#### THE FARM AND HOUSEHOLD.

Treatment of Woundain Pruning. When large wounds are made in removing limbs or branches of fruit trees they should be covered with common oil paint. Linseed oil and the mineral iron paint is the best for this purpose. It does not cause the bark to grow over the wound and so heal it, but it preserves the wood from rotting, and so prevents the decay and injury of the tree. No living thing, not even a tree, can long exist with a part of it in a dead and decaying condition.

#### Lice on Cattle.

The cheapest and one of the best means of ridding stock of lice consists in the free application of wood ashes, frequent brushing, removal of old or dirty bedding, occasional application of boiling hot water to the woodwork of the stalls, sheds and sties, or lime-washing of the same. All loose hairs and dirt removed from the bodies of the animals by brushing, as well as old bedding, should be collected in a heap and burned. The presence of vermin on live stock can never be successfully combatted by simply applying a certain remedy to the body of the animals, and not at the same time attending to the

#### How to Succeed.

The right way to obtain a good cow is to raise her. Choose a good calf, feed it well, but judiciously, but feed it faithfully and see to it that it is done. Some of our best breeders claim that the milking qualities of cows can be influenced for the better by feeding the growing calf upon such foods as promote and stimulate the formation of milk glands. Be this as it may, milking strains are in the main hereditary, and great a ilk yields can best be secured by breeding under the farmer's own supervision, selection of the best, and feeding to attain the end sought-milk. By raising his own cows the farmer has two chances as against one where he buys his dairy stock. The penalty of failure in selecting a good cow is the necessity of combining the cow's body in the fall, and her small credit for milk, to balance the purchase money, losing her sum-mer's keep and the labor of milking. If the heifer should fail in being a good milker she can be turned into early beef and the finances added to capital stock, the actual conversion of so much grass and hay into money. - Ohio Farmer.

## Early Chicks.

The following remarks on the best time to have hatchings or chicks are from the American Poultry Journal :

While there are hundreds of chicks hatched out during the month of March, there are more living results from the hatchings made in April and May, when the weather is more equable and the cold chilly winds less frequent. In March it is just as easy to get out the chicks, but they are subject to more hardships during that month than later in the season, which augments the mortality con-siderably. All through April there are requent and sudden showers to guard against, but then they need not be feared, while the weather intervening cold. is generally mild and pleasant, so tchel during April get a have got twelve commercial travelers good growth and a neat dress of feathers, before the warm, hot and dry days of summer are upon us. Chicks hatched in March, April and May are usually termed "early hatched" chicks, for they will, if well cared for and liberally fed, attain a good size before the cold into No. 1 bedroom and wait a few minweather sets in, and usually commence to lay in the fall. Late hatched birds do not, as a rule, lay until the following spring, thus neglecting to pay for themselves until two, three or four months after birds hatched but a month or two earlier.

#### fifteen minutes to half an hour; then bake in a quick oven.

APPLES WITH RICE .- Peel six apples, core them, cut them in half and place them in a flat stewpan with half a pint of water, four ounces of lump sugar, a few cloves and a little cinnamon. Let them boilgently till they become quite soft, then remove them and let the syrup boil away till reduced to a couple of tablespoonfuls, when you strain it over the apples. Put into a stewpan half a pound of Patna rice and a quart of water, leave it on the fire till it boils Drain off the water, and add one pint of milk, four ounces of white sugar and the tkin rind of a lemon. When the rice is thoroughly cooked remove the lemon rind and work it into the yolks of three eggs; then put it in a heap on which it is to be served, place the apples on the top and cover the whole theroughly with the whites of the eggs beaten up into a stiff broth with one tablespoonful of lump sugar. Sprinkle powdered sugar over, and bake half an hour in a cool oven.

#### HEALTH HINTS.

Ten cents' worth of muriatic acid and acid of niter will take out any number of corns or warts. Scrape around general cleanliness of these, as well as the corn and put the acid around it a of their surroundings .- National Live few times, and then you can take a pin and lift it out by the roots. Put a little greese in it when it is removed.

The following is an excellent and

safe remedy for children's colds : Take onions, slice thin, and sprinkle loaf sugar over them, put in the oven and simmer until the jvice is thoroughly mixed with the sugar. It makes a thick syrup, very nice. Give a teaspoonful as it seems to be needed, three or four times a day.

In acute sickness when milk and beef tea disagree, the French hospitals give a preparation called albumen water, made by dissolving the white of an egg in a pint of water, and adding glycerine to sweeten, and lemon juice to flavor.—Dr. Foote's Health Monthly.

ceases in from a quarter to half an hour, or even in much less time. When the main part of a limb, such as the

hand or forearm or the foot and leg, has been burned, it is best when practicable to plunge the part at once into a jug or pail or other convenient vessel filled with the soda lotion, and keep it there until the pain subsides, or the limb may be swathed or encircled with a surgeon's cotton bandage previously soaked in the saturated solution and kept constantly wetted with it, the relief being usually immediate, pro-vided tae solution be saturated and

#### AN UNUSUAL FURORE. A Recent Excit meas Investigated by the Morald and the Results Made Public.

(Cleveland, O., Horsdi;) A few weeks ago we copied into our columns from the Bochester, N. Y., Democrat and Chronicle "A Rematiable Statement," made by J. B. Henion, M. D., a geutleman who is well known in this city. In that article Dr. Henion recounted a wonderful experience which befell him, and a few days thereafter we pub-liabed from the same purper a second article been num, and a few days thereafter we pub-lished from the same paper a second article, giving an account of the "Excitement in Ro-cheater," caused by Dr. Henion's statement. In the first article Dr. Henion's statement. In the first article Dr. Henion's stated that for a number of years, up to last June, he had been afflicted with what seemed at first a most seri-ous trouble. He felt unaccountably tired at frequent intervals; he had dull and indefinite pause in various nexts of his head sheed paine in various parts of his body and indefinit and was very hungry one day and entirely with-out appetite the next. However, as a physi-cian, he thought, and so did his fellow physi-

cian, he thought, and so did his fellow physi-cians, that he was suffering from malaris. But yet he grew worse, and was finally obliged to give up a large and inerative prac-tice. Still he was not conscious of his danger, nor that a monstrons disease was becoming fixed upon him, although all his organs had be-come gradually weakened. The symptoms above described continued, accompanied by others of an aggravated nature, and he noticed a peculiar to or and our alwayt the disc. a peculiar co or and osor about the fluins he was passing; that they were about and one day and very scanty the next, and were covered with froth, or filled with brick dust sediment. But even then he did not realize his real and alarming condition. At last, however, he was brougut face to mee with the fact that he was a victim of a most terrible disease, and he made victim of a most terrible disease, and he made heroic efforts for recovery. He traveled exten-sively and consulted the best physicians, but they could give him only temporary relief, and that principally in the form of morphine. And so be grew steadily and constantly worse until his life became a torture. His pulse was un-controllable. He lived wholly by inje tions, and for six days and nights he had the hie-co-ghs constantly, which are considered the sure indications of coming death. When hope and life ware nearly exhausted, his pastor, the Rev. Dr. Foote, rector of st. Paul's church, strongly urged him to try a means which the reversend gentleman had seen used with remarkable results. He objected at first, but finally consented, and was conscious

ined with remarkable results. He objected at first, but finally consented, and was conscious of an improved condition the first week. His pains gradually disappeared; his stomach re-sumed digestion; his heart became regular; his headaches disappeared; he had no more chills and fever, or soldity of the stomach; he gained improved in these months are in the twenty-six pounds in three months, and is a well man to-day, being entirely cured of a most

an egg in a pint of water, and adding glycerine to sweeten, and lemon juice to flavor.—Dr. Foote's Health Monthly. REMEDY FOR BURNS.—According to the Practitioner a simple and effective remedy for removing the pain of sounds caused by burns or scalds is a saturated solution of bicarbonate of soda in either plain or camphorated water. To apply the remedy all that is necessary is to cut a piece of lint or old soft rag or even thick blotting paper, of a size sufficient to cover the burned or scalded parts and to keep it constantly well wetted with the sodaic lotion, so as to prevent its drying. By this means it usually happens that all pain phour, or even in much less time. When plaints, when in reality it was Bright's disease of the kidneys. Few physicians and fewer people realize the extent of this disease or its dangerous and insidious nature. It steals into the system like a thief, manifests its presence by the commonest symptoms, and fastens itself upon the life before the victim is swars. Itself upon the life before the victim is aware. It is nearly as hereditary as consumption, quite as common and fully as fatal. Entire iamilies, inheriting it from their ancestors, have died, and yet none of the number knew or realized the mysterious power which was re-moving them. Instead of common symptoms it often shows none whatever, but being death it often shows none whatever, but brings death auddenly, and as such is usually supposed to be

heart disease." The second article entitled "Excitement in Rochester," was made up of interviews with Dr. Henion himself, who confirmed all said in his card, and also with Mr. H. H. Warner. The latter gentleman did not regard Dr. Henion's case as particularly ered IODAL, DECAUS

# Now the republishing of his statement in

many of the leading journals of the day has been the cause of an inceasant flow of letters to me making many inquiries, but chieffy whether the statement is true, or a mere ad-

whether the statement is true, or a mere ad-vertising dedge, etc., etc. I beg, there ore, to anticipate any further inquiries and awo time and latter, and some postage, by saying that the statement of Dr. Henion is true, so far as it concerns wealf, and I believe it to be true in all other re-spects. He is a parishioner of mine and I at-tended him in his sickness. I urged him to take the medicine, and would do the same again to any one who was troubled with a dis-case of the kidneys and liver. IBRENT FOOTE, D. D., Rector of St. Paul's church.

Rocher of St. Paul's church Rochesten, N. Y., January 28 1882.

The Maple Tree and Sugar Making. Timothy Wheeler, of Waterbury, Vt., writes authoritatively as to "The Maple Tree and its Oapabilities" He is said to have made the making of maple sugar a matter of close investication and study. Mr. Wheeler says Vermont produces the best maple sugar made in the United States. He is sat-isfied that the sap, which flows from the tree in the early spring, does not come from the ground, as the ground and roots are both frozen, which would make it impossible; neither can it be supplied entirely from the body of the tree, having been retained there during the winter, as the supply would soon run out and leave the tree dry. He be-lieves that the tree is repleuished with sap from the "vapor of weter in the atmosphere." At night the tree gets cooler than the atmosphere, which causes the vapor to be absorbed, and the coolness also contracts the moisture in the tree, which has the effect to produce a "suction in the night," and " in the daytime, owing to the heat, and "in the daytime, sure." "This is why sap flows by day and ceases at night." This expansion, by the heat of the sun, causes an in-creased pressure, and this is why the flow is hereest near the sure. flow is largest near the surface of the tree, as proven by a shallow hole comared with a deeper one, and why sap is sweetest in proportion as it is drawn near the surface of the tree; hence the more shallow the hole the richer the sap. On this account there can be several qualities of sap drawn from one tree. It is not the quantity of sap the tree supplies which determines its value for sugar making, but the quality; and, as a rule, the tree which offers the most makes the poorest sugar. The most sap is obtained within ten to twelve feet of the ground. It diminishes in regular proportion, according to height. At thirty feet the flow was found to be one and a half quarts, and above scarcely nothing. The trees will yield from twelve to twenty-four gallons a day. In cold climates more sugar can be obtained from maple sap than in warm latitudes, where molasses exceeds. Poor soil produces the richest sap, and the rich spouts, will produce twenty pounds of sugar; and one tree, with three spouts, thirty-nine and a half pounds of sugar. Toward the last of the season the sap is sweeter, and more sugar can be made from the same amount of sap.

#### Lo! The Poor Miamis.

The Miami Indians may still be a nation of 321 souls but they have no country. About twenty-six years ago they sold their birthright in Indiana, where they had a large reservation, to he United States government for \$221,-000, payable in twenty-six years with interest payable annualty. This sum, together with one year's interest, was recently paid to them, which gave the urviving members of the tribe about \$700 apiece. They have been dving out slowly for years on their annual interest from the government, and the meager returns of their own industry. I hey do not appear to have been thrifty at farming and other pursuits of civlized life, and languished. They are comp'etery sold out, and when the white speculator gets hold of their money in hand there is nothing for the emnant of the tribe to do but to go HIRES' DIPROVED GOOT BEEK. Derande beverage. Ask your drugsts, or send by mail for 25c. C. E. Hires, 48 N. Dola. ave., Pulla West and run wild with their savage orethren. Civilization doesn't long tick to an Indian in the primeval forest.

Tantalizing the Liver. Many persons fancy they are remedying lious habit when they are merely tantalizing the liver by repeated and large doses of power-ful drugs, which rather inflame than stimulate In drings, which rather inflame than stimulate it. Calomel and blue plil are both objection-able, particularly when used to the extent that some people use them for simple billowaness and constipation, and botanic purgatives of a chastic nature exert no direct influence upon the bile-secreting organ. The benignant alter-ative, Hostetter's Stomach Bitters, while it is

an efficient etimul nt of the liver, promoting bilious secrecion and regular evacuation, never affects either the liver or bowels excessively, but both in its laxsive and anti-bilious action is painless and agreeable. It counteracts malarual influences, cures indigestion, is a superlative tonic, and is a salutary diuretic. The weak and the aged are invigorated and solaced by it.

Recipes.

FLOATING ISLAND.-Sweeten a pint of thick cream with white sugar, grate in will remember she left the twelfth the peel of one lemon, whip it to a the peel of one lemon, whip it to a gentleman alone with the first, and froth, pour a pint of thick cream into a said: "I have accommodated all the china dish, lay sponge cake in thin slices over it lightly, then a layer of some kind of jelly, then pour the whipped cream on top and pour what remains into the bottom of the dish. Garnish the rim with sweetmeate.

BEEF AND BARLEY SOUP,-Use the two quarts of beef stock set aside yesterday. Soak six tablespoonfuls of pearl barley in cold water two hours. Boil half an hour or until tender in a little salted water. When you have taken the cake of cold fat from the top of the soup, put in the barley and simmer all together half an hour. Then stir in two tablespoonfuls of shred gelatine previously soaked one hour in cold water.

onions, two heads of cabbage, a peck of green tomatoes and four heads of celery with two large red peppers; sprinkle over a cupful of salt at d let it stand over night; drain off the liquor in the morning, scald and pour back on for three mornings, then squeeze it out as dry as you can with your hand; add vinegar enough to cook it in till a little tender; put in a jar, and when cool it is fit for use.

one of brown sugar, beaten to a cream; three eggs made light, one and a half directly down. The attraction of the cups treacle, one cup sweet milk, three and a half cups of sifted flour, two teaspoons of cinnamon, one of ginger and one of cloves, one of soda dissolved in inches long, strongly magnetized, at a a little warm water to be put in the last distance of one foot. The foregoing thing, and two teaspoons of cream of is the accepted explanation of the fact tartar sifted into the flour. Bake in a that the needle points to the northward moderate oven thirty minutes or longer if required, test with a broom splint; if reason can be given for this natural it comes out dry it is done. Good hot fact, any more than for any other or cold.

TEA BISCUIT,-Boil one quart of milk for two or three minutes; let it cool, then add half a cake of yeast (dissolve the yeast in a little warm water first, and strain it so that the meal will not give a bitter taste to the dough), melt a piece of butter the size of a large walnut; stir this with flour enough to make a stiff sponge. Let it rise for three hours, then roll and out out the biscuit -make them thinner than for ordinary tor, double together, draw them out to the taste, never fails to care, and costs only 25

into eleven bedrooms, and yet to have given each a separate bedroom. Here we have eleven separate bedrooms:

## 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11

"Now," says she, "if two of you will go utes Ill find a spare room for you as soon as I have shown the others to their rooms. Well, now, having thus bestowed two gentlemen in No. 1 she put the third in No. 2, fourth in No. 3, the fifth in No 4, the sixth in No. 5, the seventh in No 6, the eighth in No. 7, the ninth in No. 8, the tenth in No. 9, the eleventh in No. 10. She that all the material facts may be set before our readers. Since the publication of these two then came back to No. 1, where you if one of you will please step into No. 11 you will find it empty." Thus, the twelfth man got his bedroom. Of course, there is a hole in the saucepan somewhere, but we leave the reader to

determine exactly where the fallacy is, with just a warning to think twice before declaring as to which, if any, of the travelers was the "odd man out."

## The Magnetic Needle.

A condensed explanation in regard to the needle pointing to the northward and southward is as follows : The magnetic poles of the earth do not coincide with the geographical poles. The axis of rotation makes an angle of about 230 with a line joining the former. Cnow-Cnow. - Chop together eight The northern magnetic pole is at present near the Arctic circle, on the meridian of Omaha. Hence the needle does not everywhere point to the astronomical north, and is constantly variable within certain limits. At San Francisco it points about seventeen degrees to the east of north, and at Calais, Me., as much to the west. At the northern magnetic pole, a balanced needle points with its north end downward in a plumb line. At San Francisco it dips about SOFT GINGERBREAD. - One cup butter, sixty three degrees, and at the south-

ern magnetic pole the south end points earth upon a magnetic needle at its surface is of about the same force as that of a hard steel magnet, forty and southward. Of course, no ultimate fact, any more than for any other observed fact in nature.

No less than 800,000 tons of tin plate are annually used in the United States in the manufacture of tin boxes and cans for oysters, and the multitude of various things known to canners, A single New York firm uses twenty tons of tin plate per day.

Now they speak of Crude Petroleuna as a remedy for Consumption; better not try it, but take Dr. Bull's Cough Syrup-the standard

had known of very many such cures by the had known of very many such cures by the same means in all parts of the land. Kidney diseases, he said, are carving off tens of thou-sands every year, while Bright's disease is in-creasing 250 per cent. a decade, and yet the people do not realize it or seek to check it until too late. He related how a New Orleans medical professor, lecturing on this disease, think-ing to show his class what heathy fluids were, subjected some of his own to a chemical test, and although he had no suspicion of it before, and autobigh he had to suspicion of it before, discovered that he too had the dreaded disease, which proved fittal in less than a year. There was also an interview with the calebrated chem-ist of the New York State Board of Health, Dr. S. A. Lattimore, who said he had analyzed the remedy which cured Dr. Henion, and found that it was "entirely free from any poisonous or deleterious substances." We have made these condensations in order

articles, having been besieged with letters of articles having been besieged with letters of inquiry, we sent a tetter to Dr. Henion and al-o one to H. H. Warner & Co., asking if any additional proof could be given us as to the val-idity of the statements published. In answer thereto we have received the following letters, which add interest to the subject and wholly verify everystatement hitherto made: Booursers N. Y. Ech. 0, 1999

ROCHESTER, N. Y., Feb. 2, 1832. GENTLEMEN: Your favor is received. The published statement over my signature, to which you refer, is true in every respect, and I owe my life and present health wholly to the power of Warner's safe Kidney and Liver Cure. It is not surprising that people should question the statement I made, for my recovery was as great a marvel to myself as to my

physicians and friends. • • • D. B. HENION, M. D. ROCHESTER, N. Y., Jan. 31, 1882. SIRS: Acknowledging your favor duly re-ceived, we would ay: The best proof we can give you that the statements made by Dr. Hen-ion are entirely true, and would not have been publiched unless strictive is the following tes publi-hed unless strictly so, is the following tes-publi-hed unless strictly so, is the following tes-timonial from the best citizens of Rochester, and a card published by Rev. Dr. Foote, which you are at liberty to use if you wish. H. H. WARNER & Co.

To Whom it may Concern : In the Bochester, N. Y., Democrat and Chronicle of December 31, 1881, there appeared a statement in the form of a card from Dr. J. B. Henton, of this city, recounting his remark-able recovery from Bright's disease of the kid-ners, after suveral doctors of prominence had acts recovery from bright s instance had nevs, after several doctors of prominence had given him up, by the use of a preparation man-ufactured in this city and known as Warner's Safe Kidney and Liver Cure.

Safe Kidney and Liver Cure. We are personally or by reputation acquaint-ed with Dr. Henion, and we believe we would publish no statement not literally true. We are also personally or by reputation well ac-quainted with H. H. Warner & Co., proprietors of this remedy, whose commercial and per-sonal standing in this community is of the highest order, and we believe that they would not publish any statements which were not lite. not publish any statements which were not lit erally and strictly true in every particular.
