed in fate."—Cincinnati Enquirer.

FISH AS FOOD. The Dark Is Better Than the White For an Active Person.

Mrs. S. T. Rorer, in The Ladies Home Journal, contends that there has not been a sufficiently accurate analysis upon which to base any table regarding the chemical composition of fish at all reliable. "The albuminoid matter in white fish, as cod, haddock and halibut. It is the medicine above all others is in about the same proportion as in for eatarrh, and is worth its weight in beef and mutton. They contain, however, more phosphorus—the active fish, such as trout and pickerel, containing a gold. I can use Ely's Cream Balm with safety and it does all that is still greater amount, due no doubt to their activity. The amount of carbon depends largely upon the amount of fat they contain. The whitefish are, therefore, deficient in carbon. If you should ask an intelligent cook what vegetable to serve with a boiled white fish she would answer quickly, potatoes, as they supply the wanting carbohydrates.

"There are other kinds of fish, howsays, and Philadelphia entertained the geon, that are quite well supplied with carbohydrates, in consequence of which they are not so easily digested as the white fish. The more oil they have dispersed through the body, the more difficult the digestion. In the white fish the fat is held in the liver; in the dark fish it is dispersed through the entire flesh. From this fact we learn that dark fish man. Many authorities affirm that the mere active fish, as well as the more active animals, give better muscle making food than their more indolent rela-

There was a touching exchange of compliments the other day between Emperor William and the Russian painter Verestchagin, whose works are now on exhibition in Berlin. The kaiser went to the gallery and was gracious enough to remind the artist that they had met before, "Yes, your majesty," replied Verestchagin, "and then you were only 'highness," but now you are 'majesty.'"
To this the kaiser is said to have replied, holding out his hand, "And you, who were a great painter then, are now a greater one.'

this must merge smoothly into the whole. The manipulation of a horde of It is not altogether surprising that dancers in whom unusual intelligence the Russian is reported as expressing deep respect for the emperor's critical powers, or that he quotes, as showing limitless historical knowledge, the emperer's declaration, made at this moright body to the right place in the mentous interview, that "if ever a judgright way, and a presence of mind in ment of God broke over a man, it was over Napoleon at Moscow." Meanwhile director a generalship of limited range Verestchagin's pictures will continue to indeed, but of much acuteness and much reveal the horrors of militarism, and thus supply one with the pleasant mental recreation of wondering what Eutope's one real war lord can see to ad-There is always an abundant supply mire in them.-New York Times. of stories of the expertness of Hindoo

A French View of Us. I heard much of the American chivalry to women-of how they could walk the streets and travel alone. Let us be frank and say that it is all nonsense! The newspapers make free with the names of ladies, and drag wives and mothers and sisters into the shambles of every political controversy, every social contretemps. While among the better classes, in their clubs and drawing rooms, one hears hints, scandals, in nuendoes, and stories-and most of them about the ladies in their own circlesuch as would prepare the way for a dezen duels a week in my own country. In Effect November 15, 1896.

When one hears speeches—it matters stage. But to hop around on one is quite little by whem, for they pretty much all speak well—one is a little jealous of The same man can do many other a race which seems to be endowed by wonderful things. Teeth That Take Root.

A Russia dentist has at length solved the problem of supplying us with false teeth, which will grow into the gums as firmly as natural ones, says the Figuro. The teeth are made of gutta percha, porcelain or metal, as the case may be. At the root of the tooth holes are made, and also in the jaw. The tooth is then placed in the army has for card playing and drinking cavity, and in a short time a soft granulated growth finds its way from the jaw into the holes in the tooth. This growth gradually hardens, and holds the tooth in position. It does not matter in the least, according to this enterprising Russian dentist, whether the cavity in which the tooth is placed is one from which the natural tooth has recently been drawn, or whether it Mohammedan religion. The Mussul- has been healed for months or even

Something to Know.

It may be worth something to know that the very best medicine for restoring the tired out nervous system to a healthy vigor is Electric Bitters. This medicine is purely vegetable, acts by giving tone to the nerve centres in the stomach, gently stimulates the liver and kidneys, and aids these organs in throwing off impurities in the blood. Electric Bitters improves that appetite, aids digestion, and is pronounced by those who have tried it as the very best blood purifier and nerve tonic. Try it. Sold for 50c or \$1.00 per bottle at Snyder's drug store, Somerset, or at Brallier's drug store, Berlin.
