NEW YORK, June 10 .- Another test was wade of the Holland submarine boat off Bay Ridge yesterday afternoon, and the sodd little craft accomplished the feat of diving under two schooners that chanced to cross its path. This performance was not on the after-

They prepared to see one of the vessels go to the bottom, and were happily disappointed when the Holland came to the surface some distance further on, after having passed under both of the

It was 2:30 o'clock when the submarine boat, with Mr. Holland in charge, left the dock of the Atlantic Yacht club, at Fiftyfifth street, South Brooklyn. She sped down the bay to a point off Owl's Head, a distance of a mile, making the run in 5 minutes and 15 seconds. This was 15 secands quicker than the Holland's best previous record. Diving tests followed, the boat going beneath a log and coming to the surface 20 feet distant.

Mr. Holland then made ready for a mile run at a depth of 35 feet beneath the surface. Both of the Holland's masts were lowered, and, at a signal from the accompanying tug, she disappeared beneath the surface of the water. The tug went shead to warn any vessels that might be in the course taken by the submerged boat, and to clear the channel at the point where the boat was expected to reappear. Two large schooners lay in the Holland's path off Sixty-eighth street, and it was feared one or the other might be sunk. But an unusual commetion in the water soon indicated that Mr. Holland had discovered the danger and had sent his boat still deeper into the channel. When the Holland came to the surface again she had made a record of nine minutes for a mile beneath the water.
