Geologists point out the fact that this chain of lokes has not always been as it now is; that there was a time when all the lakes were blended into one. having probably the Mississippt river for its outlet to the gulf on the south. One geologist says:

Every day sees something taken from the rocky barrier of Niagars, and geologically speaking at no very remote time our great lakes will have shared the fate of those which once existed in the great far west. Already they have been reduced to less than one-half their former area, and the water level has been depressed 500 feet or more. The process is pretty sure to good until they are completely emptied. The cities that stand upon their banks will ere that gray with age, then fall into decaten, but in the sediments that are now accumulating in these lake basins will lie many a wreck and skeleton, tree trunk and floated leaf. Near the city sites and old river mouths these sediments will be full of relies that will il-Instrate and explain the mingled comedy and tragedy of life.

In a certain sense these lakes form one mighty river, draining a region of over 525,000 square miles and flading an outlet for their overflowing water through the swift St. Mary's river at the east end of Soperior; through Hu-

Very Politely Put. Several clergymen boarded a street car in Boston one day, and one of them hearing that Wendell Phillips was in the car got up and asked the conductor to point him out. The conductor did so, and the minister, going up to the orator, snift: "You are Mr. Phillips, I am told." pride os a litigant was at sake. He told

"Yes, sir," "I should like to speak to you about something, and I trust, sir, you will not be offended!"

"There is no fear of it," was the sturdy answer, and then the minister began to ask Mr. Phillips earnestly why he persisted in stirring up such an unfriendly agitation in one part of the country about an evil that existed in "Why," said the clergyman, "do you

not go south and kick up this fuss and leave the north in peace?" Mr. Phillips was not in the least ruffled, and answered smilingly:

The Chain Gang.

"Those gentlemen who are attired in the peculiar uniform that fancy ascribes to the pirate and freebooter," says an old time Washingtonian, "now known as the 'bhain gang,' do not belong to a supposed. While it may be a new custom in some parts of the country to work the offenders of municipal law on the streets the custom has prevailed in this city for about three-fourths of a century. The corporation of Washington established the asylum in 1821, and the male inmates of the penitentiary department were ordered to report for work on the streets Nov. 23, 1823. The asylum, or poor and work house, was located then on the square bounded by M. N. Sixth and Seventh streets northwest, and in the early days those placed in the gang were so small in number as to attract no attention. I do not think that any attempt to place the offenders in the black and white stripes was made till long after the asylum was moved to the banks of the Anacostia, about 1846."- Washington Star.

Horace Greeley as an Orator. Mr. Greeley was not an orator in any scholastic sense. He had a poor and somewhat squeaking voice, he knew nothing of gestures, and he could not take an orator's pose, which adds such emphasis sometimes to the matter and argument to be set forth. Not all his) are of practice on the platform and on | any difference which one of them gets | idly of their hostess: public occasions ever changed his habits and methods as a speaker, and he ended as poorly equipped in the respects named for the vocation as when he began But he had one prime quality, without which all the others are exploited in vain. To state it briefly, of all the eminen speakers I have introduced-and more than once-there was not one who gave better satisfaction, different and notable as they were, than Horace Greeley. As a consequence, he came to me oftenest and were the best. Speaking of Archbishop Temple in the Lambeth conference, The St. James Gazette says: "It is well known that the utmost good feeling and unanimity prevailed at that historic gathering, but it is not perhaps surprising that some of the exotic prelates were at first a little astonished at the blant, plain spoken straightforwardness of the archbishop No doubt sometimes their lordship were told exactly what they had to do and how they were to do it with an absence of circumlocution which was entirely new to them, and one of the American bishops summed up his feelings upon the perhaps rather more than military decision of the present successor of St. Augustine in a highly successful epigram. Queerest Town In England. The most curious town in England is Northwich. There is not a straight street nor, in fact, a straight house in the place. Every part of it has the appearance of having suffered from the isitation of an earthquake. Northwich is the center of the salt industry in Cheshire, England. On nearly all sides of the town are big salt works, with their engines pumping hundreds of thousands of gallons of brine every week. At a depth of some 200 or 300 feet are immense subterranean lakes of brine, and as the contents of these are pumped and pumped away the upper crust of earth is correspondingly weakened and are drawn all ways, and give the town gists. an extremely dissipated appearance.-Now York Sun.
