Some time ago Mr. Robert Williams, near this place, says the Owen (III.) News, heard one of his wife's ducks making a noise as if something were after it; he got out of bed and went to where she was, but could not see or hear anything. He told his wife he guessed the duck had gone crazy. Next morning he went to where the old duck was sitting upon her eggs, under a brush pile, and-imagine his astonishment-he saw a large black snake coiled up under the duck, his snakeship having swallowed twelve eggs. Mr. Williams cut his head off, cut it open, took the eggs and placed them under the duck, and eleven of that dozen eggs hatched. Mr. Williams' word is as good as his bond.

still an open one, and demands of the people a care ul consideration. The salient points may be briefly stated, and answered as follows : 1st-Are the sick capable of determining their real condition, the nature of their malady, and selecting the proper remedy or means of cure? 2d-Can a physician no matter how skillful, prepare a universal remedy, adapted to the peculiar ailments of a large class of people, residing in different latitudes, and subject to various climatic influences? In answer to the first proposition, we would say, diseases are named and known by certain "signs" or symptoms, and, as the mother does not need a physician to tell her that her child has the physician to tell her that her child has the whooping cough, or indicate a remedy, so peo-ple when afflicted with many of the symptons concomitant to "impure blood," "torpid liver," and "bad digestion," require no other knowledge of their condition, or the remedy indicated than they already possess. Second proposition—Many physicians argue that dis-eases are sectionally peculiar, and that treat-ment must therefore vary, and yet quinine, morphine, podophyllin, and hundreds of other remedies are prescribed in all contries to over-come certain conditions. Is it not therefore, self-evident that a physician whose large ex-perience has made him familiar with the many phases incident to all impurities of the blood, general and nervous debility, liver complaint, dyspepsia, consumption, and catarrh, can pre-pare a series of remedies exactly adapted to meet the conditions manifest, wherever, and by whatever means, it may have been engen-dered? The family modelines presented is premeet the conditions manifest, wherever, and by whatever means, it may have been engen-dered? The family medicines prepared by R. V. Pierce, M. D., of Buffalo, N. Y., fulfill the above requirements, Many physicianes pre-scribe them in their practice. His Golden Medical Discovery has no equal as a blood purifyer and general tonic, while his Favorite Prescription cures those weaknesses peculiar to women after physicians have failed. His Pleasant Purgative Pollets, which are sugar-coated and little larger than mustard seeds, are a safe and certain cure for "torpid" liver and constipation. Encouragement for the Feeble. Debility, whether it be inherent, or caused by overtaxed strength or protracted illness, has a most depressing influence upon the mind, breeding an abject melancholy nearly akin to breeding an abject melancholy nearly akin to despair, and enforcing the abandonment of cherished projects and high hopes. Happily, the enfeebled system, even in extreme cases, is susceptible of invigoration. It is proved by incontrovertible evidence that Hostetter's Stomach Bitters is an unfailing strengthener of the weak, and that, in addition to vitalizing the physical organization, it establishes regu-lacity among those organs upon whose efficient discharge of the duties imposed on them by naturo, continued vigor and health depend. Thousands of instances might be cited to show the regenerating influence of this health-giv-ing agent in cases of debility, liver disease, dys-pepsia, nervous ailments, constipation, interpepsia, nervous ailments, constipation, inter-mittent fever, urinary and uterine troubles, gout and rheumatism, and other maladies.
