

DR. CLARK'S
JOHNSON'S
Indian Blood Syrup.

LABORATORY,
77 W. 3d St., New York City

TRADE MARK

CURES Dyspepsia, Liver Diseases, Fever & Ague, Rheumatism, Dropsy, Heart Disease, Biliousness, Nervous Debility, etc.

The Best REMEDY KNOWN to Man!
70,000 AGENTS HAVE SOLD SINCE 1870
9,000,000 Bottles.

This Syrup Possesses Varied Properties.
It stimulates the *Præputia* in the Saliva, which converts the starch and sugar of the food into glucose. A deficiency in *Præputia* causes Wind and Souring of the food in the stomach. If the medicine is taken immediately after eating the fermentation of food is prevented.

It acts upon the Liver.
It acts upon the Kidneys.
It regulates the Bowels.
It purifies the Blood.
It quiets the Nervous System.
It promotes Digestion.
It nourishes, strengthens and invigorates.
It carries off the Old Blood and makes new.
It opens the pores of the skin and induces Healthy Perspiration.

It neutralizes the hereditary taint, or poison in the blood, which generates Scrofula, Erysipelas, and all forms of skin diseases and internal humors.

There are no spirits employed in its manufacture, and it can be taken by the most delicate babe, or by the aged and feeble, care only being taken in attention to directions.

PRICE OF LARGE BOTTLES, \$1.00
PRICE OF SMALL BOTTLES, 50

Read the VOLUNTARY TESTIMONIALS of Persons who have been CURED by the use of the BLOOD PURIFIER.

FOR THE FAIR SEX.
A Leap Year Proposal.

Pray, gentle being, give me heed,
As kneeling humbly at thy side,
With lacerated heart I plead
That thou'lt become my blushing bride.
I long—I wildly long to press
Thee to my heart, yet stand aghast—
I pine to print a fond caress
Upon thy meek and mild mastoche.

Why, tell me why thine eyelids drop
And turn away so piteously,
And why with fierce, tumultuous flop
Thy bosom heaves coquetishly?
I know that thou art young and fair
As tiny buds in early spring—
But thou shalt be my constant care,
Thou frail and fragile little thing.

I'll sew thy shirts and darn thy hose,
Thy victuals cook, thy fires will light—
I'll grease thy gracious Grecian nose
Each snowy, crumpled, wintry night.
So, surely, thou'lt not tell me nay
And bid me dying quit thy side—
Brace up, pull down thy vest and say
That thou wilt be my blushing bride.

—Kansas City Times.

Fashion Notes.

In both evening and walking dresses any and every combination of colors and materials that does not conflict with artistic requirements is admissible. Black or iridescent beads and appliques of silk and velvet are largely employed upon silk, satin and cashmere fabrics.

Short shoulder capes of material resembling the dress or harmonizing with it are talked about as a feature of walking suits.

The close-fitting bonnet is prominent among a variety of fashionable shapes. Turbans are popular for young ladies. Instead of fancy plunage, flowers appear upon latest bonnets. Just at present the sunflower is much employed, and large clusters of roses and peonies in rich but subdued colors are in favor.

Laces for neckwear consist almost entirely of the popular Breton and Languedoc, and cream tints and very deep yellow are shades much admired. The fichu has usually a narrow center of mull or net edged on both sides with full ruffles of lace. It is drawn up closely about the neck and takes the place of collar and bow. It may be fastened in front with a pretty oblong pin or small bows of ribbon. Spanish lace is most fashionable for veils, scarfs and the like.

Purple in all its shades, from the darkest violet to the palest lilac, stands in the front rank this spring. Among them the newest and most fashionable is the heliotrope, a reddish shade, which is exactly that of the heliotrope blossom when full blown. Other purples are in grayish-red tints, suggesting raspberry cream.

Most of the new spring dresses are made with a basque bodice and double skirt. The panier arrangement does not seem to be gaining much ground; some dresses are trimmed about the hips, but not in a very bouffant manner. At the back the skirt is always draped up more or less, but lower than was formerly the case. If there be but a single skirt, it is trimmed at tablier in front, with panels at the sides and some sort of tournure and drapery at the back. Combinations of two materials, one plain, one figured, are still very fashionable; indeed, very few spring costumes are made of but one fabric, and in many of them there are as many as three or four.

A great many plain skirts are seen of corduroy or velvet for walking dresses. Over these the overskirt is simply draped and is generally of light cloth or camel's hair, finished with machine stitching on the edges.

News and Notes for Women.

A recent evening toilette in New York was decked with thirty birds.

Adelina Patti gets seven dollars a minute in opera.

Women convicts in the Kentucky penitentiary are dressed in pantafoons.

Donna Francesca, Garibaldi's new wife, was the nurse of his grandchildren.

A blind girl has outranked all her seeing competitors in the Portland, Me., high school.

Mead, the sculptor's wife, is a beautiful Italian lady with whom he could not at first talk.

Mrs. Southworth says she began to write from necessity, and continued from the love of it.

Mrs. Alex. Agassiz pays from her own pocket the most of the expenses of the Harvard museum of zoology.

A New York engraver got out cards in these words: "Mr. and Mrs. request your presents at the marriage of their daughter."

Many a man who has been a negligent husband decorates his dead wife's grave with flowers. Why not take the bouquets home beforehand?

Miss Charlotte A. Scott, of Girton college, Cambridge, daughter of Rev. Principal Scott, of Lancashire Independent college, has obtained the position of "equal to the eighth wrangler" in the Mathematical Tripos at Cambridge. The highest place hitherto won by any lady has been among the senior optimes—i. e., second class. Miss Scott's achievement is the most remarkable on record in the annals of female education in England.

A Mining Expert's Terrible Experience.

Nearly a week since Louis Blanding, one of the best known mining experts on the coast, passed through this city on his way from San Francisco to examine the Santa Anita quartz mine, which is situated near Washington, twenty-one miles above here. Day before yesterday he returned here, having accomplished his object. His experiences on the trip were of an interesting nature, and it is by mere chance that he was enabled to live and relate them. After a tedious journey through the snow he reached the home of one of the owners of the claim, and together they forced their way for three miles further to the mine. Lighting candles they entered the tunnel, which has been pushed toward the heart of the mountain a distance of 130 feet. Twenty-five feet from the head of it they came to a winze fifty feet deep. Over this winze is a windlass. Mr. Blanding examined it carefully, and observing no weak spots in its construction, had his companion let him to the bottom. He inspected the ledge, made measurements, secured a sack of specimens, and

putting one foot in the bight of the rope, shouted to the man above to hoist away. After ascending thirty feet he ceased to rise.

"What's the matter?" he asked.

"The windlass is broken," was the reply.

"Fix it and hoist away."

"I can't. The support at one side is broken down. One end of the drum has dropped to the ground. My shoulder is under it, and if I stir the whole thing will give way." The candle at the top had been extinguished. Mr. Blanding recognized the urgency of having a cool head in such an emergency, and told the other party to take things easy. He dropped the candlestick, sack of specimens and the hammer to the bottom of the winze. Then bracing one of his shoulders against one side of the hole and his feet against the other, worked his way up inch by inch, the owner taking in the slack of the rope with one hand. Thus he ascended ten feet. Then the sides of the winze gave way, and that this man could no longer be pursued. There was but one salvation. The remaining ten feet must be climbed "hand over hand." Releasing his feet from the knot, he put the idea into practice. Exhausted by his previous efforts, in walking to the mine and exploring it, it seemed to him he had climbed a mile, and stopping to rest, found by the voice that he had yet five feet to go. With another superhuman effort, another start was made. After what seemed an age, one of his hands struck the edge of the covering on one side of the mouth. His body and limbs were suffering the agonies of cramps and soreness, and his brain began to reel. All sorts of frightful phantoms filled his mind. With a final effort he reached up and found he could get the ends of one hand's fingers over the edge of a board that answered for part of the covering. With the despair of a man who faces a fearful death and knows it, he let go the rope altogether, and raising the other hand obtained a precarious hold. His body swung back and forth over the dark abyss an instant, and as he felt that his hands were losing their hold, he cried, "Save me quick, I am going!"

Just then his companion, who is a man of great strength, dropped the end of the drum, and grasping his coat collar, drew him out on the floor of the tunnel.

The mining expert was utterly prostrated as his rescue was effected. He was carried out of the tunnel, his clothes wet with perspiration, and laid in the snow. When partially recovered he was assisted to a house three miles away. His whole frame was so racked with the physical and mental torture, that for several hours he had no use of some of his limbs. Two days after he returned to the mine and with an iron bar broke the windlass into 1,000 pieces, then fished the sack of specimens out of the winze. During a whole lifetime of mining adventures in some of the deepest claims of the world, he says he has never been so near the door of death as he was at the Santa Anita, and he hopes never to pass through the like again.—Nevada Transcript.

Going to Siberia.

The czar of all the Russias has an immense country where he sends his criminals, and he punishes for very slight offenses, so he has many people to send. These convicts leave St. Petersburg at night, the men having their hands chained behind them, and wearing leg chains of four pounds weight all the way. The women go in gangs by themselves, wearing black cloaks with hoods. The men who conduct them to this desolate land are mounted on horses, and have long whips which they use for the least provocation. Once there, they work year after year in the mines, never seeing the light of day. They sleep in recesses hewn out of the rocks, into which they creep on their hands and knees. They work Sunday the same as any other day. No man who has worked in the mines is ever allowed to return home. When he has lost the use of his limbs, which happens in a few years, he is hauled up to die in the poor-house.

It is not necessary that it should be frozen for the sailor to take a bight of the sea in his course, when he is hungry for the shore.—American Pouch.

Druggists' Testimony.

Dr. H. R. STEVENS: Dear Sir—I feel very grateful for what your valuable medicine, VEGETINE, has done in my family. I wish to express my thanks by informing you of the wonderful cure of my son; also to let you know that VEGETINE is the best medicine I ever saw for Chills, Shakes, Fever and Ague. My son was sick with malaria in 1874, which left him with the joints diseased. He suffered a great deal of pain, all of the time; the pain was so great he did not sleep a day. The doctors used to give him medicine; he could not lift his foot from the floor; he could not move without crutches. I read your advertisement in the "Louisville Courier-Journal," that VEGETINE was a great Blood Purifier and Blood Food. I tried one bottle, which was a great benefit. He kept on with the medicine, gradually gaining strength. He has taken eight bottles in all, and he is completely restored to health, walks without crutches or cane. He is twenty years of age. I have a younger son fifteen years of age, who is subject to the same disease. Whenever he feels anything on, he comes in, takes a dose of VEGETINE and that is the last of the chill. VEGETINE leaves no bad effect upon the system like most of the medicines recommended for Chills. I cheerfully recommend VEGETINE for such complaints. I think it is the greatest medicine of the world.

Respectfully,
Mrs. J. W. LLOYD.

VEGETINE—When the blood becomes lifeless and stagnant, either from change of weather or of climate, or from excessive irregular diet, or from any other cause, the VEGETINE will renew the blood, carry off the putrid humors, cleanse the stomach, regulate the bowels, and impart a tone of vigor to the whole body.

Vegetine is Sold by all Druggists.

Don't Delay to Cure that Cough

DON'T DESPAIR because all other remedies have failed; but try this remedy and you will not be deceived. It will cure when all others fail.
