One Can Always Give Himself.

One of the pleasantest of day dreams is to imagine how charitable you would be if you had plenty of money. The role of a bonatiful master or mistress is a delightful one, and it is easy to imagine how, if you had a command of a fortune, you would make people happy and with what grace you would receive their gratitude. Of course few 1 2 ms can venture to indulge the hope that they will be rich, but while we are dreaming these dreams it is will enough to think whether we are showing ourselves charitable in the use of what is really within our command. Take, for instance, one's thoughts. It is natural enough to put a hard and bitter construction upon the actions of others. Possibly, from a superficial point of view, their conduct warrants it. But a thoroughly charitable person-one who would use money beneficently if he had it-will certainly make allowances for others and only reluctantly come to the severe judgment. It is a mistake also to suppose that money can do everything. There are a good many persons who would not if you were as rich as a Barnato take a penny from you. They do not want your money, even though they are not rich themselves, but they would prize considerateners, sympathy and fellowship. If we withhold these things that are surely within our power, probably we should not be so very generous if we had plenty of money .--

"To Cut Stick."

This expression had its birth in the days when people relied more on their legs as a means of locomotion than they do nowadays.

When a man started to foot it from one town to another, he usually cut a London Sketch. stick or a sapling to help him along on his journey.

This habit was particularly common in Ireland, and it is more than probable that the expression found birth in that country. About the year 1820 a song relating the adventures of an Irishman was very popular in Glasgow. It began: "Oh, I creished my brogues and I cut

my stick." The phrase took hold of the American mind in the days of slavery.

A runaway black would generally cut a stick to help him on his travel to possible liberty, and the advertisements concerning runaway slaves were nearly always headed with a crude woodcut of a negro with a stick and a bundle over his shoulder.-New York World.

French Dolloctives.

The ability of French detectives in the matter of disguising their identity is marvelous. Some "years ago one of them made to bet that he would, in the course of the next few days, address a gentleman with whom he was acquainted four times, for at least ten minutes each time, and that he should not know him on any occasion until the detective had made himself known. As a matter off course, the gentleman was on his guard and mistrusted every one who same near him. But the man won his prefer bet. It is needless to enter into the particulars. Suffice it to say that in the course of the next four days he presented himself in the character of a bootmaker's assistant, a hack driver, a venerable old gentleman with a great interest in the Bourse, and finally as a waiter in the hotel where the gentleman was staying .- New York Ledger
