Farmer Hopkins' Evidence.

HE TELLS ABOUT THE SUFFERING OF HIS DAUGHTER.

A Victim of Nervous Prostration and Neuralgia, Saved After Her Physician Abandoned Hope.

From the Republican, Oxlumbus, Ind.

While in the neighborhood of Ragby, Invisian, recently, a reporter was told that by as Clara Hopkins, diaghter of Mr. Deanis Lopkins. A prominent farmer of Bartholomew County, had been the subject of a remsakable transformation. The reporter feeded to investigate and learn the particulars. He was driven to Mr. Hopkins' applended country home, where he had an interesting conversation with that gentleman remarking the illness of his only daughter.

"You have been correctly informed," and Mr. Hopkins, "for Clara has indeed had a severe siege. She tried Pt. Williams' Pink Pills for Pale People and they did her more possitivan all other medicines together that she was entirely well, and since then

Pills for Pale People and they did her more good than all other medicines together that she ever took. A few boxes of that medicine that she was entirely well, and since then the ever took. A few boxes of that medicine has been no symptoms whatever, of her accomplished the cure of a case in a few months which had buffled physicians for years.

"About three years ago her health began to fail. The dector who attended her said this was caused by weak digestion. This produced nervousness, which was necompanied by senral physicians failed to necomplish."

All the elements necessary to give new life and richness to the blood and restore shatternel physicians form, in Dr. Williams' Pink Pills for Pale the nervous about the heart. Of course this Feople. They are also a specific for trou-

ralgic troubles, which at first was located in the nerves about the heart. Of course this was a dangerous location for any such trouble, and she rapidly grow worse, not withstanding that the physician was treating her. This continued till a year ago last November, at which time she was almost constantly confined to her bed.

The neuralgia became gradually worse, and finally she was a confirmed victim to it.

"Nervous prestration set in, and she was toon all run down. Her blood was inspure

THE MOHAMMEDANS. ANCIENT TRICKSTERS The Queer Manner In Which They Mix Up Religion and Murder.

QUEER CONJURING FEATS OF THE The mouth of Ramadan, in which the SEVENTEENTH CENTURY. first part of the Koran is said to have been revealed, is observed as a fast by

Little Experiments In Which Boiling the Heads Off Living Animals Was A Necessary Adjunct-Hew They Killedy, Horse

Conjurers in ancient times were not very respectable members of societywhen successful, they enjoyed the reputation of having sold their souls to the evil one, and when of inferior ability they gained notoriety by being either drowned or burned. The medieval magicians as well as the Egyptian magi and the Chaldean sages were only a strange mixture of chemist, conjurer and charlatan, and as these gentlemen his brother and was arrested. He was were in the habit of using their supposed occult powers to their own advantage they were naturally unpopular The feats of jugglery performed by these craftsmen were intended for the mystification and not the amusement of the public, and for centuries conjuring had to it only a black side.

The amateur conjurer of today is not always a popular individual, save with children and the unsophistocated yokel. bore of greater or less magnitude, whose performance is so obvious as to deceive no one. It is hard to realize that this person is no mere mushroom growth of modern society, but in point of fact his role is one of a respectable antiquity, for he is to be found treading close upon the heels of the magicians and in the days when witchcraft was still rampant. This is significant of his reputation even in those early times, for had any one tak u his tricks seriously he would doubtless have been run to earth and done to death as a wizard.

In the middle of the seventeenth century, in the earliest years of the restoration, a number of tricks were published in one of those facctious books which seem to have occupied the press to a great extent at this time, but which, owing to their popularity, have for the most part perished. The chief recommendation to the greater number of these tricks is that no apparatus beyand the utensils of everyday life is necessary. Also it is suggested to the performer that he can make some small profit out of his entertainment by prevailing on his audience to bet with him on the result of the trick.

"To set a horse's or an asse's head upon a man's head and shoulders' seems impossible out of the land of Facry, but we are informed that by boiling the head ent off from a living animal, "the flesh boyl'd may runne into oyle," and then by mingling the hair beaten into powder with this oil and anointing the heads of the standers by, "they shall seem to have horses' or asses' heads"-a costly experiment and fearsome if successful.

But, besides this, one can "make people seem headlesse," and this without bloodshed and by the following simple receipt: "Break arsenick very fine, and hove it with sulphur in a cover'd pot, and kindle it with a new candle, and the standers-by will seem to be headlesse." Doubtless a strong imagination is necessary for success. Some of the tricks are such as would

nowadays cause the performer to be disliked, to put it mildly. For instance, "have a nut filled with ink, and give this unto another and bid him crack it and see what he can find in that," which being done "will cause much "To keep a Tapster from frothing his

Pots" must have been an amusement to the wags of the period, and for this provide in readinesse the skin of a red Hering, and when the Tapster is absent do but rub a little on the inside of his pots, and he will not be able to froth them, do what he can, in a good while after. "To counterfeit a diamond with a

white saphir" is a most useful accomplishment, but the fraud is likely in box sat the young men ready to win or these days to be discovered and is more lose the wager, and right below, in the a chemical experiment than a trick Several tricks are recommended which have animals as their subject and are

for the most part brutal to our modern of them, two of whom shed copious ideas. Perhaps the least objectionable tears and hesitated not to wipe is "to seem to kill a Horse and cure him them away with their handkerchiefs, which may be thus accomit the Horse in his Provender, and it

FRENCH HUMOR.

M. Francisque Surcey and His Grotesqu It is often said that Frenchmen lack humor and dread ridicule, but M. Franthat humorous good sense which defies mockery. At carnival time in Paris it is enstomary to exhibit on the boulevards grotesque effigies of well known public men. A modest stranger called on M. Sarcey to tell him that his image was to figure in the procession. "Very good," said M. Sarcey. "What

can I do for you?" "Well, if you would be so kind as to lend us some of your veritable garments, they would make the likeness all the

"No doubt," responded the critic blandly. "In that cupboard you will find several hats."

"Oh, the veritable hat will not do! You see, your head-I mean the head of the effigy-is enormous." "Tres bien. Take a coat, then." Dressed in the veritable coat, the Sar-

cev dummy was an immense success. It seemed so strange to literary Paris, however, for a man to aid and abet the caricature of himself that M. Sarcey has volunteered an explanation, which is a delicious bit of humor. "Lamarine," he remarks, "would not have consented to lend his coat for such a purpose. He was a poet with a sensitive soul. So was Victor Hugo. But what would you? We cannot all be Lamartines and Hugos. Why should we poor journalists, who have no feelings to speak of, deny ourselves to the populace when we can contribute to their harmless amusement? Besides, they may not always think it worth their while to

Chamberlain and the "Puritan Maid." A Baltimore woman, in The Sun of that city, tells this story of Joseph Chamberlain when he was in Washing-

ton in 1887: "He was a big, burly man, caring so little for his appearance that at one of the most fashionable dinners of the season his cravat got turned to almost under his ear and his shirt stud became nufastened, and he sat calmly oblivious to either incident. His brains and charm in conversation won him friends wherever he went. One day he called on a lady who happened to be giving a girls' uncheon. She went out at once to see him, and laughingly said if he did not mind being the only man present she would be delighted if he would come in the dining room and take the vacant place of one of her young friends who had not come.

"He was not afraid to face a lot of American beauties,' so he accepted gayly, and the vacant place happened to be next that of Miss Endicott, daughter of Secretary of War William C. Endicott of Massachusetts, a dovelike, slender girl, one of the greatest belles of the day. The outcome of this was the marriage of the English statesman and the 'Puritan maid,' as she was often called, his neighbor at an entertainment to which he had only been cisque Sarcey has given an example of bidden by that fate which shapes our ends, rough hew them as we will.""

He Got the Pin.

A good many people still believe in the little superstition about seeing a pin and picking it up. It makes some of them decidedly uncomfortable when they pass a pin by, and even if experience has taught them that there is nothing to be gained by scooping up the pointed bit of wire they still dive for one whenever they see it.

An aged man was toddling across

Payne avenue at its junction with Wilson some time ago when between the street car rails at the very center of the curve he noticed a pin. It was a bright pin, and it caught his rather enfeebled gaze at once. Being a superstitions old gentleman, he determined to secure that pin. With considerable effort he managed to bend over, when, just as his trembling fingers closed upon it, with a whoop and a roar a cable car came swinging around the curve at the usual terrifying rate. The old man went one way, his cane and glasses and hat went the other. They rushed to him and picked him up. He was badly bruised, and the ambulance was called. As they were lifting him into it somebody noticed something shining between his clinched fingers. It was the pin.-Cleveland Plain

Fooled the Foreman. At one of the iron works in the north of England a good story is told at the expense of one of the foremen at the

The men known as the barrow men have a certain number of rounds or barrows of ore to wheel to the furnace during their eight hours of labor. One stormy night the foreman, who

was suffering from a severe headache, retired to his cabin; but, being of a suspicious nature, he left the door open that he might hear if anything unusual

The men had worked steadily on for parrow of ore on their way to the lift. At last one man in passing the door remarked loudly to another, "One more round, Pat, and then"- But the foreman, overhearing the remark and knowing it was a long way of "knocking off" time, rushed to the door, exclaim-

"And then what, my man?" "And then another," coolly replied the barrow man, and the foreman retired.-Liverpool Mercury.

The Man That Knows.

"There are some men," said Mr. staybolt, "that always know about hings. They have a power of judgment that amounts to genius. They disceru the truth energingly. They know what is right and what is wrong in a quesion, and they know it at the outset without waiting for the event. They range themselves not with confidence, ont with knowledge, and however the louds may lower they are not disturbed. Indeed they rather like the storm, for they know when the end will be. "They are more powerful than other men because they are unhampered by doubts. They don't doubt, they know, and men follow them, as they always will. The trouble with not only calves but most young stock is that they do not get enough.

pearance. Weeds higher than the fences, trees blown down and left to rot 1836. Many stirring tales are told of in the same place, fences out of repair, the later history of Cawdor castle, gates and barn doors off of hinges or which came to be left untenanted for swinging on one hinge, unsightly litter long years owing to the Campbells de-In door yard and at the barn-these parting for Wales, where they married young ladies with ample fortunes - and many such evidences of careilles. ness depreciate the value of any farm. The soil may be excellent, the water facilities all that could be asked for and all natural advantages requisite to make a good high-priced farm may exist and yet that farm scarcely makes its owner a living. It can almost pass for a truism that the armer makes the farm. which he was very partial and which | Many reason that there is no money he constantly used in riding through the in keeping the farm neat, no cash in the carefully-kept barnyard and there is no time for these matters. Such reckon at random. Pleasant surroundings do very materially aid us to do better work; man succumbs to such influences unconsciously.-The Rural

Mrs. G. S. Waite, of Salina, Kansas, gives the following advice in the killing of lice. "Go to a gas house and Accordingly, in the evening, he ask for refuse tar; the amount that you mietly went out to the coachhouse, will have to get will depend on how and, well wrapped up, crouched in a much gr und you will have to go over. If you cannot get it, get tar of any Soon the boys came, very stealthily, kind, only the refuse is cheaper and inside of the house, in the nests, on the ground; in fact, everywhere. One galered with lice or miteseither, as it kills

How is wax obtained by the bee for its normal use in and about the hive? If we examine the abdomen of the worker bee we shall find four rings or folds on the under side of the abdomen which are called "wax pockets." In the process of comb making, little the process of comb making, little flakes of white wax appear, exuding from the folds, which are selzed by the bee when fully developed, and by the legs conveyed to the mandibles, by which it is worked into the nice white combs which we see when the comb is newly built, the same being used either for the reception of honey or brood. At any time when bees are building CONDENSED TIME TABLES. comb these little flakes can be found on the bottom board to the hive, as some are always wasted, especially with a newly hived swarm .- London Bee

At the annual meeting of the Holstein-Friesian Association a report was stein-Friesians, prizes being offered for the cheapest food cost in producing butter and milk. Sixteen cows were in battle of Athara tells a good story about large dressing composed of down from a couple of Scotchmen. He was walk-other parts of the body and securely pound of butter ranged all the way from 13.5 cents down to 4.9 cents. feathers strapped on to the site of a matical average, the largest number were in the neighborhood of 6.33 cents. On the cost of food for 100 poun is of broken by a misdirected shot. He only milk-5.5 cans-the cost ranged from recovered it on the following day, when | 61.4 bents to 25.9 cents. The greatest he found that the wounded bird had number were in the thirties, between

There is no way of exterminating the common daisy except by plowing ing able to use its claws to get rid of or destroying the individual plants; them the poor creature was almost dead | Probably plowing in the spring, and from hunger when found. - Public constant and frequent cultivating with some tool like the cutaway or disk harrow during the summer, would destroy most of them.-Rural New Yorker. A Canadian experimental farm sends

out a formula for sterilizing grape juice "The only thing for you to do," ex- so that it may be kept without fermenting, retaining its natural flavor. Heat it gradually to 170 degrees Fahrenheit, and keep it at that temperature for 10 minutes. Have the bottles in a kettle of boiling water, take them out, fill and cork tightly immediately. Being perfectly sweet and thoroughly sterilized, it will keep for an indefinite period. Probably cider could also be Day Express kept in the same way and other fruit juices.
