The meeting of the Return Judges will be had at the Court House on the Tuesday following, to-wit: the 18th. day of August, 1874, at 2 P. M. MILES W. TATE, Chairman,

-We take the following items from

the Clarion Democrat:

A little boy named John Crate, son of Aaron Crate, in Washington township, was kicked to death by a mute, on Friday of last week. While Mr. Crate was taking his nules to water, his little bey followed close to their heels, and one kicked him in the breast, killing him instantly.

Gen. Seth Clover, of Kansas, has been up in Forest and Elk counties for some time looking after his land in-terests. On Monday of last week he came down from Strattanville to Clarion in the hot sun, and suffered from a slight touch of sun stroke, which prostrated him for some time. He was soon able to be around again however, and exhibits all his former traits of activity and enterprise.

-A little boy, aged about four years, son of a Mr. McKenzie residing on the back street above Shirk's tanery, met with a serious accident on Wednesday evening, July 8th. A wagon, loaded with bark, had halted in the street; and, the little boy observing his deg run under the wagon collowed it unobserved by the driver, just as the latter started his horses, when a wheel passed over one of the degs of the child and smashed it very badly. The fracture was reduced, and the little fellow is doing as well as could be expected under the circumstances. - Clearfield Journal.

cious metals in the last twenty-five amounting, as we find it stated, on what we suppose to be good authority, to \$1,583,644,984, and still more emphatically the amazing probable product of the next twenty-five years, now that so many new districts are being developed, and the processes of smelting and refining are better understood, seem plainly to indicate that the national policy should be directed to the completion of the lines of railroad that travere these mineral regions, and to the construction or repudering and to the construction or rendering aid to the settlers in the construction of lateral narrow gauge railways along some of the principal valleys where rich deposits are known to exist. With a moderate amount of Government aid, the annual yield of gold and silver might be raised from the present annual average of \$60,000,000 to more than twice that aggregate, and thus contribute enormously to the national wealth and hasten the day of specie payments.

-The Count de Paris, a grandson of Louis Phillippe, has written a "History of the Civil War in America," which is now in the hands of a Paris publisher. It will be remembered that the Count was for some time a volunteer on Gen. McClellan's Staff, volunteer on Gen. McClellan's Staff, and was in the campaign of that commander from the beginning of his command until the celebrated "change of base" during the progress of which the seven days' battle occurred near Richmond. The work is highly spoken of, and will doubtless very soon make its appearance in an Euglish dress, and afford to those curious in such matters an opportunity of read. such matters an opportunity of reading the views of an European writer of high position upon our terrible conflict .- Gazette.

-Mr. Benjamin S. Vincent went over into Sugarcreek township, a few days ago to assist in driving an unruly steer which had baffled all previous attempts to get him to the slaughter-house. When Mr. Vincent began to drive him the steer rushed at him, caught bim on his horns and threw him a distance of several feet. The infurated animal then made a rush for the prostrate man. Fortunately Mr. Nims one of the owners of the steer was holding a large bull-dog in reserve. As the steer was rushing at Mr. Vincent, and was within a few feet of him the faithful dog was let loose. "Pat"—the dog—seized the animal, threw him, and saved Mr. Vincent's life. Such a dog as Pat is worth having .- Spectator.

Mode of Treatment,

Is the fruit of over twenty years of exclusive attention to Chronic affections, and an experience embracing many thousands of cases, and has been blessed in the recovery of hundreds who were deemed past hope. It consists in selecting for each case the remedial means best adapted to its cure. His patients have the benefit of every new discovery and theory of value. His remedial resources include medical inhalations both of vapor and of atomized fluids, together with tonic, cleansing and fluids, together with tonic, cleansing and regulating medicines of unsurpossed offi-caey, and hygionic and mechanical reme-dies of great value.

RESULTS OF

Dr. Sykes' Mode of Treatment. Case of S. H. Sitler, Esq.,

Of Lectonia, Ohlo, Sick Fifteen Years-Dis-

ease of the Lungs and Heart, Frequent Hemorrhages, &c., &c.

LESTONIA, Ohio, Dec., 22, 1870. DR. J. W. SYKES—BEAT SIT: I feel it my duty to make a just acknowledgment to your of the benefit I recived of your treatment from April to September, 1869. When I reserved to you I had but little hope of a recovery, as I had hemorrhage of the lungs almost daily during 22 months previous, together with an affection of the heart, so that I could not lie on my left side during a period of fifteen tion of the heart, so that I could not lie on my left side during a period of fifteen years. The cough, pain, and constant oppression of the breast made life a burden. After taking your treatment for three months, I felt a decided improvement; the hemorrhage of the lungs had ceased altogether; the oppression of the breast, cough, &c., were much better, with a decided improvement of my general health; so that I commenced the second course of three months' treatment (altogether five ments), I felt myself entirely well, could lie on either side and breathe freely. Yet I could hardly believe the cure a permanent one. But now, fifteen months manent one. But now, fifteen months have passed, and no recurrence of hemorrhages, or cough, and I have regained my former weight so that I now feel thankful to God and to you for your invaluable treatment in my case, and shall not cease to recommend others similarly afflicted to your treatment. Yours respectfully, S. H. SITLER.

The undersigned are about introducing in Western Pennsylvania the celebrated Randell Payming Milh Grain Separator and Grader Combined, which has attracted murked attention in the Western States wherever exhibited among the fariners.

As a Fanning Mill it cannot be surpassed, and it is the only real separator and grader in the U. S.

It is simple, rapid and complete, and gives you perfect control in challling, separating or grading year grain.

The use of the Randell Mill will improve the condition of your grain, enhance the price from five to fifteen cents per bushel; and tesides will largely increase the vield per acre, by the higher grade of seed you are enabled to obtain.

With the Randell Separator you can also clean your own Grass Seed, thus saving a large annual expense for grass seeds.

This mill works on an entire new principle as applied to Fauning Mills, and close its work to perfection.

Canvassers will exhibit it during the season, when you will be able to judge for your selves of its morits.

Do not buy until you see it work.

"Waters' Concerto Parlor Organ possesses a beautiful and peetifiarly and tone. The Concerto Stop is without doubt, the best ever placed in any organ. It is produced by an extra set of reeds, I peculiarly voiced, from which the effect is most charming, and its imitation of the human voice is superb. For sweetness of tone and orchestral effects it has no equal,"—N. F. Times.
