A Frenchman has discovered the method of taming and removing bees, and securing honey by tapping on the sides and top of the hives. We remember trying that method in youth-ful years, before we had heard of the Frenchman. We tapped on a hive belonging to an old farmer one night, and the bees came out first rate, but we did not care to stay to remove the honey somehow. It seemed to us that almost any place in the world would be desirable when compared to the vicinity of that hive. In this experiment, as in the one conducted by the Frenchman, the bees possessed all their usual activity. So did we.
