A Hippopotamus Hunt.

The hippopotamus is a large, sluggish and generally inoffensive animal. But even the mildest can be roused. A traveler on the Zambesi thus describes

a hunt of this unwieldy animal : "A shout, 'Et beggare et bahare!" (the water ox), attracted my attention. I looked around for the hippopotamus; to my surprise none was to be seen, not even the pondrous head appeared above the water; but I saw a sort of wooden cross borne down the current, as if impelled from beneath. As it passed us a pelled from beneath. As it passed us a Sheep. 6.75 @ 775 snorting was heard; a head for a moment Lambs 700 @ 900 appeared-that of a terrified young hippopotamus—but only to dive again.
The hunters soon followed. This calf
had entered a sort of creek and gone ashore. Here it was attacked in the usual way—a harpoon driven into it as, alarmed by the cries and drums, it fled to the water. Here the float, a cross of wood, not only served to guide the hunter, but increased the wound by the resistance it made against the water. Exhausted at last by the loss of blood, it halts near the shore to die, and is then killed by the pursuers.

"The hunters were keenly after it; but they had not noticed that they were in turn pursued by the furious dam of of the poor wounded creature. At last, exerting all her energies, she shot for-ward, and seizing the front of the pirogue in her capacious jaws, ground it, crushit in two, and hurling the hunters into the water. Yells and shouts, cries of distress and prayers to all their gods followed, as the brute bore down on the necklace costing \$50,000.

The Influence of Malaria Counteracted. That the harmful influence upon the human system of malaria may be effectually counteracted has been demonstrated for years past by the protection afforded the inhabitants of vast miasma-breeding districts in North and South America, Guatemala, Mexico and the West Indies by Hostetter's Stomach Bitters. Used as a preventive, they have invariably been found to be a most reliable safeguard against chills and fever, bilious remittents, and still more malignant types of malarious disease, and when employed as a remedy have always proved their adequacy to the task of eradicating such malaries from the system. For dising such maladies from the system. For dis-orders of the stomach," liver and bowels, which in hot climates and miasmatic localities are par-ticularly rife, the Bitters are a prompt and thorough remedy. They also strengthen the system, tranquilize the nerves, promote diges-ticuland sound sleep, and impart unwonted
