

The Somerset Herald. ESTABLISHED 1827. Terms of Publication. Published every Wednesday morning at 10 o'clock in advance, otherwise it will be charged. No subscription will be discontinued until the arrears are paid up. Postmaster not to take out of the paper will be held responsible for the subscription.

The Somerset Herald.

\$3,200 Per Ounce.

Washington Star. "The price of people when asked to name the most precious metals usually mention gold as first, platinum as second, and silver as third," said the proprietor of a large assay and refining establishment in New York to the writer recently. "If asked to name others, silver, platinum and gold, in that order, would be the next in line."

VOL. XLVII. NO. 19.

SOMERSET, PA., WEDNESDAY, OCTOBER 19, 1898.

WHOLE NO. 2464.

A Fleshly Consumptive

Did you ever see one? Did you ever hear of one? Most certainly not. Consumption is a disease that invariably causes loss of flesh. If you are light in weight, even if your cough is only a slight one, you should certainly take Scott's Emulsion of cod liver oil with hypophosphites. No remedy is so simple and preventive to consumption. Just the moment your throat begins to weaken and you find you are losing flesh, you should begin to take it. And no other remedy has cured so many cases of consumption. Unless you are far advanced with this disease, Scott's Emulsion will hold every inducement to you for a perfect cure.

PASSING OF SUMMER.

Summer is going—her footsteps fall in the deepening shadow of hedge and wall. But she leaves, sighing a slight refrain. Kiss her and lead her through Holybook lane. Summer is going—her blushes fade. Where the roses climbing round the base. And her bright garments are tossed aside in the pastured glens of Autumn's pride. Summer is going—her footsteps fall. Where the sweetest notes in my song of praise. So my heart has fashioned them into a tune. That measures the joy in her happy mood. Summer is going—she leaves me here. With the harvest gold and its crimson sheen. But my heart to the morning rose tree clings. And ever its pattered passion sings. Summer is going—why may not I? With her to the garden of endless June. Where life leads over Love's path, rose-strewn. Summer is going—down Holybook lane. But the sweetest notes are tossed aside in the pastured glens of Autumn's pride. For with quickening pace will she yet withstand. The furious firs of Pappy lane. Summer is going—'tis only seems. To the glow of the sunset in a dream. But the corn leaves know—'tis a broken spell. Like the heart that is sobbing "Farewell! Farewell!"

THE MAN IN THE CORNHOUSE.

By SEWELL FORD.

Although the incidents occurred during the War of 1812, they had nothing at all to do with the beginning or end of that struggle. They might, having a few details have happened yesterday. So don't expect history.

Do you know how clear and cold a December morning in Lower Quebec, just across the Vermont line, can be? Well, it was just that kind of a morning when Elizabeth Bowers went to the cornhouse and had an adventure. She was after an ear of corn for her pet horse. As she unlatched the cornhouse door she heard a rustling sound within. "Rats," thought Elizabeth, "the rats and scorpions of this season are very numerous." She opened the door and saw a man. He had been facing away from the door, probably peering through the cracks in the direction of the road, but he had turned as she opened it. He was a tall man and a young one. He wore the cocked hat of the American militia, but otherwise his dress was that of a civilian.

"Well, sir," said Elizabeth, inquiringly. She was startled, but not frightened.

"Well, young mistress?" returned the intruder, looking her coolly in the face.

"May I ask the nature of the business which brings you to my father's cornhouse?"

Tramps were unheard of in those days, and thieves were equally unknown in that section.

"You may ask, but I would rather not answer."

"But I insist, sir."

"Then I obey. The garrison of the fortress in the village is to be paraded in your field to-morrow. I came here to watch the evolution. I entered your father's cornhouse because its open walls offered an excellent place of observation and shelter."

"Why not make your observation in the open?"

"Because I wish to see without being seen."

"Then you are a Yankee spy?"

"Your eyes are gray."

"You are an enemy of my country."

"I am your sincere admirer."

"Your words are unbecoming. I have not met you before, sir."

"Nor I you, but the best of good fortune comes when least expected."

"This meeting can mean no good fortune to you, sir."

"And why not?"

"Because I must deliver you to the authorities as a captured spy."

"I became your captive the moment I looked into your eyes."

"You are pleased to speak very lightly of your situation, sir."

"Not so; I was never more serious in my life. Falling in love is no light matter."

"You seem to make no hard work of it."

"It was no task at all."

"We are not talking sense, sir. What an I do to with you?"

"What do you usually do with your captives?"

"I never had one before."

"Then all the men hereabouts must be blind."

"I am in earnest, sir. I find you hiding in my father's cornhouse, and you admit—"

"That I think your eyes are beautiful."

Elizabeth made gesture of impatience at the interruption.

"My father and Captain Ryalson, of the Garrison Guards, are at this moment within," she continued. "Should I shout they would come and take you prisoner. It is my duty to them."

"Let them! Let them!"

The voice came from the direction of the house.

"Yes, mother?" responded the girl.

"What are you doing?"

"I—why, I am getting some corn," Elizabeth stammered.

The man in the cornhouse laughed easily, and Elizabeth for the first time flushed.

"Do not think it is because of your fine words that I have not exposed you," she said. "It is because I have wanted to do with you and wish you no harm. You—your may go now, sir, and pray be quick."

"Thank you, Elizabeth, but believe me, I never saved my neck with so much reluctance. Since I have learned your name I will tell you mine; it is Matthew Alden. I am of Vermont, and am on the staff of General Hampton. Good-by, but remember, I am still your captive," and before Elizabeth could stop him the tall young man had held her for a second in his arms and touched his lips to hers. Then he had disappeared behind the barn.

Just what were Elizabeth's thoughts for the next few hours I do not pretend to know. "Oh, because I have wanted to do with you and wish you no harm. You—your may go now, sir, and pray be quick."

"Thank you, Elizabeth, but believe me, I never saved my neck with so much reluctance. Since I have learned your name I will tell you mine; it is Matthew Alden. I am of Vermont, and am on the staff of General Hampton. Good-by, but remember, I am still your captive," and before Elizabeth could stop him the tall young man had held her for a second in his arms and touched his lips to hers. Then he had disappeared behind the barn.

A Completed Drama.

Philadelphia Ledger.

And now, once again, Christopher Columbus starts out to cross the Atlantic, to reach his fifth and final voyage, and by curious coincidence, ush his fifth burial place. Unhappy mariner, doomed to sail the seas, denied repose either in life or death, the Wandering Jew himself furnishes no such illustration of restlessness. In his story of his life, success and disaster, honor and dishonor, are invariably linked together, and if his last wishes were obeyed, and the iron in which he made one of his voyages were buried with him, they symbolize his life grimly enough.

Every child knows how Columbus went from court to court asking for a ship, trying to convince kings, priests, nobles that a new world was not a mere fancy, and finally, almost two leagues from Granada, at the Bridge of Pines, a messenger overtook him and told him to turn and go back to the queen; how he did return, and how in the thick of the war which drove the Moors back to Africa and gave Spain again to the Spaniards, Isabella granted Columbus his commission, and he set sail, and went on his most fateful journey in the world's history.

The Sure La Grippe Cure.

There is no suffering from this dreadful malady, if you will only get the right remedy. You are having pain all through your body, your liver is out of order, you have no appetite, no life or ambition, have a bad cold, or are completely used up. Electric Bitters is the only remedy that will give you prompt and sure relief. They act directly on your Liver, Stomach and Kidneys, tone up the whole system and make you feel like a new being. They are guaranteed to cure or price refunded. For sale at J. N. Snyder's Drug Store, Somerset, Pa., and G. W. Brallier's Drug Store, Berlin, Pa.

Food for Troops.

For troops in garrison the regulations provide for 100 men 125 pounds of fresh beef, or 125 pounds of fresh mutton, or 75 pounds of pork or bacon, or 157 pounds of salt beef, when it is not possible to procure and issue, 87 pounds of dried fish, or 112 pounds of pickled fish, or 112 pounds of fresh fish. In breadstuffs, 112 pounds of flour, or in lieu of flour, any one of the following: 112 pounds of soft bread, 100 pounds of hard bread, or 125 pounds of cornmeal and 4 pounds of baking powder.

The same number of men also receives 15 pounds of beans or 15 pounds of peas, 10 pounds of rice or 10 pounds of hominy; 100 pounds of potatoes are supplied; though sometimes this amount is reduced to 80 pounds and 20 pounds of onions added, or the issue will be 70 pounds of potatoes and 30 pounds of canned tomatoes or cabbages or beets.

The same 100 men get 10 pounds of green tea or 8 pounds of roasted coffee, 2 pounds of tea, 15 pounds of sugar or 2 gallons of molasses or sirup, 1 gallon of vinegar, 4 pounds of salt, one-quarter pound of pepper.

Troops on the march are obliged to carry their own provisions, and a reduction, says the American Kitchen Magazine, and their haversacks at times are the only larger, and all they boast is hard bread, bacon, coffee, sugar and salt. These ingredients, by means of a tin mug, a tin plate with a handle to make it a frying-pan, and its cover, they may cook up into anything edible and body together till something better is furnished.

Expenses of the War.

One of the largest telegraph bills ever rendered will soon be presented to the War Department as a result of the war with Spain. Nearly all of the correspondence of the department has been carried on by telegraph, the mail correspondence having been practically abandoned. Orders for supplies, equipments, enlistments, movements of troops, mustering out, assignments of officers, transfers of men, and orders of every description were sent by wire. Since the beginning of the war the small telegraph office at the War Department has sent and received 125,000 telegrams, some of which had nearly 2,000 words in them. Besides these messages thousands were delivered by the telegraph companies by messenger, and it is impossible to tell at this time the exact number handled. It cost the Government \$5,000 to notify Generals Miles, Shafter and Merritt of the signing of the protocol which provided for the suspension of hostilities. The toll to Manila is \$25 per word, to Puerto Rico \$14, and to Santiago 75 cents. The cablegrams to the generals of the army contained over eleven hundred words. Aside from this, Admirals Dewey and Sampson and other naval commanders had to be notified, and, together, it was rather an expensive, though welcome, act on the part of the Government.

Beats the Klondike.

Mr. A. C. Thomas, of Marysville, Tex., has found a more valuable discovery than has yet been made in the Klondike. For years he suffered untold agony from consumption, accompanied by hemorrhages, and was ultimately cured by Dr. King's New Discovery for Consumption, Coughs and Colds. He declares that gold is of little value in comparison with this marvelous cure; would he it, even if it cost a hundred dollars a bottle. Asthma, Bronchitis and all throat and lung affections are positively cured by Dr. King's New Discovery for Consumption. Trial bottles free at J. N. Snyder's Drug Store, Somerset, Pa., and G. W. Brallier's Drug Store, Berlin, Pa. Regular size 50 cts. \$1.00. Guaranteed to cure or price refunded.

People's Party Ideals.

From the New York Press.

From the platform of the Cincinnati convention of the People's party, of which Charles O. Davis is leader, it is no self-respecting Populist would be content with anything else, it appears that the main point of their contention is that the day is to be looked forward to with hope when the human family shall possess a governmental, full legal measure of value made of paper that will expand and contract with the growth of wealth and population. Then, say the platform, and only then, will the people realize the full benefits of civilization and the world be made a garden of delights for mankind. The platform also is opposed to individuals fastening themselves like vampires on the necks of the people, and to the scheme of some villain (not named) who would sell the kingdom of heaven for a mess of pottage.

This clear and specific statement will, no doubt, make many votes. Though the platform is a little vague as to the proper steps to be taken, in order to bring about the growth of the party, it can be no question about the necessity of immediate action in regard to the vampire.

It is pleasant to find the Populist candidate for Governor of Pennsylvania joining hands with his western brethren in denouncing everything. He has discovered that Pennsylvania has been overgrown with a moral ruin, and that the money power is a blight as incurable as gravity. It has remained for the Populists to discover that gravity is a blight, and it is a matter for surprise that they did not insert a clause in their platform objecting to it. No doubt it is their proper opportunity to have a word to say about the money power, and it is a matter for surprise that they did not insert a clause in their platform objecting to it. No doubt it is their proper opportunity to have a word to say about the money power, and it is a matter for surprise that they did not insert a clause in their platform objecting to it.

Prize Captures of War.

The Panama brought about \$100,000. It was taken April 25 by the Maingrove. The first naval capture made after the declaration of war with Spain was the Buena Ventura, a Spanish merchantman, which was taken by the Nashville, April 22.

The prize capture that was valued the highest of any taken during the war was the Pedro. She was taken by the New York, April 22, and was sold at an appraisement of \$200,000 to the Navy Department.

On May 12 the Spanish steamer Rita was brought by the auxiliary cruiser Yale into Charleston, and with her cargo of coal, condensed milk, and medicine, she was taken by the War Department at an appraisement of \$125,000, for use as a transport.

Twenty-seven steamers captured between April 22 and August 10 (inclusive) ten were condemned and eleven released. What the action was in four cases has not been learned, and two cases are yet pending.

The Guido, a joint capture of the Machias and Terror, with her cargo was sold for \$150,000. She was a steamer of over 2,000 tons, carrying a valuable cargo of provisions and a considerable sum of money for the pay of the Spanish troops.

Draped Lincoln's Coffin.

Inclosed in a moth-proof glass case in Secretary Alger's office is a flag with a history. This emblem was used to drape the casket of President Lincoln when his remains lay in state in the rotunda of the capitol in April, 1865. The story is curiously complete—beginning with the arrival of the great navigator 400 years ago, and closing with the departure of his ashes from Havana this week.

The flag is draped as only experts employed by the government know how to do this work, and on the case is an inscription reciting its history. The cowardly assassination of the war President immediately after the cessation of hostilities might properly be called the last act of that great drama, and by a strange coincidence, in the next room, which is occupied by the adjutant general, is found the base of the flagstaff, from which flew the Stars and Stripes when Fort Sumter was fired upon, and thus the relic of the beginning and ending of the greatest modern war repose within a few feet of each other.

Becken's Arnica Salve.

The Best Salve in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains, Corns, and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale at J. N. Snyder's Drug Store, Somerset, Pa., and G. W. Brallier's Drug Store, Berlin, Pa.

Shade Furnace.

Rodger, an old resident at Shade Furnace, informed me many years ago that it was built by Gershart & Reynolds under local lease from Thomas Vickroy. Being in debt, their furnace and lease were sold to the estate of Ogle & Kimmel, of Somerset, who were succeeded by Thomas Gaghenag, who gave way to one Dunlap, when the property reverted to Thomas Vickroy. In November, 1813, Vickroy advertised Shade Furnace for sale at a great bargain. A sale was effected in 1818 to Mark Richards, Anthony S. Earl, and Benjamin Johns, of New Jersey, consisting of the firm of Richards, Earl & Co., who operated the furnace down to about 1820. In 1820 they built a forge called Shade, three-fourths of a mile below the furnace, which was carried on by William Earl for four or five years, and then by John Haman and others. In 1840 it made thirty tons of bars. The furnace was continued, at intervals, by various proprietors to the close of 1858. Daniel Weyand, of Somerset, at his death in September, 1877, was the last owner of the property.

Shade Furnace.

About 1817 Joseph Vickroy and Conrad Piper built Mary Ann Forge, on the Stony Creek, about five miles below Shade Furnace, and a half mile below the mouth of Shade Creek. The forge was named after Mr. Piper's wife, who was a daughter of Thomas Vickroy and sister of Joseph Vickroy. David Livingston was subsequently the owner of the forge, and operated it for several years. Richard Gray, the father of Governor John W. Gray, was at one time employed at the forge in a clerical capacity. Pig iron was sometimes packed on horseback to the forge from Bedford County, the horses taking salt from the Conemaugh Salt Works and bar iron from the Pennsylvania Iron Works. In 1850 or 1850 Peter Kimmel and Matthias Scott built a forge for the manufacture of bar iron on Laurel Hill Creek, in Jefferson Township, in the western part of Somerset County. Mr. Kimmel shortly after withdrew, and the establishment was run by Mr. Scott. Subsequently it passed into the hands of Henry B. Fisher and Jacob Anthony, and ceased operations about 1875. Supplies of pig metal were obtained from Bedford and Fayette Counties. About the year 1810 Robert Philson erected a Catalan Forge on Caselman River, in Turkeyfoot Township. The ore was mined in the immediate vicinity or hauled from Laurel Hill. The enterprise was a bad investment, operations ceasing about 1825. The next furnace in the county was Jackson Furnace, near the Pittsburgh Turnpike, on Laurel Hill, built by Irvin Horrel, Philip Murphy and Charles Ogle about 1825. It was unsuccessful in its hands, about 1832 Joseph and William Graham again put it in blast, only to be overcome by speedy disaster. In 1837 there were three furnaces and three forges in the county.

Shade Furnace.

Rockingham Furnace, two miles above Shade Furnace, on Shade Creek, was built in 1841 by John Foust, and subsequently operated by Custer & Little; Somerset Furnace, at Forwardstown, was built by Huber, Linton & Myer in 1845, and afterward owned by G. Ross Forward, and Wintersburg Furnace was built by the Union Coal & Iron Company in 1856, under the management of G. Ross Forward. All the furnaces and forges in Somerset County have been abandoned.

Philson's Forge made blooms and bar iron directly from the ore—a most tedious and expensive as well as a most primitive method. It was the only forge of the kind in the county. Samuel Philson, a son of R. Bert Philson, who built the forge, is now living in Berlin, Somerset County, in his eighty-sixth year. Some remains of the forge may still be seen.

Prize Money on Men-of-War.

The commanding officer of the fleet or squadron receives one-twentieth part.

The commanding officer of a division of a fleet receives one-fiftieth part; and a fleet captain receives just one-half as much.

The commander of a single vessel receives one-hundredth part of all prize money awarded to the vessel under the command, if the vessel was under the command of the commanding officer of a fleet or squadron or division; and three-twentieths if his vessel was acting independently of such superior officer.

After the shares of the commanding officer have been deducted, what is left is proportioned and distributed among all others doing duty on board the ship in proportion to their respective rates of pay in the service. In this way it is seen that every officer, marine and Jack Tar in the service of Uncle Sam has a personal interest as well as a patriotic motive in advancing the glory of his country on the high seas in time of war.

"I can't see how any family lives without Chamberlain's Colic, Cholera and Diarrhoea Remedy," says J. R. Adams, a well known druggist, of Geneva, Ala., in a letter inquiring the price of a dozen bottles, that he might buy them freely for all his own family, but supply it to his neighbors. The reason some people get along without it, is because they do not know its value, and what a vast amount of suffering it will save. Wherever it becomes known and used it is recognized as a necessity, for it is the only remedy that can always be depended upon for bowel complaints, both for children and adults. For sale by all druggists.

Ecstasy may be half the battle of life. It is not so hard to earn money as to spend it well.—Spurgeon.

Impure blood is an enemy to health and may lead to serious disease. Hood's Sarsaparilla conquers this enemy and averts danger.

Shade Furnace.

Shade Furnace, an old resident at Shade Furnace, informed me many years ago that it was built by Gershart & Reynolds under local lease from Thomas Vickroy.
