ideal of the individua. - Bichter. They are never alone that are accompanied with nobie thoughts,-(Sidney. Allowing the "blues" to master you

is a sure way of cutting your life short. Clothes are the best passport among strangers-character among acquaint-

I dare do all that may become a man who dares do more is none .- [Shake-

It is possible for a man to be so very shrewd that in the long run he cheats

There is nothing so likely to produce peace as to be well prepared to meet the enemy.

Put a drop of honey on your ton ue bel we you speak, and see how easy it is to make friends.

It is one thing to see that a line is crooked, and another thing to be able to draw a straight one. What we learn in youth grows up

with us, and in time becomes a par of this mind itself .- [Anon. Oft the cloud which wraps the pres

ent hour serves but to brighten all our future days .- [John Brown. Pigmies are pigmies still, though

perched on Alps; and pyramids are pyramids in vales. - [Young. Common sense does not ask an impossible chess board, but takes the one

before it and plays the game. Be courageous and noble-minded; our own heart, and not other men's opinions of us, forms our true honor.

The wise prove, and the foolish confess, by their conduct, that a life of employment is the only life worth lead-

Fancies, like wild flowers, in a night may grow; but thoughts are plants whose stately growth is slow .- [Mrs. E. C. Kinney. If you would not be forgotten as soon

as you are dead either write things worth reading or do things worth writing,-[Franklin. What an emancipation it is to have escaped from the little inclosure of

Aogma and to stand-far, indeed, from being wise, but free to learn! The talent of success is nothing more than doing shat you can do well, and

doing well whatever you do without a thought of fame. - [Longfellow. If a man empties his purse into his head no man can take it away from him. An investment in knowledge always

pays the best interest,-[Franklin. There are moments of despondence, when Shakespeare thought himself no poet, and Raphael no painter, when the greatest wits have doubted the excellence of their happiest efforts.

Living men must have living institutions. It is very idle to suppose that we are to be ruled by men who are ly-ing in their graves. Each age is capable of judging of its needs; it is not honor and the bedchamber woman are to be supposed that a past age knew what we should want.

The Division of the States.

The old conventional division of the States of the Union into Eastern, Middle, Southern and Western continues, notwithstanding the great increase of population Westward and the consequent shifting of the lines. Chicago, once upon the outpost of the far Northwest now speaks of the Northwest as being as far from her as she is from New York. But it is found convenient to continue the old grouping of States, not because it is accurate, but because of the absence of any other generally adopted division descriptive of the location of groups of them. Henry Gannett, of the census bureau, proposes a new classification based upon the natural lines of the Atlantic coast, the Mississippi valley and the Rocky mountains. These are sub-divided for greater convenience of classification as follows: (1) The North Atlantic States, comprising the six New England States and New York, New Jersey and Pennsylvania; total, nine; (2) the South Atlantic States, Delaware, Maryland, Virginia, West Virginia, North Carolina, South Carolina, Georgia and Florida, these making eight, or, if we count among them the District of Columbia as another unit, nine; (3) the North Central States, Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, Missonri, Dakota, Nebraska and Kansas, making eleven; (4) the South Central States, Alabama, Mississippi, Louisiana, Texas, Arkansas, Tennessee and Kentucky, making seven, or with Indian Territory as another unit, eight; (5) the Western States, now mostly Territories, but reckoning in Montana, Idaho, Washington, Oregon, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada and California, eleven in all. This is much better than the existing plan, but so great is the power of habit that it will be difficult to have this classification adopted as a substitute for one in use commonly for generations .- Chicago Times.

A sly timber merchant at Odessa got the best of a couple of Russian railway companies a little while ago. He made a centract with them for the delivery of a large quantity of timber within a given time and deposited \$10,000 as security to carry out his agreement, upon the condition that the companies would carry the merchandise gratis. Trainford upon trainload reached the city stations, the companies successively declining the timber as not being equal and brandebourgs of passementeries to what was contracted for. Fresh or- trim the fronts of many of the spring ders were sent out to his agents for a costumes, especially those of Gilbert better quality, and more trainloads cloth, cheviot, flannel and camel's hair brought more timber of objectional de- serge. Ornaments to match are used scription which the wily trader invaria- to loop parts of the skirt draperies. bly disposed of to local merchants. The freights alone represented a fortune ten- the new camel's hair cloths, cashmeres fold the amount of his cash deposit, and imperial serges. These plaids are and having realized he coolly threw up produced by fine lines of the same

As the result of the Harrison reviva Very pretty and expensive suits of meetings in St. Paul's Methodist church, navy-blue flannel are made up with a Cincinnati, it is stated that 1,330 differ- kilt skirt, short draped apron and back ent persons have been at the altar as drapery, and a box-plaited pasque un-seekers and 1,023 have been converted, lined. The sleeves also are unlined.

FOR THE LADIES.

Metresa of the Robe and Maids of Honor to the Queen.

the robes, with £800 (and a clerk, a and eight ladies of the bedchamber. The duties of the latter consist in waitlime in rotation; thus each lady being called upon three times a year for this dress purposes. duty. Following these in rank are the eight maids of honor, who represent a very old institution in connection with royalty. In 1625, shortly after his marriage with Henrietta, of France, Charles I. issued the following rules for the guidance of the maids:" The queen's maids of honor are to come into the presence chamber before 11 of the clock and go to prayers; and after prayers to attend un il the queen be set at dinner. Again, at 2 o'clock there to remain until supper time. And when they shall be retired into leave asked of the lord chamberlain of her majesty, and that the mother of the maids see all the orders concerning answer to the contrary." Nowadays the queen's maids of honor do not two at a time for one month, to attend on her majesty. After these in rank stand the eight bedchamber women who serve in rotation in the same man ner, and are only expected to serve on the state occasions. Henrietta, Duchess of Suffolk, in one of her letters, gives an interesting account of the duties of these "women" in her time, waiting before she was dressed. The ier majesty shifted at noon, the bedchamber lady being by, the bedcham-ber woman gave the shift to the lady without any ceremony, and the lady put it on. Sometimes likewise, the bedchamber women gave the fan to the lady in the same manner; and this was all that the bedchamber lady did about the queen when she was dressing. When the queen washed her hands, the page of the back stairs brought and set down on the sidetable the basin and ewer. Then the bedchamber woman set it before the queen and knelt on the other side of the table over against the queen, the bedchamber lady only lookng on. The bedchamber woman poured the water out of the ewer upon the queen's hands. The bedchamber woman pulled on the queen's gloves when she could not do it herself. The page of the back stairs was called in to put on the queen's shoes," etc. All this is now obsolete; the situations are quite honorary so far as work is concerned. The salaries of the m aids of £300 per annum each. - Chambers'

Other large flowers are likewise utilized by embroidery for pleted.

Habits of Siberians,

Many of the habits and customs of these people are very singular. Along with much rudeness and simplicity, they have a high degree of ingenuity. At night, for instance, an Ostiak can tell the time very accurately by judging the position of the Great Bear; and as this constellation is constantly varying with the sesson, the operation involves on the part of the Ostiak a calculation to return into the said chamber, and of some magnitude. In common with all barbarous and semi-barbarous races, they manifest great dextertheir chamber, they admit of no man ity in the use of weapons. In shoot-to come there, and that they go not at ing small animals such as squirany time out of the court without rels, hares, etc., for the sake of their furs, care is taken that the animal shall be struck on the head only; and in this the natives seldom fail, even the maids duly observed as she will though their rifles are very clumsy in construction. With the bow and arrow, which is the weapon most in use, they have such restrictions placed on their liberty, and merely take their turn, of capturing salmon, as described by a Cossack officer who witnessed it, is pe culiar, la marching through the country at the head of a detachment, he encamped one evening on the banks of a river; and on the following morning he observed one of the natives walk to a pool near at hand, into which he waded, and then stood motionless as a statue, his spear poised aloft, and his The bedchamber women came into keen eyes fixed on the water before him. Not a movement indicated that queen often shifted in a morning. If life inhabited the figure, until, with lightning rapidity the spear was launched forward and as quickly withdrawn, a fine salmon quivering on its barbed point. Three times in twenty minutes was this operation performed, and each time a fish rewarded the native's skill. And yet their eleverness is but slightly applied to the arts of life. The Tungooses, for instance, use bear and reindeer skins to form their the art of tanning, these articles when not in use are buried beneath the snow, by which means the hair is prevented from falling off. This same tribe, too, are remarkably improvident; they will consume nearly a week's provisions in one night, and go hungry the remaining six days. Over against this, however, must be placed their detestation of robbery, which is regarded by them as an unpardonable sin .- Chambers' Journal.

Man the Unsatisfied Animal. Granted that man is only a more highly developed animal; that the ring-tailed monkey is a distant relative who has gradually developed acrobatic tendencies, and the humpbacked whale a far-off connection who in early life took to sea-granted that back of these he is kin to the vegetable, and is still subject to the same laws as plants, fishes, birds and beasts. Berry buttons are used in jet and Yet there is still this difference between man and all other animals-he is the only animal whose desires increase as they are fed; the only animal that is never satisfied. The wants of every other living thing are uniform and fixed. The ox of to-day aspires to no more than did the ox when man first yoked him. The sea gull of the English channel, who poises himself above the swift stream, wants no better food or lodging than the gulls who circled round as the keels of Cæsar's galleys first grated on a British beach. Of all that nature offers them, be it ever so abundant, all living things save man can only take and only care for enough to supply wants which are definite and fixed The only use they can make of addi tional supplies or additional opportu-

Something in the Eye.

Wash out with water if possible, or have some friend turn the upper lid wrong-side out over a pencil, and this will usually discover the object, which can be removed by a blunt pointed pencil or penholder. To turn the lid over the person must look down while stockings are artistic in the highest de-gree.

the operator takes the eyelashes be-tween thumb and finger and reverses the new satines, and in fact all the lid. When a particle of steel or other substance is imbedded in the eye itself a physician must be sought at once.-Dr. Foote's Health Monthly.

Kansas Praising It.

"While I was in Topeka last winter, said the Hon. Arthur Edgington, "I had a pretty rough time of it I got a bad cold and then, that not being sufficiently severe I was also attacked with rheumatism. The pain was in my left shoulder. At times I almost writhed in agony. I tell you, sir, that the pain could not have been greater had my shoulder been screwed up in a vise. was utterly helpless, and felt like I was extined to remain in that condition indefinitely. My friends and a physician were generous in their prescriptions and my room soon became a miniature apothecary shop But nothing did me any good. One day some one told me I was enduring a great deal of needless pain when I could invest fifty cents in a bottle of St. Jacobs Oil and be cured. I invested in a bottle of the Oil, rubbed it on my shoulder twice, and in two days forgot that I ever had rheumaism. Yes, that is a great remedy, and no mistake. They can't say too much in favor of its healing power."

The above was uttered by Mr. Edgington while sitting on the porch of the La Gonda house, at Columbus, the other evening, and was overheard by an escaped reporter, who s traveling over the country incog. quiry developed the fact that Mr. Edgingon is one of the most widely known men in Kansas, figuring prominently in politics, and acting as the responsible agent of the Bradstreet Commercial Agency. Upon subsequently making Mr. Edgington's acquaintance the reporter was assured that all he had heard was true, and he was at liberty to use it in the papers .- [Oawego

HEALTH RESTORER.

Purifies the Blood, Renovates and Invigorates the Whole System.

General Debility.

Debility is a term used to denote a deficiency of blood. The nutritive constituents of the blood are in less than their regular peoportion, while the waters part is in excess. Debility is of frequent secureties. It is incident to a variety of diseases. The lowest income the incident to a variety of diseases. The lower limbs are apt to be swellen. The patient is feeble and cannot bear much exertion. The patient is feeble and cannot bear much exertion. The patient is feeble and cannot bear much exertion. The circulation is irregular, but almost always weak. Palpitation of the heart is a very common symptom. Violent canotion often throws the heart into the most timourtions action. The wind functions are languidly servermed. The wind functions are languidly performed. The wind functions are target in diminished: latigue follows moderate or slight exercise. The breathing, though quiet when at rest, becomes hurried and even painfully agitated under exertion, as in running, ascending beights, etc. The nervous erstem is often greatly disordered. Vertigo, digramess and a feeling of faintness are very common. Violend and obstinate mearable pains in the bead, side and breast, or other parts of the body are also frequent attendants mism the disease. The secrotions are sometimes diminished. In females the meaness are almost always either suspended or very partially performed. The bile is scanty, and costiveness, with subscaling evacuations from the baseds, and dyspeptic state of the atomach, are extremely common symptoms.

Disease of the Blood.

BALTISIONE, Md., April 28, 1879.

1/m. D. H. Brevens-Dear Sir I have suffered for bout two years with a disease of the Blood, and after about two years with a disease of the Biood, and also using different remedies, but fishing two relief, I was induced to try Venkrisk. After taking two bottles I was entirely cured. I have recommended it to all my frience, and between it to be theises medicine of the kryd in use. Yours truly, LEANDER LUSBY.

EVERYBODY WANTS IT! EVERYBODY NEEDS IT

THE SCIENCE OF LIFE, OR, SELF. PRESERVATION.
Is a medical treatise on Exhausted Vitality, Nervous and Physical Debility, Premature Decline in Man; is an indispensable treatise for every man, whether young, middle aged or old.

THE SCIENCE OF LIFE: OR. SELF-PRESERVATION,
Is beyond all comparison the most extraordinary work on Physiciogy ever published. There is nothing whatever that the married or single can either require or wish to know but what is fully explained.—
Toronto Globe.

THE SCIENCE OF LIFE; OR, SELF.
PRESERVATION.

Instructs those in health how to remain so, and the invalid how to become well. Contains one hundred and twenty-five invaluable prescriptions for all forms of scute and chronic diseases, for each of which a first-class physician would charge from \$3 to \$10.—London Lancet.

THE SCIENCE OF LIFE: OR. SELF-PRESERVATION.
Contains 500 pages, fine steel engravings, is superbly bound in French innain, embossed, full git. It is a marvel of art and beauty, warranted to be a better medical book in every sense than can be obtained elsewhere for double the pitch, or the money will be retanded in every instance.—Author.

THE SCIENCE OF LIFE; OR, SELF-PRESERVATION,
Is so much superior to all other treatises on medical subjects that comparison is absolutely impossible,—
florion Herald.
