George Washington Fenton drove the ex team at Armstrong's Mill. He was a cadaverous looking individual, and he mointained the dignity of labor and he mointained the dignity of labor by as little familiarity with it as possible. He had an extensive family, and as they would eat, he had to shift somehaw to feed them. When the lacteal fluid war surreptitiously abstracted from the neighbor's kine, or sweet potatoes, and found himself mi-nus the tubers, the Fenton's were making cottage cheese or feasting on roasted Carolinas. One bright cold day Mr. Walker slaughtered a fat pig and hung it up in the smoke-house. Next morning it was gone. Walker and his son John found Featon at home, and in his wife's absence, rocking the cradle and singing: "Hush a by baby." The object of the visit was made known. Fenton, with a hemmorrhage of words, protested his innocence and bade them search the

"John can rock the cradle until we return," he said.

John scated himself at the cradle and rocked diligently. After a thorough but fruitless search, Walker returned and found John still rocking and the baby still sleeping. Fenton thanked the latter profusely for his services as nurse, and the neighbors departed. When alone Fenton executed a war dance by way of rejoiccuted a war dance by way of rejoicing. He had stolen the pig, and expecting the call, had laid the porker in the cradle as a substitute for a baby. covering it up very nicely indeed. John had quietly rocked the object of their search, while his father was seeking it. In the meantime the Fentons had reast pork and apple sauce for

The pendulum seems to have swung back again, says the New York World, John Stuart Mill, being dead, has speken of religion in a manner which has shocked those of his disciples who believed that he did not believe in God, and who accepted his supposed belief as the reason for their own infidelity. Prof. Tyndall has repudi-ated the construction universally placed upon his language at Belfast, and has declared that he did not mean to assert either that there was no God, or that God, if he existed at all, was only a molecule. Mr. Fitzjames Stephen has called especial attention to the fact that he is of the opinion that the weight of evidence is in favor of the hypothesis that there is a God. of the hypothesis that there is a God. who is very wise and exceedingly powerful, but who, in Mr. Fitzjames Stephen's belief, is not altogether be-nevalent. And to crown all, Professor Huxley, to the infinite grief of some of his former admirers, has come forward to say that he must not be numbered among "fatalistic material-istic, or atheistic philosophers."

"Everything goes wrong," says an Illinois farmer, wiping his eyes. "The grasshoppers cum, the hired mas broke his leg, wife died, the barn burned, and I've rid for three days and can't find a woman who wants to marry.

A short-horn steer was butchered in Detroit recently which weighed 4,110 pounds alve, and yielded 3,000 pounds of dressed bank. This is believed to be the largest animal ever slaughtered for beef on this continent.

Gen. Sherman says that there need be no dispute about his religious faith; for it can be given in a few words. Hays he: "I believe that if people on-ly act half as well as they know how, God will forgive the balance."

Ayer's Cherry Pectoral Almanac for 1869 contained this excellent recipe: "If you wish to run for Congress, run along; you couldn't run down hill faster." Now Dr. Ayer knows how it is himself.

Cheapness being the order of the day, a great many manufacturies make chimneys from ellicate of time, instead of from lead. The initiated may tell the different qualities of glass by ringing thom; the vibrations of the lead glass have a clear, ringing, bellike sound, possessing the requisite strength to withstand expansion and contraction, as well as the general pressure of use, and will outliest half a dozen of the lime glass chimneys.
