# JOHNSON'S **NDIAN BLOOD SYRUP** Laboratory, 77 W. 3d St., New York City, LATE OF JERSEY CITY. EURES SERCEDEA RAD SKIN DISEASES. CURES [ TRADE MARE.]

The Best Remedy Known to Man I The Clark Johnson having associated himself with Mr. Rawin Rastman, an escaped captive, long the second second second second second second to be a second second second second second second to the wonderful remedy of that tribe. The experience of Mr. Eastman being similar to the tribund of the wonderful remedy of that tribe. The experience of Mr. Eastman being similar to the tribund of the wonderful remedy of that tribe. The experience of Mr. Eastman being similar to the tribund of the wonderful remedy of that tribe. The experience of Mr. Eastman being similar to the tribund of the wonderful remedy of that tribe. The experience of Mr. Eastman being similar to the tribund of the tribund of which are no widely have and so nearly parallel, that but little men-ted of Mr. Eastman's experiences will be given be the tribund of the wonderful remedy in the Years the tribund will be made hereafter. Suffice it to say, the tribund will be made hereafter. Suffice it to say, which a was compelled to gather the roots, guint be same made, and is still prepared to just the the medicine to the world; and assure which is the remedy is the same now as the Weak methic compelled have to make it. The Best Remedy Known to Man !

Wakametkla, the Medicine Man Nothing has been added to the medicine and othing has been taken away. It is without doubt he BEST PURIFIER of the BLOOD and RENEWER of e System over known to man. This Syrap possesses varied properties.

At acts upon the Liver. It acts upon the Kidneys. It regulates the Bowels. It purifies the Blood. It purifies the Blood. It promotes Digestion. It nourishes, Strengthens and Invig-vates.

It carries of the old blood and makes

New. It opens the pores of the skin, and induces Mealthy Perspiration.

It neutralizes the hereditary taint, or poison ir the blood, which generates Scrofula, Erysipelas, and all manner of skin diseases and internal humors. There are no spirite employed in its manufacture, and it can be taken by the most delicate babe, or by the aged and feeble, care only being required st distorters. tration to directions.

# Shooting Alligators in Florida.

A Savosota (Fla.) correspondent of the Louisville Courier-Journal writes: About a mile below where we first came upon the creek, and two miles from where it empties into the bay, we reached tide water, and Jack told us to look out now for gators. Sure enough, we saw two monster old saurians lying out on the bank sunning themselves. They took the alarm, however, while we were yet a long way off, and plunged into the water. As we neared the spot we saw several others swimming in different directions in the same hole. They all disappeared when they saw us, so we laid down our luggage and sat in the shade of a tree to await results. In a few minutes one stuck his head out of the water not more than thirty yards away, whereupon Capt. S. gave him a charge of buckshot in the vicinity of the eye and ear. He lashed the water into a foam in his gyrations and sank out of sight, probab'y mortally wounded. Presently another one put his eye out of the water to look at us. He was near the opposite shore, perhaps fifty yards from where we sat. I let go at him, and although I scored a palpable hit, did not kill him. A 'gator always tells you, unerringly, whether you have killed or only wounded him. If wounded, he plunges and thrashes around at a lively rate for a few seconds and sinks out of sight, but if killed dead. he performs about the same series of evolutions, turns on his back and dies, remaining on the top of the water. This is the time to go for him if you wish to capture him, for he only lies on the top of the water fifteen to thirty minutes, when the air escapes from the lungs, and he sinks. It is very difficult, indeed, to kill them on dry land, nowadays, for they are shot at so much that they are exceedingly wild. But whenever you flush one from the bank and he goes into the water, sit down and rest, and you may depend upon it you will have to wait but a few minutes before he will put his large black eyes out of the water and look around to see if you are still there; then you have a fine target for your rifle. The smoke had scarcely cleared away after my last shot, when a third 'gator looked up near us and instantly caught a right-fielder in his optic that turned him over. We then supposed we had made it so warm for them that no others would show themdown the stream. The captain and I had gone a little ahead, and Jack, who had not yet started, called to us and said, "Here's another 'gator!" I went back, and there, sure enough, was an old fellow, swimming along down the creek as unconcernedly as though he had never heard the report of a gun in his life. I waited until he came within about fifty feet of me, and then gave him one in the leeward eye. He turned two or three sommersaults, and stopped

on his back with one forefoot sticking out of the water. We left him there as a warning to his kind not to tempt the deadly accuracy of a Stevens rifle. As we were now thoroughly sated with this class of sport, we returned home.

# Parboiling Themselves.

The Huntsville (Ala.) Independent of the losses of Gloucester have been-The Huntsvine (Ala.) Independent of a recent issue says: One of the most sickening affairs, if, indeed, it is not the most horrible, which it has ever been our duty to chronicle, happened last Saturday on the premises of Mr. Solon Kelley, about eight miles from Hunts-ville. There was a hog killing in progress, and two colored men, Robert and Dennis Patrick, brothers, got into a dispute about each other's share in the year's crop. A long kettle filled with water was near by. The water in the kettle had been heated to such a high degree that they were waiting for it to cool a little in order to scald hogs in it. The water was so hot that they were afraid it would "set" the hair of the hogs. This was the high temperature hogs. This was the high temperature bealthful repose. Its ingredients are safe, and of the water when the brothers began to its credentials, which consist in the hearty quarrel. Dennis, who was the oldest, told Robert that he would put him in the kettle if he didn't shut up, and Robert, the preacher brother, told Dennis that if he put him (Robert) in the water he (Dennis) would have to go with him. Dennis caught Robert and pressed him back in the direction of the kettle. He pressed him, both of them having their arms locked meanwhile, until they both went headlong into the the papers. I'm thinking they must be cheap kettle of seething water. Their pitcous and awful screams and moans soon atracted others to the place, who finally extricated them from the boiling cauldron. They retained their senses when first taken out, and their intense agonies were simply beyond description. They at once complained of their hot clothes, and when these were taken from their limbs, great flakes of boiled flesh went with them, leaving their bones exposed. Their beards fell out and their hair dropped from their heads. They had with them, leaving their bones exposed. Their beards fell out and their hair dropped from their heads. They had literally been cooked alive. The sight was such that those who witnessed it were well-nigh paralyzed with borror. All possible measures of relief were tried during the night, but Robert died next day and Dennis died on Monday.

# Celluloid.

Celluloid is one of the most remarkable of modern inventions, and bids fair to be not less extensively or variously to be not less extensively or variously used than vulcanized rubber. It is pro-duced, says the *Journal of Industry*, by mixing gum camphor with a pulp of gun-cotton, and subjecting the combi-nation to a high degree of pressure and heat. The result is a hard product of extraordinary toughness and elasticity. It can be made plastic again and molded into any required form. Any color can be given to it by the use of coloring matter during the process of manufac-ture. The uses to which celluloid is put are numerous, and are constantly increasing. It is extensively used as a substitute for ivory, which it resembles to closely that it is sometimes difficult to detect the difference. It is said to equal ivory in strength and durability, and not to warp or discolor with time. It has proved a good material for piano and organ keys, billiard balls, backs of brushes, looking-glass frames, handles for knives, forks, umbrellas d many other articles. It is much e per than ivory, and is claimed to be better for decorative purposes. It is also used with much success to imitate tortoiseshell, malachite, amber, pink coral and other costly materials. In imitation of tortoise-shell, it is made into combs, napkin-rings, match-boxes, card-cases, etc. Imitations of pink coral jewelry are made and sold at prices much below those of the genuine The same is true of imitations of malachite and amber. Mouth-pieces for pipes, cigar-holders, etc., are common. It is also used as a substitute tor porcelain in making dolls' heads. The frames of eye-glasses, opera-glasses and spectacles are made of it. More recently it has come into use in combination with linen, cotton or paper, for shirt bosoms, cuffs and collars. The material has a hard, glistening surface, like that of newly-laundried linen; is elastic and impervious to mois ture, and when soiled can be renovated with a moistened sponge.

### The World's Telegraphs.

The system of telegraphs in Europe comprised, at the end of 1877, 268,809 miles of lines and 769,768 miles of wire. There were 19,627 government telegraph stations. The number of employees amounted to 61,974, and the number of instruments to 41,708. The number of paid messages was in round numbers 86,000,000, of which 20.000,000 were international dispatches. The number of other telegrams forwarded amounted to about 7,000,000, M. Newman Spallart gives the following statistics for the other parts of the world: In America (1875 to 1877), 114,157 miles of wire: 8 756 stations; 23,000 000 telegrams. In Asia (1875 to 1876), 24,521 miles of wire; 489 stations; 2.300,000 telegrams. Australia (1875), 23,582 miles of wire; 689 stations; 2.500,000 telegrams. Africa (1874 to 1876), 8,148 miles of wire; 196 stations; 1,200,000 telegrams.

Gloucester, Mass., is a town of widows and orphans-a place of sighs and tears. Last year the sea swallowed up thirty of its vessels and 240 lives; and those .240 deaths made thirty-eight widows and 219 orphans. Since the year 1830

 over the dry and desert places. The seeds grow in a round case, shaped like a daridelion's seed-bead, but much stronger and larger, being as big as a child's head. When they are ready to messate and diseases of the ear and can be beause of seeds grow the boxes of seeds grow to seed the seeds of the ear and can be beause of the ear and can be boxes of seeds grow to seed the ear and can be beause of the ear and can be boxes of seeds grow to seed the ear and can be boxes of seeds and the seeds of the ear and can be boxes of seeds and the seeds of the ear and can be boxes of seeds are beaused.

grow, the boxes of seeds get loose from the stalks, and the first strong breeze starts them off on the sand. Away they go like balls, scattering the ripe seeds on their path for miles, and wherever a seed falls it takes root and grows. the ball comes to water, it is so light that it flor ts easily, while the wind still carries it on. In this way the seeds are carried to the most barren shores, and begin the work of covering them with green. This curious plant is the water pink, called by the natives "The Great Beard of Rama."

> Long black kid gloves with a bracelet of small yellow rosebuds at the top is one of the caprices of semi-dress toilets. For a debutante to wear with white and blue tollet, white undressed kid gloves had a band of tiny blue forget-me-nots forming a bracelet at the top of each just below the elbow.

Within the last ten years thirty-tour steamships have sailed which have foundered, or been abandoned, or are missing with all on board. This does not include the steamships lost by collision or fire, or by wreck on the coast.

### A Funny Mistake.

The other day an old country woman drove up in her wagon to a well-known shoe store, and entering the same, thus accosted the nrbane proprietor: "I want to see them 'ere 'Ninety-five' Rubber Boots advertised in all at ninety-five cents, and I'll just take "home two pair to the old man."

It was difficult at first to convince the old ady that the figures '95' referred to quality, not price, and that the boots were 95 per cent. sterling pure; but when she was shown a sample cut open to display the interior, and snw that the soles were half an inch thick of solid rubber, and that the upper and legs were double thick, she was contented to pay, not storekeeper punched the date of sale the logs so as to fix the expiration of the three months' warrant, and assured her in case they did not stand the warrant, he would give a new pair free of charge.

There is nothing to cleanse an impure circulation or wake up a dormant liver like Sco-vill's Blood and Liver Syrup. It does the business thoroughly in either case, promoting active bilious secretion, restoring to the life current the purity of perfect health and removing from the cuticle disfiguring eruptions and sores. Chronic rhoumation and gout also succumb to its curative influence. For the liseases peculiar to the gentlev sex it is a cap-

Dr. C. E. Shoemaker, of Reading, Pa., is the only aural surgeon in the United States who devotes all his time to the treatment of dealness and diseases of the ear and catarrh; es pecially running ear.
