The Best Remedy Known to Man I Dr. Clark Johnson having associated himself with Mr. Kawin Kastman, an escaped captive, long a slave to Wakametkla, the medicine man of the Comanches, is now prepared to lend his aid in the introduction of the wonderful remedy of that tribe. The experience of Mr. Eastman being similar to that of Mrs. Chas. Jones and son, of Washington Ca., Iowa, an account of whose sufferings were thrillingly narrated in the New Fork Heraid of Dec. 15th, 1878, the facts of which are so widely known, and so nearly parallel, that but little mention of Mr. Eastman's experiences will be given here. They are, however, published in a neat volume of 300 pages, entitled, "Seven and Nino Years Among the Comanches and Apaches," of which mention will be made hereafter. Buffice it to say, that for several years, Mr. Eastman, while a captive, was compolied to gather the roots, gums, barks, herbs and berries of which Wakametkla's medicine was made, and is atill prepared to provide the saxs materials for the successful introduction of the medicine to the world; and assures the public that the remedy is the same now at when Wakametkla compelled him to make it. The Best Remedy Known to Man

Wakametkla, the Medicine Man Nothing has been added to the medicine and othing has been taken away. It is without doubt he liber Penerica of the Blood and Renewed of he System ever known to man.

This Syrup possesses varied properties.

Stacts upon the Liver.
It acts upon the Kidneys.

What the Anti-Vaccinationists Allege. It is charged in these statements: 1. That several terrible diseases, such as syphilis, cancer, consumption and scrofulous diseases generally are widely scattered and communicated by vacci-nation. One vaccinator of twelve years' experience is made to say, "If I had the desire to describe one-third of the victims ruined by vaccination, the blood would stand still in your veins."
Another, "I have seen hundreds of children killed by it." A medical journal is quoted as saying that consumption has widely expend that the interest. has widely spread since the introduction of vaccination; which is very likely also true as regards lawn-mowers and pedestrian matches. A physician to the London Cancer hospital declares that many of the cases of cancer treated at that institution originated with vaccination! A physician testifies before a parliamentary committee that eleven out of thirteen children whom he had vaccinated became syphilitic. Another declares that a large proportion of apparently inherited syphilis is really imparted through vaccination. A large number of cases of various kinds are cited with full and harrowing details, some of which have been subjects of discussion in medical circles during the past twelve or fourteen years. 2. An Absent-Minded Senator.

Ex-Senator Goldthwaite, of Alabama was noted for his extreme absent-mindedness, and he was occasionally seen running about the Senate trying to get out and not able to find the door. He would have half the page boys in the Senate looking for his hat or cape, which would be all the while firmly clasped in his hand. He was much giving to walking up and down the lobby, plunged in deep thought, often smoking a fragrant Havana, and entirely oblivious of all things around him. Often some cheeky page of the Senate would walk up and ask the Senator for a light. Mr. Goldth-waite would mechanically hand over his cigar, the boy would take a light, put the choice weed in his precious mouth, and hand over his old stump to the old gentieman, who would continue his stroll in blissful ignorance. It is related on good authority that, in one of his fits of abstraction, he walked into the Senate elevator, dropped a nickel into the hole back of the mirror, and calmly requested to be let out at H street.—

Household Perils.

Under this head the Boston Journal of Chemistry names several dangerous substances which find their way into house-There are two or three volatile liquids used in families which are particularly dangerous, and must be employed, if at all, with special care. Benzine, ether, and strong ammonia constitute this class of agents. The two first named liquids are employed in cleansing gloves and other wearing apparel, and in removing oil stains from carpets, cur-tains, etc. The liquids are highly vola-tile, and flash into vapor so soon as the cork of the vial containing them is removed. Their vapors are very combusti-ble, and will inflame at long distances from ignited candles or gas flames, and consequently they should never be used in the evening when the house is lighted. Explosions of a very danger-ous nature will occur if the vapor of these liquids is permitted to escape into a room in considerable quantity. In view of the great hazard of handling these liquids, cautious housekeepers will not allow them to be brought into their dwellings, and this course is conmend-As regards ammonia, or water of am-

monia, it is a very powerful agent, especially the stronger kinds sold by druggists. An incident in its use has recently come under our notice, in which a young lady lost her life from taking a few drops through mistake. Breathing the gas under certain circumstances causes serious harm to the lungs and membranes of the mouth and nose. It is an agent much used at the present time for cleansing purposes, and it is unobjec-tionable if proper care is used in its employment. The vials holding it should be kept apart from others containing

medicines, etc., and rubber stoppers to the vials should be used.

Oxalic acid is considerably employed in families for cleaning brass and copper utensils. This substance is highly poi-sonous, and must be kept and used with great caution. In crystalline structure it closely resembles sulphate of mag-nesia or Epsom salts, and therefore fre-quent mistakes are made and lives lost. Every agent which goes into families among inexperienced persons should be kept in a safe place, and labeled prop-rly and used with care.

Virtue is the safest helmet-the most secure defense.

About Rubber Boots.

Undue competition between manufacturers has led to an extent of adulteration and cheapening of material never before known in the business. Crude rubber has the quality of absorbing or of becoming incorporated with a very large quantity of cheap and bulk; substances like lampblack, chalk, etc., which cannot be detected by the uninitiated, and which impair the durability of the goods. People call for low-priced goods, not reficcting that low prices always means low quality. The result is they waste money on "wild cat" rubber boots, when an extra dollar or two would buy them a pair which will wear to their utmost satisfaction a whole season or more. The "95 Per Cent. Sterling Rubber Boot," manufactured by the Candee Rubber Co., New Haven, Conn., is meant to reform this abuse, and is well worth the inspection of those who need a real good article. Every store dealing in the "95 Per Cent. Sterling Rubber Boots," is supplied with a sample cut open to show the construction. They are warranted three months, and the storekeeper will punch the date of sale in the top of the leg of each boot.

No failures are recorded of the famous outward specific, Henry's Carbolic Salve. It is invariably successful in healing sores, curing cruptions, removing proud firsh and over-coming suppuration and inflammation. These sanative results it accomplishes without leaving any scar or discoloration of the skin. As a local application for chronic rheumatism, sore throat and tightness of the chest, it is also highly spoken of. Sold by all druggists.
