another mortally wounded, and a third escaped unhurt. Thus perished one of the kindest and the best gentleman of this or any other country whose social equalled his military virtues. To even sketch his army history would pass the limit of a general order, and it must here suffice to state that General Canby began his career us a cadet at West Point, in the summer of 1865, graduating in 1839, since which time he has continually served thirty-eight years, passing through all the grades to Major-General of volunteers and Brigadier-General of the regular army. He served his early life with marked distinction in the Florida and Mexican wars, and the outbreak of the civil war found him on duty in New Mexico, where, after the defection of his senior, he remained in command and defenddod the country successfully against a formidable inroad from the direction of Texas. Afterwards transferred to the East to a more active and important sphere, he exercised various high commands and at the close of the way was in chief command of the Military Division of the Western Mississippi in which he had received a painful wound, but had the honor to capture Mobile and compel the surronder of the robel forces of the Southwest. Since the close of the war he has repeatedly been chosen for special comraands by reason of his superior knowl-
