. A NUTTING SONG.

Soon will winter's frost and cime

Thro' the woods we come together.

Ming a song of putting-time,

Autumn days are here:

On the hills appear.

Nutting vil the day :

In the flue October weather,

Now appear the hazelnuis

Sings her roundelay; In the doll and dingle drear

in forest and in rocky glen,

For happy days are here.

In the wooded date:

Greet us in the valu.

Hearts are blitbe and gay

Chestnuts, walnuts, butternuts,

No bluebird, in the mendow fair,

The squirrel holds full sway.

"ne leaves are brown and sere;

2 ben sing a song of nutting time,

A STORY FROM LIFE.

For answer there was a splash in the water, and then a tow head arose above the surface and steered off in the direction of the cow. The crowd watch-Extablished 1877. Organized as a Mational, 1890

ed breathlessly. This slender boy had done what not a man among them had either cared or dared to do. The river was wide at this point, but Surplus & Undivided Profits, 23,000 00 the boy struck out in a bee-line, and was able, after some minutes of strong and swift swimming, to head off the

animal by catching hold of the barrel. He then swam around her, caught hold of her tail and steered her towards the wharf again, amid the cheers of the crowd. "Throw me a club," he shouted,

when within speaking distance. This was done, and the boy climbed onto the cow's back with the club in his hand. Raising it aloft, he brought it down upon the barrel with a few vigorous blows, shivering the wood, and in another moment the liberated

low was on shore, ronning with all

her might towards home, and the boy was drawing on his clothes. "Are you the Widow Howell's boy?" sald a voice over his shoulder. "No, sir," was the quick answer, and, looking up at the tall, fine-looking man, the boy went on by way of explanation; "she hasn't any boys. I'm

Pete Noble's boy, and my name is Harry." "Well, Harry," said the gentleman, "you're just the sort of boy I need.

How would you like to go to the city to Hve?"

Harry gave a little gasp of pleasure, but did not answer immediately. All his short life he had been longing to see the city. To be sure, it was only five miles away, but it might as well have been five hundred. Here, then, was his opportunity.

"Well, sir, I'd like to go," he said, but I haven't any clothes but these." "No matter about the clothes," said his new friend, "they're for sale in the city. I want a boy to stay in my rooms at the hotel and answer the telephone, lodging. If you want to go, and your take you from Mr. Montgomery." folks are willing-I don't want a run-

A table poonful one kind of lemur, called a loris, that of salt put into the oil will help greatly swiftly and silently captures the birds, which never dream that an enemy is

The next day Teddy wrote to English schoolmate:

Islands Named For Dogs.

Dozens, some say scores, of islands, of greater or less dimensions, are known as "Little Dogs," "Dog Islands," "Big Dogs," etc. An island in the Thames, now a part of London, is called the "Isle of Dogs." Three lofty, rocky islands near St. Thomas, Virgin Islands, are known as "The Great Dog," "George Dog," and the "West Dog. There are "Dog Islands" in the Malayan Archipelago; off the coast of Maine; on the coast of Franklin county Florida, and another in the Scrawati,

On the coast of Kansschatka there is an island known as "The Island of Talking Dogs." The curious story connected with this spot of land and the one according to an Asiatic legend:

The first inhabitants of the Far North did not employ dogs, but drew | ka. The members of the gang robbed ter ages had elapsed men made an attempt to use the dogs of that regionwhich, by the way, talked just as men do-as beasts of burden. The talking the Missouri Pacific railroad company

friendly as he ever was. -Puck.

All Around the Farm. Scrub rams should be promptly disposed of, and not allowed to mingle with the other sheep. By weeding our the ewes and procuring crosses from

suitable pure-bred rams the flock will not only hold its own, but continually improve. Do not sow grain in the orehard, especially wheat or rye. Oats may be sown after the orehard is well grown, and pastured down with hogs, with but little bad effect. Never under any circumstances allow timothy, red-top, blue grass, or any other grass that forms a tough sod, in an orehard. When the

> be in clover; hogs may be pastured on the clover. Give the soil something for what you take from it, and protect the young trees from cattle and bark-loving marauders. With the same lutelligent care that is given to other farm crops I am convinced that the profits of the apple orchard will exceed them all.

orehard is not in cultivation it should

An experienced farmer once told us that when he was obliged to begin fieding new oats, while still moist, he had saved injury to his horses by giving an equal bulk with them of wheat bran. As the bran is itself nutritious the amount of oats may be diminished to the extent that the bran by weight is substitut d. As the oats dry out the until none is given. Yet in seasons when oats were dear we have known for feeding to working horses. - Ameri-

can Cultivator. Renew an old orehard by plowing in the fail and applying a top dressing of about two big wagonloads. In fact, spread it over the entire surface four inches deep, and you will be astonished "But, you know, ghosts can't rob or- at the results. Your trees will take on chards and devour fruit. You are only a new lease of life, make a good growth, with healthy dark green follage in the place of the sickly light green of previous years. You will get large crops of excellent fruit. The trouble with "Nonsense," said his father in a dis- most old orchards is that they are hide-

From recent experiments it appears "But who did it, father?" asked Ted- that a meadow will yield about four times as much feed in bulk if made into hav as it will if pastured. But, as it is eard of them in England, but we well known that the young tender grass tritious than the older and tougher hav, it was found by a careful test that the advantage in notrients, digestibility and freedom from cost or harvesting, will nearly balance the greater yield of

The first consideration in planting After every one else had gone to sleep trees about farm buildings is to shelter them from sun, wind and storm. The need of shade in summer is generally recognized, but too many planters overgrass toward: the fruit trees. They look the equal necessity for evergreens seemed to spring into the air and hurl to protect from winter winds, and to the winter landscapes. Evergreens produce an effect in ornamental planting not to be obtained in any other
