FARGO.

A GreensWhene Country.

A Fargo (Dakota) correspondent maya: I have just finished a ride of many miles over the wheat region of the great Northwest, through the Red River val-lay and on west. The great Dalrympic and Williams farms have been fully described, so I will not enlarge on their immensity, but tall your readers how they start new towns here, and the cause of the mighty inflow of brains and capital. It may be all summed up in the word "wheat," but this does not tell the whole story. Accepting the in-vitation of friends at Buffalo, forty miles west of this point, we drove twenty-five miles south over the endless prairie, reaching the southwest branch of the Northern Pacific. Here a town is springing up, it being one of thousands on all the new lines building out of Fargo. Six weeks ago the great prairie cosmetics. It really depends upon diwas dotted by the occasional hut of the homesteader-now the black line of the of life. Persons who rise early and go railroad grade stretches as far as the eye to bed regularly at ten, who take plenty can reach. A month ago Sheldon was of air and exercise, eat with moderation unknown; now there are two stores, a at regular hours, have their meals at inboarding-house, postoffice, blacksmith- | tervals long enough for the digestion of shop, etc. And so it is all over the country. Hundreds of sections are being sold daily, and the wheat crop is being threshed out by the thousands of bushels. How about the profits of wheatraising? Careful judges practically agree that, with land at from \$5.50 to soap. 87 per acre, the permanent investment ready for thefi rst crop will be about \$11 per sore for a section. This includes buildings and the ground ready for the first crop. Subsequent crops can be grown for \$7.50. The yield ranges from fifteen to thirty bushels per acre. of the finest quality, and this, at an average of twenty bushels per acre, with prices at \$1 per bushel, pays an enormons interest. This figures on the basis of hiring everything done while the owner pursues other business. If one gives his own time and labor it can be done much cheaper. It is such returns as these for sixteen years in succession that causes Fargo to have four lines of railroad, with three more building, that has caused land in the immediate vicinity to increase from \$40 per acre to \$5 per lot in three years, that causes great blocks to go up as if by magic, and makes house rents from \$20 to \$30 per month at this point, and has increased the price of land all along the railroad from \$2 to \$20 per acre. In places I found the black prairie soil three and one-half feet in depth, and the whole country is being settled by a splendid class of people. Wages are from \$1.50 to \$2.50 per day for common laborers; mechanics receive from \$3.50 to \$4; man and team, \$4 per day, etc. Land can be bought in the vicinity of the new roads for \$5.50 to \$7 per acre.

What Causes the Blood to Circulate?

To what degree the heart is aided by other forces is yet a matter of investi-gation. Probably there are several forces assisting. The elasticity of the arteries increases their carrying capacity. They are firm, elastic tubes, which expand under the pressure from each heart contraction, and then by smaller arteries the flow loses the intermittent character it possesses in the larger arteries, and becomes a steady stream. The elasticity of the arteries

HEALTH HINTS.

Much of the money spent for malves, washes and liniments is ulterly thrown away. A simple bruise or a cut is healed by nature just as well without the aid of any contrivance for bringing money into the hands of ingenious in-ventors. A cut requires generally nothing but to have the edges drawn together with small strips of stickingplaster, and a simple linen cloth moistened with cold water to relieve inflammation. A burn is relieved by immediate exclusion of the air. Unless it be severe and widely spread enough to require medical attendance, this can be done by covering it with flour, with sweet-oil or cotton, or a little scraped raw potato.

It is a mistake to believe that a good complexion depends upon such and such gestion, which depends upon our mode one to be thoroughly accomplished before they begin the next-these persons are sure to digest well, and, in consequence, have clear, healthy complexions, which will require no other cosmetics but plenty of soft water and good toilet

To prevent diphtheria, and finally exterminate it, every man, woman and child throughout our land and the world should be brought to obey the laws of life and health. Parents should regularly feed, properly clothe and duly restrain all children before they come to the years of understanding and accountability. This alone would do much. A late prominent physician of Paris estimated that 3,000 children had died in that city, during the thirty years of his practice there, from short sleeves, short pants, and other kindred imprudence in the dressing of children. And I am fully convinced that as large a portion are sacrificed, in towns at least, in this country, from the same cause-all for a wicked fashion. And from careful observation in this country and abroad, I am confident that at least as many more are carried off by improper food and irregularity in taking it; together with poisonous candies and other unwholesome and indigestible trash, that no child or other person should eat.-Sanitarian

Hall's Journal of Health says that almost all bites and stings are destructive from their acid nature; consequently the cure is an alkali. Spirits of hartshorn is one of the strongest, and in almost every house, and you have only to pour out some into a teacup and dabble it on the wound with a common rag; relief is almost instantaneous. suppose you have no hartshorn; But well, then, saleratus is an alkali. Moisten it with water and use as the hartshorn. If you have no saleratus or soda pour a teacup of boiling water on as much wood ashes, stir it, and in a few moments you will have an alkali. The lye of ashes will answer a good purpose while the physician is coming. Retheir own elasticity contract and help member the principle: The bite is an the onward flow of the blood. In the acid, the cure is an alkali. Have we not before now looked with wonder on the old negro, who ran out when the wasp's sting made us "holler," caught stream. The elasticity of the arteries serves precisely the same purpose as the nir chamber of any force-pump, that of equalizing the flow, and so increasing the amount delivered. The whole force is derived from the heart; the arforce is derived from the heart; the ar- its multiples are mysterious numbers; teries cause the force to act continu-ously. and then, again, you can scarcely gather up three kinds of plants any-The veins are lax tubes, somewhat where, one of which will not have more larger than the arteries, and capable of holding all the blood in the body. to gather up principles instead of specifications how much easier it would be to know a great deal and to apply our knowledge successfully to the practical

WISE WORDS.

A man often stubs his too on the threshold of success,

A handsome woman pleases the eye, but a good woman charms the heart.

Discretion is the golden cord on which wisdom strings her richest jewels. Men often judge the person, but not the cause, which is not justice, but malice,

Nature never moves by jumps, but always in steady and supported adshous.

It is easy enough to forgive your enemies, if you have not the means to barm them.

every idle word, so must we likewise of our idle silence.

If you wish to appear agreeable in society, you must consent to be taught split 'em, but we never saw 'em." The many things which you know already. Laziness grows on people. It begins in cobwebs and ends in iron chains. The more business a man has to do the more he is able to accomplish, for he learns to economize his time.

Good counsel is the dew that friend. ship distills and drops among her votaries ; in short, 'tis the currency of affection; yet, while we give heed to the voice of friendship, our own good judgment should get the final hearing.

Eternal vigilance is said to be the price of liberty, and to-day great success in commercial as in every other sphere of life can be bought only with the same coin. Put plenty of it than by attending to his official duties. in your cargo, if you would make your VOYAge & success.

Difficulty is the nurse of greatness, a harsh nurse, who roughly rocks her foster children into strength and athletic proportions. The mind, grappling with great aims and wrestling with mighty impediments, grows by a cer-tain necessity to their stature.

The men who succeed without tht aid of education are the exceptions Common men need all the help thas education can give, to put themselvee on a level; and even of the exceptional men it may be said that they would have succeeded still better with the advantages of education.

It is not what we carn, but what we save, that makes us rich. It is not what we cat, but what we digest, that makes us strong. It is not what we read, but what we remember, that makes us wise. It is not what we intend, but what we do, that makes us useful. It is not a few faint wishes, but a life-long struggle, that makes us valiant,

Stammering.

This is one of the greatest of minor misfortunes. It prevents one from securing, however able, some of the more prominent positions in life; hinders suc-cess in many lines of business, and sorely mars social enjoyments.

The trouble is of a purely nervous character, and is often the result of some fright when young. The nervous center which controls articulation becomes affected.

A nervous center is a paticular mass of gray brain-matter, and is a sort of telegraph machine, a nerve being only a kind of telegraph wire, which communicates the nervous force.

The affection is of such a nature that difficulty when alone, nor in the excitement of a public address. The eminent Dr. W. B. Hammond, of England, is a stammerer, utterly unable in the presence of others to repeat "Peter Piper," etc., but able to go through the whole without a flaw when alone. His most effectual aid is to make some slight muscular action when uttering the difficult words. He says, "With each troublesome word, especially with the beginning of a sentence,] made some slight motion with the hand or foot, or even with a single finger, and I found that this plan enabled me to get the word out without stammering. With the enunciation of 'Peter,' for instance, I would tap the side of my body with the band, just as I opened my lips, and the word articulated without the least halting.

Art and Oil.

The Norfolk Firginian, of January 16, 1881, rofers to the remarkable our affected by St. Jacobs Oil in the case of Professor Cromwell-known the country over for his magnificent art illustrations-who had suffered excruciating torments from rheumatism, until he tried the Oil, whose effects he says were magical,

He was a grave and reverend college professor, and he was enjoying the air on one of the wharves. "Do you catch many mackerel this year?" he asked of a hardy fisherman. "Well," the son of Neptune replied, "we seine some." 'Farden, young man," exclaimed the As we must render an account of man of letters, "you mean we saw some." "Not by a hornful," replied the fisherman, "Who ever heard of sawing fish ? Wo split 'em, sir, we man from the college seemed mystified. He turned away and sighed at the ignorance of the times

(Rural New Yorker.)

The best people will vote for the best man every time. And we judge by the number of the St. Jacobs Oil constituency, that it is the best remedy for the rheumatism known. Professor Tice, of St. Louis, among others, says so.

Begging in Europe cannot be the re-wardless undertaking generally sup-posed. It is stated that a Russian official not long since laid a wager that he could make more money by begging Of 130 persons he addressed soliciting

charity he was refused by forty-two, and early in the day had received alms amounting to more than his salary for two days.

"Lies ! Big Lies !" Not so fast, my friend ; for if you would see the strong, heatby, blooming men, women and children that have been raised from bods of sickness, suffering and almost death, by the use of Hop Bitters, you would say, "Truth, glorious truth." See "Truths" in another column.

A ragged tramp, who was trying to sell jewelry on the streets of Chicago, was arrested because the articles offered were or real value, and it was surmised that they had been stolen. The prisoner proved to be a girl in disguise, and the jewelry was her own.

Don't Die in the Honse. Ask Druggists for "Rough on Rats." It clears out rats, mice, roaches, flics, bed-bugs, 15c.

No one is ever fatigued after the exercise of forbearance.

VEGETINE,—The great success of the VEGETINE as a cleanser and purifier of the ilood is shown beyond a doubt by the great numbers who have taken it, and received immediate relief, with such remarkable cures.

RESCUED FROM DEATH. William J. Coughlin, of Somerville, Mass., says. In the fall of 1876 I was taken with blooding of the lungs followed by a severe couch. I lost my appetite and flesh, and was confined to my bed. In 1877 I was ad-mitted to the hospital. The doctors said I had a hole mitted to the hospital. The doctors said I had a hole in my lune as big as a half-dollar. At one time a re-port went around that I was dead. I gave up hope, but a friend told me of Dn. WILLTAM HALL'S BALSAM FORTHE LUNGS. I got a bottle, when, to my surprise, I commenced to feel better, and to-day I feel better than for three years past. I write this hoping every one afflicted with discased lungs will take Dn. WIL-LAM HALL'S BALSAM, and be convinced that con-summon CANDE CUBED. I can positively say It has done more good than all the other medicines I have

Self Defours. To a minimal segret of proventive medica-tion only be ascribed a majority of the aliments which affect immunity. It is a well-ascertained fact, resting on the experience of over twenty five years, that a course of Heststra's Stomac Bitters will put even a naturally feeble system in such a state of defense that is will be comin such a state of defense that is will be com-patent to resist the most provalent causes of disease, such as the maign influence of miasma, unwholescene water, excessive heat, damp, cold, sudden changes of temperature, etc. Yet there are thousands of pergeons living in perpetual peril from one or more of these causes, who recklossly omit to avail them-selves of the absolute protec ion which this famous vegetable antidate affords. Intermit-tent and billous remittant forars thermatism. tent and billons remittent fayors, rhenmatism, general debilly, norvors weakness and irregu-larities of the stomach, howels and liver, would be comparatively unknown, if this patatable specific were in universal use in the districts there they principally assessed. where they principally provail.

The growing custom of putting the choir at the pulpit end of the church has the very serious drawback that it prevents a man from turning round and looking up at the organ in a critical manner just before the contribution plate approaches his pew.

Not a Boverage, but a medicine, "They are not a boverage, but a medicine, with curative properties of the Lighest degree, containing no poisonous drugs. They do not trar d wa an already debilitated system, but build it up. One bottle contains more hops, that is, more real lop strength, than a bar (1 of ordinary beer. Every druggist in Rochester selis them, and the physicians prescribe them." —Rochester Evening Express on Hop Bitters.

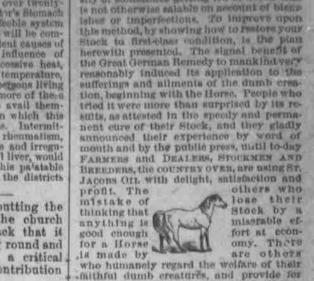

The tooth of a mastodon, weighing six and a half pounds, was found by a little boy in the Kentucky river, at Marion, Ky., recently.

No Woman Need Suffer When Warner's Safe Kidney and Liver Cure can be so easily obtained and so safely used,

Hoof clippings act as fertilizers, as they contain ammonia.

PURE Cop LIVER OIL made from selected Figure Cob Liver Oil, made from selected livers, on the seashore, by Caswell, Hazanp & Co., New York. It is absolutely pure and sweet. Patients who have once taken it prefer it to all others. Physicians have decided it superior to any of the other oils in market.

The only natural hair renewer is CAUDOLINES a deodorized extract of petroleum, prepared with-out distillation or rectification with acids or alkalies, containing no mineral or other poisons, and as clear and pure as spring water.

They convey the same amount of blood as the latter, but more slowly. In the larger veins, however, near the auricles, the velocity may be 200 millimeters per-second. They are provided with valves purposes of life. which effectually prevent the blood from flowing backward to the heart. Any compression, produced by muscafar contraction, or otherwise, will therelore assist the forward flow of venous blood. This is one explanation why exercise hastens the circulation. The movement of the chest in breathing probably aids the pulmonary circulation, the blood, as well as the atmosphere, tending to fill the vacuum during inspiration

Physical capillary force is not gen-erally regarded as an active force in the circulation. But there is an admitted force in the capillaries, resulting from the attraction of the tissues for the arterial blood, containing the required oxygen and nutriment. "The vital conthe maintenance of the circulation." need of any organ; the nervous system regulates the anpply by varying the caliber of the vessels.

The force in the capillaries, or some which Harvey overthrew in 1620. -Popular Science Monthly.

a woman near Live Oak, Fla., who was pursued and very much frightened by a luge alligator. Subsequently she gave birth to twins. both males. They were perfect children down to their waists, and complete alligators below tail and all. There are short, webbed feet and legs at the lower portion of the abdomen like alligators. They crawl with their hands, dragging themselves about just as an alligator does. They make a squealing, inarticulate noise. The mother has a large tank filled with water, in which she keeps them, and they live nearly all the time in it. They are now fourteen or fifteen years old. Comparatively few outside the immediate neighborhood knew of the case until the enterprising newspaper man got hold of it. The mother has refused large offers of money to exhibit her children.

pretty figure."

An Heroic Boy.

Every year on the occasion of the national fetes the Belgian government makes a public distribution of rewards to persons who have performed remarkable acts of courage in good causes. Among those who were rewarded the other day was a little boy of nine, whose exploit may be contrasted with the behavior of the people who al-lowed the little girl to be drowned at Kensington gardens. Genin, playing in a field a few months ago, saw a little girl fall into the Sambre. Without knowing who the child was he plunged for Mayor King. into the river, and after some trouble saved her. The child turned out to be his own sister. Not content with havdition of the tissue becomes a factor in ing rescued her from death Genin, like a good-hearted little boy, wanted to It is this force, primarily, which adapts shield her from the punishment she had the amount of blood to the varying deserved by playing too near the river, deserved by playing too near the river, contrary to her parent's orders. So he took the blame of her disobedience on himself and received a beating from his father. The little girl, however, could other force, carries the blood, after not bear to see him suffer in this way, death, from the arteries, where the heart and afterward told the whole truth, leaves it, into the veins. Finding the which was corroborated by the evidence E teries empty after death gave rise to of an eye-witness. The facts then bethe idea that they conveyed only air; came public, and young Genin was sum-whence the name. It was this belief moned to Brussels at the fetes to receive a national recompense. He was of course loudly cheered as he stepped up to the platform, and M. Rolin-Jacque-Alligator Children. myns, the home minister, in pinning a A Southern paper gives an account of medal to his breast, called him a little hero,-St. James' Gazette.

To Measure a High Object.

Persons are sometimes desirous to find the exact height of an object which they cannot climb or measure by any direct process, as of a tree or build-ing or steeple. This can be readily done by measuring some lower object and its shadow and then making a comparison or calculation. Even a child can do it. Take a pole of any given height; place it in an absolutely perpendicular position; measure on the level ground the length of the shadow; measure the length of the shadow of the tree; then multiply the length of the tree; then multiply the length of the tree's shadow by the height of the pole, and divide the product by the length of the shadow of the pole. For instance, if the pole is six feet high, its shadow ten, and the shadow of the tree The sculptor is the man who "ents a fifty, the height of the tree will be thirty feet.

Mayor King, of Philadelphia, says, "I do not intend to remove a single man from the force, big or little, white or black, if he does his duty." Good

Female Weaknesses.

No better remedy in the whole materia medien has No better remeily in the whole materia medica has yet been compounded for the relief and cure of Female Complaints, of the ordinary kind, than VEGETINE. It seems to act in these cases with un-wonted certainty, and never fails to give a new and healthful tone to the female organs, to remove re-laxed debility and unhealthy secretions, and restore a healthful vigor and clusticity. One of the most common of these complaints is Leucorrhom or Whites, which are brought on either by the presence of Scrofula in the system, or by some affection of the womb, or even by general debility. For all these complaints, and when danger begins to threaten woman at the turn of life, VEGETINE embedded woman at the turn of life, VEGETINE can be com-mended without qualification. The great prevalence of these disorders, and their cure by VEGETINE, has or meso disorders, and their cure by VEORTINE, has amply shown that the sure alloviating agent remains not yet to be discovered, but is already known, and is a favorite with American facilies. Too long has it been the custom to prescribe nauscating and uncer-tain remodies in place of what is pleasant, efficacious and cheap. Try VEOETINE, and do not doubt its power to carry you safely through danger and disease.
