Borses Err From Ignorance, Pain or Fright. They Must Be Convinced That Resistance Is Useless Use the Whip Sparingly

and Never Kick the Animal. Horses are essentially creatures of habit; of gentle, confiding dispositions, but excessively nervous; timid, at times irritable, and prone to resist strenuously anything that frightens them. If, for example, you put a rope halter on an unbroken colt and tie him to a post, the drum declares that there is a positive more the repe cuts into his tender skin the greater will be his struggles, while he will soon yield to a halter that infliets no pain.

Through nervous fright borses sometimes become panic stricken and absolutely uncontrollable. They suffer also occasionally from what, for want of a ically incapable of motion. This condition is almost invariably the result of able explanation of it is that the first ment is fear; that when he finds that resistance are mingled with his fright, and that these combined emotions produce this morbid state.

The herse is quick to take advantage of the ignorance or the fear of these "too old to learn new tricks," and his Magazine. memory is so retentive that he never forgets what he has once thoroughly

It may also be set down as a rule, garded, for of all animals the horse is the least understood, the most harshly judged and unjustly treated, and for the least infraction of discipline he is too often brutally punished. If men who pers and endeavor to ascertain the cause of the animal's misbehavior, they would The eye is the best index to the ani-

mal's feelings. The ears are very expressive, but they do not reveal so plainly the emotions that are dominating him as the eye does. Therefore study the eye with its varying expressions, and when you can read its meaning you hold the key to one of the chief secrets of successful horse training.

The horse should be convinced that resistance is uscless, but do not be imnations or bursh. Remember that sucress is the reward of unwearied patience. If you fail at first, keep trying natil von succeed. Do not be discour-

should be the very last resort, and retwo, cuts and a few sternly spoken words are more efficacions than an hour's purishment. There is no more | ble. victions or false idea than that a horse is benefited by a "sound thrashing." On the contrary, it is the very worst thing you can do, because the horse's recollection of the pain and the fright occasiened by it is more vivid and enduring than his remembrance of why it was administered, and at your next lesson be is nervous and afraid and at the least note of anger in your voice (for horses judge the mood of the trainer by his manner and his tone of voice) he may become almost uncontrollable in his ef-

forts to escape the expected flagellation. It is a safe rule for may one having a hasty temper not to have a whip at hand. The temptation to use it may be too great. And it is also wise not to attempt to teach him when you are in a had humor, for if he does not do just right you will probably vent some of it

When whitpping is used only as a last resort, the necessity for it seldom arises. As the horse makes progress in his education he understands better what is required of him and transgresses less frequently, and nearly always a sound rating when he knows that he is misbehaving is sufficient. Smetimes when this is disregarded a slap with the open hand will cause instant obedience.

There are two forms of punishment, or rather brutality, that are inexcusable under any circumstances-these are striking a horse over the head, no matter how light the blow, and kicking him-and aside from their inhumanity there is great danger of permanently injuring him. Whenever during a lesson a colt or young horse becomes heated and angry, cease at once, and if you have been impatient and abused him keep away from him and do not appreach him until he has forgotten the

Be soothing and gentle in your manner and your tone of voice. Win his confidence, and you will never regret it. for then in the hour of danger your voice and the touch of your hand reassure him, and he will face imminent peril if only you are near.

In conclusion never forget that the triumph of the trainer's art is in willing and cheerful obedience from a destre to please, and because long custom has made it a habit, not because the horse fears to disobey through dread of punishment. -Our Animal Friends.

Many of the streets of Paris are lined with trees. If a tree dies, another of the same kind, age and size is brought from the state forests and put in its place. The cost is something tremendous, but Paris is the most beautiful of modern

A Tiger With a Glass Eve.

This isn't a "stuffed" tiger, but a real live one, ferocious and strong. He is at present in the menagerie at Stuttgart and looks as fierce with his glass eye as with the real one.

A serious affection of the muscles caused the heast to lose the sight of one eye. As the public didn't appreciate a one eyed tiger, the beast was put under cocaine and the useless optic removed. This was a ticklish operation, several strong keepers holding the beast down It is unwise, as it is mean and ungalwhile the eye was taken out.

He was measured for a new eye, which had to be made with a special degree of ferocity. For the first week he tried hard to Jab it out, but he now rests tentented as the only wild animal with a glass eye.

"Doctor," said the patient, "I be-

stomach." "Not a bit," replied the medical mar-very promptly. "God made your stom

ach, and he knows how to make them. There's something wrong with the stuff you put in it, maybe, and something wrong in the way you stuff it in and stamp it down, but your stomach itself And then the patient immediately

went out to find a physician who understood his business. - New Orleans Times-Democrat.

Light Restored. "There are many more women living than I used to think."

"Is that so?" Yes. Before I married I used to think my wife was the only woman in the world."-Columbus (O.) Journal.

Every Chinese implement has its deity. There is a god of knives, mother of spades, another of hatchets, anothSun Spots and the Weather.

It was suspected a full century ago by Herschel that the variations in the number of sun spots had a direct effect upon terrestrial weather, and he attempted to demonstrate it by using the price of wheat as a criterion of climatic onditions, meantime making careful discryation of the sun spots. Nothing very definite came of his efforts in this direction, the subject being far too complex to be determined without long periods of observation. Latterly, how ever, meteorologists, particularly in the tropies, are disposed to think they find vidence of some such connection be ween sun spots and the weather as Herschel suspected, Indeed, Mr. Melcoincidence between periods of numerous sun spots and seasons of excessive That some such connection does exist

seems intrinsically probable, but the modern meteorologist, learning wisdem of the pest, is extremely cautious about ascribing easual effects to astronomical better name, may be called "nervous phenomena. He finds it hard to forget paralysis," when they seem to be phys- that until recently all manner of climatic conditions were associated with phases of the moon; that not so very brotal treatment, and the only reason- long ago showers of falling stars were considered "pre-mostic" of certain emotion aroused in the horse by punish- kinds of weather, and that the "equinoctial sterm" had been accepted as a he cannot escape anger and a spirit of verity by every one until the unfeeling hand of statistics banished it from the

Turning a Negative Into a Positive. A short time ago a developed plate was sent to the editor by one of the with but few exceptions, that he intends | members of the Camera club on which to do just right. If he err, it is from the image was partly reversed-that is, ignorance, pain or fright, rarely from instead of being a negative it was alstubbornness or vice. This seems to be most a positive. The cause of this is generally unknown or at least disre- what is termed solarization-in other words, the plate was very much overexposed, and on development came out a positive instead of a negative. If a plate costed with silver salts is exposed in the camera or under a negative betrain horses would control their tem- youd a certain time, a change takes place in the silver salts, which results in a positive instead of a negative. This find that there is often a good excuse for is the reason why objects which reflect light strongly show clear glass in the negative. They are overexposed, and the image produced is a positive.

There are several processes by which a negative may be turned into a positive during the process of development. One of the simplest is as follows: Expose the plate as for an ordinary negative and develop until the image may be seen distinctly on the back of the plate. Rinse off the developer, and place the plate in a solution made up of a quarter cunce of iedide of potassium, 2½ omces of bromide of potassium and 25 ounces of water. Let it remain in this solution from three to five minutes, aged if you do not seem to make much | wash well in running water, and then progress. Your task may take weeks or redevelop the plate with fresh developeven months, but if you persevere you er, continuing the operation till the

negative image has turned to a positive. While it is true that with some horses | Rinse the plate, fix and wash in the the whip must be occasionally used, it same way as for an ordinary negative. Pyro or ferrous exalate gives the best member always that one, or at most results, but any developer may be used. A plate thus treated may be used as a transparency.-Harper's Round Ta-

A Unique Kentucky Bugle.

It is a bugle made of two slabs of cedar about three-sixteenths of an inch in thickness and bent into a funnel shaped horn. The bell or mouth is 1316 inches in circumference. It is hooped with cowhorn rings and iron bands. The bugle is the property of Mrs. Annie Mayhall, granddaughter of the late Captain Robert Collins, who was a soldier in the war of 1812-15. It was in the campaign of Colonel Richard M. Johnson and was at the death of Tecumseb. Captain Collins was a bugler for the regiment, and this is the identical instrument he used during the war and which ordered the famous charge of Colonel Johnson. Captain Collins was a mechanical genius and with his own hands made the instrument. Every morning at suprise he waked the neighborhood for miles around with his reveille call from his bugle until his

death in 1864. - Frankfort Call. The Decisive Keason. First Sweetthing-So you are going to marry Lord Oldboy, my dear? Second Sweetthing-Yes; it's de-

"I suppose you made up your mind when you heard his title was all right?" "No-o; not then." "When you heard of his castles and

landed estates? "Ah. I know. It was when you heard he had \$100,000 a year income."

"No: it was not then." "Then, pray, when did you decide to marry the old curmudgeon?" "When I heard he had the consumption."-New York Journal.

How She Appeared.

Something whizzed by-a minglement of steel spokes and red bloomers. 'What is that there?" asked Uncle Hiram, withdrawing his gaze from the high building to look after the vision. "That is the new woman," answered bis nephew. "The new woman? Looks like the old boy."-Kalamazoo Tele-

Made It Funny.

"I didn't see anything funny in the story that fellow just told. What made you laugh so over it?" "Do you know who he is?"

"No. Who is he?" "He's the head of our firm."-Lon-

A Warning to Husbands. A story is going the rounds of the English newspapers about a gentleman who, finding a smoking concert wearisome, left early and finished the evening at a musical comedy theater. He sat near the stall door, and as it was chilly he kept on his overcoat. A lady in a private box by accident dropped an earring of no great value, but the trinket struck against the edge of the box front and dropped into the open top pocket of the gentleman's overcoat. The guileless man went home, when his wife, always carefully inclined, turned out his coat pockets. The sequel to this pretty story is not told, though its moral is obvious.

An Awful Idiot. "Of all the fools I ever heard of, Jimberson is the chief."

"What of Jimberson, pray?" r him has waned."-Indianapol Journal.

The larynx of man is twice the size, on an average, of the same organ in equalized by the fact that woman uses tnuch as man.

It is not yet too late, however, to not crack open they will continue to sap begins to go down. grow until frost sets in and will make growth until the ground becomes quite old. Keep the plot clean and the soil loose and the crop may fulfill expecta-

Blue grass is regarded as one of the claims, if directions are followed. best for lawns, and one who has had necess with it suggests that after seedng the lawn with blue grass, which may be done in August and September, Cream Balm is kept by all druggists. the lawn should be mulched with the refuse of hay mows that contained blue grass hay and seeds, especially if the hav matured 'seeds before it was

In this section the late varieties of strawberries bring good prices, and kind for a late crop. Now, there is a brings them into bearing later. As a greatest accuracy and ease. difference in market, the matter of keeping back the crop is very important, as frequently prices will double in be more than regained.

During very warm weather cows insects and will consequently be liable to lessen the yield of milk. This difficulty is one that has caused much anxlaborious to attempt to prevent the an- druggists, 25c. noyance by the application of remedies. Cows are unable to utilize the pasture to advantage under such circumstances, and they are also deprived of rest. An open shed, protected by mosquito netting, will serve as a retreat, and will not be very expensive compared with the advantages derived. Should the weather become cooler, and the barn is protected at the door and windows with netting, the cows will be comfortable at night and rest quietly. If deprived of rest during both day and night it will result in a heavy

The lawn mower should not be used during the present extremely warm weather unless the lawn can be well supplied with water, as the frequent mowing of the grass in a very dry season may cause it to die. The free use of the lawn mower during dry seasons is the cause of many lawns being ruined, and this fact should not be overlooked in managing the grass plot.

Bi-sulphide of carbon will destroy all animal life. If a small quantity is poured into ant holes, or even into rat poles, it will prove the best remedy that can be used. It is excellent to use on plants when they are young in order to destroy insects, provided the plants are covered for a short time. There is nothing better for driving rats away if its use is persisted in.

Crimson clover has been a disappointment to some farmers due to the fact that too much has been claimed for it. Farmers were advised to sow the seed on corn stubble land, or anywhere that a place could be found, and that even if sown late in the season it would make a crop. The fact is that no seed will grow if it can not find proper conditions. To succeed with crimson clover it will be proper to prepare the land for the seed, and it | cold and co ble disease. should be sown from the middle of August to the 20th of September, according to locality, so as to give the oung plants time to grow and become well rooted before winter. It is not a difficult crop to grow, but deserves proper attention, however.

Preventing the spread of fungus diseases could be accomplished better by destroying the branches and vines that are cut away from trees and bushes than by the use of other methods. It is not sufficient to remove the portions of trees affected with black knot. They should be consigned to the flames, as no remedy is as sure in the destruction of the spores as fire.

It is not necessary to feed geese, ducks or turkeys during the warm season if they have the privilege of a range. Insects grass and seeds are plentiful, and the fowls can secure more food than they can consume.

Land that has been used for a crop in which disease appeared in the produci, such as potatoes, should not again be used for such a crop, as the disease may remain in the soil for several years, but such land may be planted to ome other crop and a system of rotation practiced which may destroy the disease and fit it again for the crop lant, to go to the opera without your desired, but which was affected by

> To prevent milk from becoming sour during very warm weather it must be cooled immediately after it is drawn.

There are some garden crops that may be planted now, such as string weman, although this disproportion is beans, sweet corn and turnips, for late use. Seed planted now, provided rains her larynx a little more than twice as are favorable, will germinate quickly and make rapid growth.

> The corn crop was backward in growth in this section, but the recent warm spell has been beneficial. There is a liability of injury from drought, however, and for that reason the ground should be given shallow cultivation, so as to keep the top soil loose, which will serve to prevent loss of

One of the most neglected crops after the harvest season is over is the blackberry. Perhaps no crop entails so little labor in proportion to the revenue of of swords. Every kind of animal has finally in a bandtox carried on the derived therefrom, yet it will pay to Luces of a passenger,-New York Sun. keep the canes free from weeds and

Lived off Bread and Milk for Years. 9 Home
Doctors Failed to Cure Me. Dr. Salm Succeeded in Curing.

A Case of Catarrh and Throat Trouble Cured
by Dr. Salm. ceeded in Curing.

For more than 4 years I have had a bad case of catarrh, stormach and general trouble. Took cold continually. For one and one-half years I could eat only bread and milk. Tried 9 different doctors to get rid of my misery, but got worse and worse. So I went to Dr. Salm for treatment, and to-day I am as strong as ever; can eat anything, and don't take any more cold, and consider myself cured of this terrible disease.

John H. Kauffman. Mattawanna, Mifflin Co., Pa. Catarrh and Eye Trouble Cured by Dr. Salm. For more than 5 years I have had a very bad case of eye trouble and catarrh. The eyes continually got sore and grew weaker and weaker. I always took cold. Dr. Salm

Wonderful Piece of Work.

I have had a very bad case of catarrh and sore eyes for more than 8 years, and consequently it gave me a world of trouble. I was obliged to see Dr. Salm, under his treatment the change is wonderfully rapid. My friends are astonished, as well, and think with me that Dr. Salm has done another wonderful piece of work.

Louis C. Shannon.

Whitestown, Butler county, Pa.

For more than 3 years our 2 children have been suffering from catarrh and throat trouble, also enlarged tonsils. They were continually taking cold. Could hardly breathe at night. Their constitution became undermined. After a short course of treatment with Dr. Salm, they have almost entirely recovered from their miscrable disease.

J. F. Harrison. Bellefonte, Centre county, Pa.

Couldn't Walk 15 Yards at a Time. Was No Earthly Use to any One. Thought 1 was Going to Die, but Dr. Salm Cured Me.

For 2 years or more I have had a fearful trouble, began to get very weak. My limbs would not earry me any more. Couldn't walk a stretch of 15 yards, and my heart would beat at a fearful rate at the least exertion. It seemed my blood turned to water. I gradually became pale as one dead. I was no earthly use to any one, and all my neighbors and relatives thought I was going to die. Home doctors couldn't help me, so I went to Dr. Salm, and to-dny, I am happy to state, that I am stronger than ever, can eat anything, do a full day's work and enjoy life as much as any one, and my color, any one may be proud of.

FATAERS AND MOTHERS, FOR **ONS AND DAUGHTERS.** 

LL THE FAMILY. With the close of the Presidential campaign THE TRIBUNE recognizes e fact that the American people are now anxious to give their attention to me and business interests. To meet this condition, politics will have far less space and prominence, until another State or National occasion demands a re-

newal of the fight for the principles for which THE TRIBUNE has labored from its inception to the present day, and won its greatest victories. Every possible effort will be put forth, and money freely spent, to make The WEEKLY TRIBUNE preeminently a National Family Newspaper, interestng, instructive, entertaining and indispensable to each member of the family

We furnish "THE HERALD" and "N. Y. WEEKLY TRIBUNE" ONE YEAR FOR ONLY \$2.00. CASH IN ADVANCE.

SUBSCRIFTIONS MAY BEGIN AT ANY TIME.

Address all orders to THE HERALD.

Write your name and address on a postal card, send it to Geo, W. Best, Room ? Tribune Building, New York City, and sample copy of The New York Weekly Tribune will be mailed to you.
