Too Great a Risk.

Admit, for the sake of argument, that the Democratic party is pure, that it is as innocent as a new-born habe, that it never stole a dollar, and never could be tempted to, that it would hang Tweed for his corruption if the Republicans had not sheltered him behind the wails of a prison; yet, with all this in its favor, we are the same of the security of liberty. And now the Irish World, always reliable as the mouth-piece of Democratic party is pure, in another column, will indicate how it has been received by the people throughout the country.

The Republican party has treated Government. Its peculiar notions of fluance, which look toward repudiation, its indifference to the protection of labor, its opposition to internal improvement, its unwillingness to accept in good faith the results of the war, and, above all these, its open sympathy with those who persecute American citizens on account of their political opinions, would make it, in our opinion, the enemy of our liberties, the stumbling block in the way of true national progress. We know what the Republican party is, what it has done, what it can do, and we are satisfied with the record. We have a safe currency, a credit equal to the best, disturb us, and, with few exceptions, peace and prosperity within our berders. What more can we ask? We have prospered as never before, and we owe a debt of gratitude to the party whose intelligence, wisdom, and

wherever exhibited among the farmers.

As a Fanning Mill it cannot be surpassed, and it is the only real separator and grader in the U. S.

It is simple, rapid and complete, and gives you perfect control in chaffling, separating or grading your grain.

The use of the Randell Mill will improve the condition of your grain, enhance the price from five to fifteen cents per inshef; and besides will largely increase the yield per acre, by the higher grade of seed you are enabled to obtain.

With the Randell Soparator you can also clean your own Grass Scod, thus eaving a large annual expense for grass seeds.

This mill works on an entire new principle as applied to Fanning Mills, and does its work to perfection.

Canvassers will exhibit it during the season, when you will be able to judge for yourselves of its merits.

Do not buy until you see it work,
