Prince Auersperg, president of the Austrian council of ministers, has defined Austria's position in the Eastern crisis as follows: "Anstria was bound to declare generally that it could not regard some of the peace stipula-tions as consonant with the interests of the monarchy. The reservation did not apply to the amelioration of the condition of the Chris-tians, but to such provisions as might involve tians, but to such provisions as might involve alteration of the balance of power in the East to the detriment of Austris. The government confidently hopes that the European council will reach an understanding and a solution satisfactory to all. In any case the government, in the present grave circumstances, would consider it its duty and mission to secure due recognition of the political and mat rial interests and dignity of the monarchy."

The London Times, in an editorial article, anys: "It is stated, on authority which cannot be questioned, that 70,000,000 of human beings are now starving in the famine-stricken pro-vinces of north China. The imagination fails to cope with so gigantic a calamity."

to cope with so gigantic a calamity." The conclave in Rome, at which sixty-one cardinals assisted, concluded its labors in the selection of Cardinal Gioachino Pecci as Pope after the third hallot. The new Pope has chosen the title of Leo XIII. The conclave lasted forty hours, being twelve hours shorter than that which elected Puus IX., his prede-cessor. From the moment the conclave had gone into session the cutside world was busy watching for the signs of progress made. This is achieved by watching a particular chimney. Through this comes the smoke of burning bal-ots, which declares that a Pope has not been

ots, which declares that a Pope has not been elected, as when a Pope is chosen by vote the ballots are burned in another place, Cardinal Pecci lacked at the third ballot only five votes of the requisite two-thirds. Thereupon Cardi-nal Franchi, and those holding the same views, advanced and knelt before him. Other cardi-nals followed this example, and Cardinal Pecci was thus elected by the method known as "by adoration." The new Pope was born in Italy, March 2, 1810, and previous to his election to the Paper, was known as archibiahon of Paots, which declares that a Pope has not been the Papacy, was known as archbishop of Pe-rouse and Papal Chamberlain. He was one of the two candidates of the moderate party among the cardinals, and is described as a man of ability, tact. and moderation of views. In ap-pearance he is tall, with a high forehead long face, straight features, prominent chin and a cheerful, open countenance.

The Crisis. What think you would be the result if the earth should s op spinning around the sun? earth should s op spinning around the sun? Were you ever near a large and intricate ma-chine when one of its wheels became clogged or broken- near enough to hear the grating, jarring clash, the sudden, desfening crash? Astronomers assure us that precisely similar effects, only on an inconceivably grander scale would be produced if our earth-one of the wheels in the universe-machine -should sud-denly cease its revolutions. In other words there would be a general clash and crash of satellites, planets, and systems What we term satellites, planets, and systems What we term financial crises are due to similar causes. One of the wheels in the finance-machine becomes clogged perhaps shattered. The terrible wall street " crash " which follows is communicated to every part of the financial mechanism of the country. But analogies do not stop here. There is that other mechanism, the most intri-cate of all - sometimes called an organism because it generates its own forces—the human maching. When one of its members fails to perform its office, the whole system is thrown into disorder. Members before considered unassailable, break down under the unnatural pressure The shock comes, and utter pros-tration is the result. Reparation can only be effected by the restoration of the impaired enceted by the restoration of the impaired parts and the re-adjustment of its levers, - the physical forces. There is one part of the ma-chine more liable to disorder than any other. --the liver, - the great balance wheel of the ma-chine. The liver b ing the great depurating or blood-cleansing organ of the system, set it at work and the fonl corruptions which gen-der in the blood and uct out as it more the der in the blood, and rot out, as it were, the machinery of life, are gradually expelled from the system. For this purpose Dr. Pierce's Golden Medical Discovery, used daily, and Dr. Pierce's Pleasant Purgative Fellets, taken in very small doses, are pre-eminently the articles meeded. They are are pre-eminently the articles needed. They cure every kind of humor from the worst scrofula to the common pimple, blotch, or eruption. Great eating ulcers kindly heal under their mighty curative influ-ence. Virulent blood poisons that lurk in the system are by them robbed of their terrors. and by their persevering and somewhat pro-tracted use the most tainted systems may be completely renovated and built up anew. En-larged glands, tumors and swellings dwindle away and di-appear under the influence of these great resolvents. Achieg Heads and Uneasy Nerves Are often southed by Hostetter's Stomach Bitters, because that searching corrective com-pletely removes the causes of brain and nerve excitement, which are to be found in derange-ment of the storage and of its execution ment of the stomach, and of its associate or-gans, the fiver and bowels. It is a truth which cannot be too earnestly insisted upon, that the effect of micre sedatives and narcotics, like bromide of p tassium, valerian, chloral hy-drate and opium, is less appreciable the longer they are used, and that they can never permi-neutly relieve nervons excitability, because because they cannot remedy the weakness and organic derangement which lies at its roots. Hostetter's Bitters, however, can and does oure ner-vous maladies, for the reason already stated.
