

The Excursion.

The excursion to Chautauqua yesterday was a success in enjoyment only, as it did not pay financially. About two hundred people were on the train, which arrived at Mayville on time, where lay the steamer Mayville waiting. All along down the lake the party kept dropping off at the different points—Lakeview getting the larger number. The day was just right for a sail and most of the excursionists availed themselves of this pleasure. Those who went on to Jamestown spent the afternoon in shopping and trying to get a little fun out of a town that feels blue, looks blue and is blue. However, those who went over to the Weeks House had rather the best of it, as a first-class meal makes even a blue town look different to a visitor.

At eight o'clock the steamer Mayville, nicely decorated with colored lanterns, left her docks with the excursionists homeward bound. The upper deck was soon monopolized by the dancers, who "chased the hours," &c., until the boat reached Mayville. On the cars and away for home—flying. Outside the night was cloudy, damp and foggy. Inside, was warm, cozy and comfortable, with an ever changing series of "pictures" with living actors for the figure pieces. To a student of nature, and cause and effect, 'twas very interesting.

All home—2, a. m.—tired, hungry and sleepy, but with the remembrance of a pleasant day.

Mr. Canfield, the manager, can extract what consolation he can from the failure of the Youngstown, O., excursion: The steamer Jamestown had been chartered to take the Youngstown fire department over the lake. The boat went to Lake View for the party, and after lying there an hour after the arrival of the train on the A. & G. W. Ry. Mr. Jones, the owner, went over to the station where he found the chief engineer of the department and one other man. To the inquiry as to the whereabouts of the excursionists the gallant chief wheeled into line with his one man, and exclaimed, "here it is." Mr. Jones immediately asked the procession to form column, which was done, and with slow and measured tread they marched to the steamer, and from there to the bar, and the excursion, parade and all, was drowned in three little glasses.

Our Piano is unsurpassed by any in the market for its rich and powerful tones, and its adaptation to the human voice in sympathetic, mellow and singing qualities. It speaks for itself.

We are willing to place it beside any other make of Piano on its merits, either in beauty of case, or excellence of tone, and "at half the money" of equally good instruments.

Price of Farms, \$25,000 per acre, payable installments, within the period of four years. In this climate, planted out to vines, 20 acres of land will count fully as much as 100 acres further north.

Persons unacquainted with fruit growing can become familiar with it in a short time on account of surroundings. Five acres, one acre, and even a lot, in the towns of Landisville and Vineland, also for sale.

Whilst visiting the Centennial Exhibition, Vineland can be visited at small expense.

A paper containing full information, will be sent upon application to CHAS. K. LANDIS, Vineland, N. J., free of cost.

The following is an extract from a description of Vineland, published in the New York Tribune, by the well-known Agriculturist, Solon Robinson: "All the farmers were of the 'well to do' sort, and some of them, who have turned their attention to fruits and market gardening, have grown rich. The soil is loam, varying from sandy to clayey, and surface gently undulating, intersected with small streams and occasional wet meadows, in which deposits of peat or muck are stored, sufficient to fertilize the whole island surface, after it has been exhausted of its natural fertility."

It is certainly one of the most extensive fertile tracts, in an almost level position, and suitable condition for pleasant farming, that we know of this side of the Western prairies. We found some of the oldest farms apparently just as profitably productive as when first cleared of forest fifty or a hundred years ago.

The geologist would soon discover the cause of this continued fertility. The whole country is a marine deposit, and all calcareous substances, generally in the form of indurated calcareous marl, showing many distinct forms of ancient shells of the tertiary formation; and this marly substance is scattered all through the soil, in a very comminuted form, and in the exact condition most easily assimilable by such plants as the farmer desires to cultivate.
