The Oil News.

BALLTOWN. The Grandin & Berry Bros. well at Balltown was shot last week with a ten-quart torpedo, but the effort to increase the production was not entirely successful. The amount of gas was considerably increased, but it seems the oil supply did not increase. It is thought to have been the fault of the shooting. These same parties have commenced building a new rig about 50 rods northwest of the above mentioned well, and will probably start

the drill in a week or ten days.

BLUE JAY.

Darling No. 2, which was finished last week has been flowing fifteen barrels daily, and is considered a good well. The run of oil for the month of July through the United Pipe Line to the Derrick's report, was 1,775.80 visiting with her friend, Mrs. Kate barrels. This came from four wells, the Magee & Horton, Blue Jay Nos. 1 and 2, and Darling No. 1. This is a daily average to each well of 14

32 100 barrels, and is by no means a bad showing, but on the contrary a bettar average than the generality of oil fields will show.

Of the other operations in the county we have nothing new to report.

Notes of a Traveler.

Between Harrisburg and Lancaster, and even down to Chester county, the farmers have about one-hal? of their lands in tobacco; in the towns, even garden lots have been planted with the "vile weed." About Mt. Joy, a thriving town of about 2000 inhabitauts by-the-way, every good piece of land is covered with it. The houses for drying tobacco are numerous. Mt. Joy has several manufacturing establishments; machine factories of various kinds, and other industries. Here too is located the school for Soldiers' Orphans, one of the best in the State, where many of the little wards of the from the Blue Jay district, according Nation are gathered. At Mt. Joy also there is one of the largest and best wagon and coach factories in the State, the business being carried on extensively. The same being sent to every part of the United States.

The famous bank barns of Lancaster county dot the landscape for miles. in every direction, giving an appearance of comfort and prosperity. But it is sad to reflect they are wearing out their lands with that most destructive of all crops-tobacco ; in some fields the leaves not being larger than plantain leaves, while on other better lands large and flourishing. When we consider that an acre of average tobacco do not wonder at the temptation;
