STREET CAR CONDUCTORS.

They Work Harder and Rate Lower Than heir Steam Road Brother

You often think it's hard for the pasenger conductor of an accommodation train which stops at two or three stations to the mile to tell who has paid his fare and who has not. The conductor of a short run accommodation' train especially must be a peculiarly gifted man. He must be at once both cool headed and even tempered, or if not he b a total failure.

But if the requisites of a railroad tonductor are such, what are the remirements of the man who runs a comnon street car? Why, as much as those of the railroad man and several times more. The railroad accommodation conductor on one of the short run trains which leave the big cities has little more work, little more responsibility and requires less real skill than the man who by grace is called "conductor" on a trolley car of one of our cities.

Both men, of course, have thousands of cares. The railroad man has a certain number of stops to make and a certain schedule time allowed for getting over his run of the milroad. The street car conductor has an uncertain number of stops to make, yet he still has his certain scheduled time to make on his run, and he must make it, too, or be able to give an "A No. 1" excuse for failure.

The railroad conductor is always the biggest man on his train. Is ever the street car conductor the biggest, unless every passenger is off and the motorman also? These things make it hard for the patient man, who must be polite and who is expected by the company for which he works and spurred on by a dozen or so sharp eyed "spotters," or "street car detectives," as they call themselves, to feel as lovely as a spring morning, and they make his already pervous work doubly so. The railroad conductor doesn't meet that phase of existence once in a decade, or if so not any oftener.

No one presumes to expect so much from the knight of the ticket punch as he does from the knight of the trolley rope. Every one who travels on street cars expects the conductor to know every cross street on his line and just where it strikes that street, and indeed, he should know this much, but in addition he is expected to know every one who lives on the streets along which his line runs, every one who lives on all the countless streets which cross the route of his car and then all the immediate streets and their inhabitants the whole length of his line. The street car conductor is expected to be porter as well on his car. He must help people on and off, lift up and lift down huge baskets and bundles, never get tired of all the questions which only the city directory could answer, and then, in addition, keep all of the strict rules of the company for which he works and see to it that all of his passengers do so too. For this work he gets \$2 or \$2 25 a day, while the railroad conductor, who is a very king in comparison, draws his \$5 or \$6 per day, or \$125 a month, and is not classed as a "social suspect" either .- Pittsburg Dispatch.

New England Meeting Houses.

Cotton Mather said: "I find no just ground in Scripture to apply such a trope as church to a house for public worship. A meeting house is the term that is most commonly used by New England Christians, and every town,

for the most part, can say we have a modest and a handsome house for the worship of God, not set off with gaudy, pompous, theatrical fineries, but suited unto the simplicity of Christian wor-

The people were seated in the early days, says Dr. Ezra Hoyt Byington, in his book on "The Puritan In England and New England," on rough benches, men and women on opposite sides. Pews were not provided first. Now and then a special vote was passed by the town authorizing some person to build a pew in the meeting house at his own expense. Squares on the floor, about 6 feet by 6, were deeded to individuals, on which they erected pews to suit themselves. The best seat was sometimes assigned to the man who paid the highest tax in the parish. Sometimes committee was instructed "to have respect upon them that are 50 years old and upward, others to be seated according their pay." In one instance we have a record that the committee was instructed "to have respect to age, office and estate, so far as it tendeth to make a man respectable, and to everything else that hath the same tendency."

Turks and Meerschaum

According to the best authorities upon the subject, the idea of using white tale in the manufacture of pipes is of comparatively recent date, compared with the age of the habit of smoking, and what is still more curious is the fact that in the oriental countries which produce white tale, or meerschaum, as it is called, and where the use of tobacco forms part of the education of the faithful, the people never dream of making this substance into mipes. They make bowls and goblets of it, but no pipes. It may be that the long pipestems which allow the smoke to cool and lose its acridity before reaching the month leave the oriental

smoker quite indifferent in regard to the quality of the bowl. At all events, one never sees a Turk with a meerschaum pipe.-Courrier des Etats Unis.

The Ancient Umbrelia.

On coins in the rock carvings of the ancients the umbrella often shows its familiar form. This goes to prove that Jonns Hanway did not invent the umbrella, but he saw the value of the eastern sunshade and soon it became the fashion to carry this useful article. There must be a great difference between the umbrelia of the eighteenth century and the mederu steel ribbed, silk covered, slender article which it is regarded as a misfortune to get wet -Irish Times.

Calling the Chickens.

In England the calls chuck, chuck, or coop, coop, prevail; in Virginia, coo-che, coo-che; in Pennsylvania, pee, pee. This latter call is widely employed, being reported from Germany, Spain (as pi, pi), Bulgaria, Hungary, Bavaria and the Tyrol. In the Austrian province the term is used in combination, thus: Palla, pi, pi; the call pullele, pul, pul, also occurs there.

In some parts of Germany the poul-try are called with tick, tick; in Prussia, put, put, and young chickens with tak, tak (Grimm), and schip, schip, the latter being an imitation of their own cry. In eastern Prassia hens are called with klackschen, kluck, kluck; also tippchen, tipp, tipp. Grimm re-cords also pi, pl, and tict, tict. Wein-hold reports from Bavaria bini, bibeli hedli; pi, pi, and pel, pul. In Denmark the call is pcotle; in

Holland, kip, kip; in Bohemin, tyco; in Bulgaria, tiri, tiri.-American Anthropologist.
