FOR THE LADIES.

News and Notes far Woman. There are three women doctors in Portland, Me.

Of the 1,150 convicts in the Ohio penitentiary, but seventeen are women. There are now employed in the pub-lic schools of Massachusetts 8,861

teachers, of whom 7,727 are women. The next annual meeting of the

American Women Suffrage association will be held in Omaha, Neb., early in October.

Dr. Mary F. Thomas, of Richmond Ind., read a paper on employing lady physicians in hospitals for insane women, before a convention of regular physicians recently.

The Woman's Ohristian Temperance union of Des Moines recently purchased two acres of land north of the city, and will prepare a home for fallen women in the building now on the property.

Mrs. Emma B. Knight canvassed Inavale precinct, Webster county, Neb., for signers to the petition asking men to vote for the impartial suffrage amendment, and out of thirty women seen in one day twenty-nine signed it.

Mrs. Ida M. Bittenbender, of Osceola, Neb., president of the Nebraska Woman Suffrage association, has been admitted to the bar as practicing attorney. The judge, in admitting Mrs. Bittenbender, at the close of the questioning, spoke in the highest terms of the manner in which she had passed the ordeal, stating it was far above the average. All the attorneys present freely admitted it was the best examination they had ever witnessed.

At the wedding of Prince Leopold you can do to-day. Princess Beatrice was called upon to, sign her name in the register. She gave her bouquet to the Bishop of Lon-don to hold, and then she quite forgot to reclaim the fragrant burden from the right reverend divine. "In his di-lemma," says the London World, "the bishop turned to the lord chancellor, who was standing near him, and having consulted the highest legal authority in England on the subject, the bishop decided to retain possession of the same."

Mrs. Mary Beecher is forewoman of a department containing 200 girls in the Naugatuck (Conn) Rubber Shoe company, with full power in reference to engaging and discharging help. Although all the other rooms of this large estaolishment are in charge of men hers is admitted to be the best conducted. She apparently does very little watching, having work of her own to do, such as looking over the shoes be fore they are packed, making "samples," and getting up new designs. But many a girl who gets behindhand is quietly helped forward by the deit and tireless fingers of the forewoman; and thus helped and encouraged, the large number under her supervision give entire satisfaction. Mrs. Beecher is said to have an interest in the firm.

Fashion Fancies.

Lunar dots are the latest. Terra cotta shades are very fashionable. Japanese costume: are rivaling the

Greek dress in the favor of London mathetes.

Fruit blossoms, cherry blooms especially, are exceedingly popular in millinery.

White "Indiana" silk is a sheeny or young girls.

WISE WORDS.

Happiness is something to hope for and something to love. Pleasure is the more accident of our

being, and work the most natural and holy necessity.

Idleness is hard work to those who are not used to it and dull work for those who are.

More helpful than all wisdom 18 one draught of simple human pity that will not forsake us.

We do not judge men by what they are in themselves, but by what they are relatively to us.

Nature never sends a great man into the world without confiding the secret to another soul.

Wit is sometimes like a sword, keen and cruel, sometimes like a sunbeam, bright and genial.

A moment is but a brief and fleeting passage, yet how often are vast interests secured or lost in that circle of time.

Instead of complaining of the thorns among the roses, we should be thankful there are roses among the thorns.

As pure and fresh country air gives vigor to the system, so do prre and fresh thoughts tend to invigorate the mind.

He that is proud eats up himself ; pride is his own glass, his own trumpet, itself but in the deed, devours the deed. in the praise.

Know the true value of time; snatch, seire and enjoy every moment of it. No idleness, no laziness, no procrastination; never put off till to-morrow what

A Remarkable Man.

If an Irish bull may be excused in speaking of Irish affairs, it may be truly said that the first man to raise a vigorous hand against the land league in Ireland and to set afoot a systematic agitation in favor of the landlords is a man of ancient Irish blood who has neither hands nor feet of his own. Arthur MacMorrough Kavanagh, who is the leading spirit in the land association, is a grandson of the second Earl of Claucarty, through the marriage of the earl's daughter, Lady Harriet Margaret Trench, with Thomas Kavanagh, of Borris house, in Carlow. Nature gave him some six inches of muscular thigh stumps and some four inches of arms, but neither hands nor feet. A local tradition had declared that the Borris estates would pass to a monster within a twelvemonth from the finding of a human hand. The gossips grew gloomy when a bunch of wigs on a bow strikingly like a human hand was found on the road near the house not very long before the elder brother of Arthur Kavanagh was to come of age. The death of the heir soon followed. Within three months a second brother died, and the third son "the monster" took the estate. Mr Kavanagh, despite his terrible deformities, is a thoroughly educated man, and has mastered not a few athletic accomplishments. He not only writes an excellent hand, holding his pen in his mouth and guiding it with his arm-stumps, but he is a capital draughtsman. He rides well to hounds, drives skillfully, is a fair shot and a devoted yachtsman. Some years ago he published a very interesting volume, "The Cruise of the Eva." In 1866 he

was elected to parliament as a thoroughmaterial much used for evening dress going conservative, though if any man may be expected to find fault with The latest shade for evening wear is things as they are, it is a man so handicommissioners in 1880. Furthermore he is married to a charming woman and is the father of a family. - New York World.

Lameness in Horses,

Dr. D. D. Slade, professor of agricul-tural zoology, Harvard university, gives in the American Agriculturist a very full account of the symptoms that will enable owners of horses to detect different varieties of lameness and their treatment. He says :

Shoulder lameness is frequently due to a strain or to direct violence, and is shown in repose by the hanging of the limb, from disinclination to move the museles, and during motion by the dragging and difficulty to bring forward the limb, which is done by a rotatory movement. It is also shown by the flinching when the foot is lifted and carried forward and backward. The positive signs before mentioned may or may not be present. If the elbow is affected, there will be a singular "hanging" of the limb and excessive nodding of the head in motion.

In splint, lamesness is usually much increased by exercise. Pressure on the limb shows tenderness, and there is increased heat, with more or less swelling. A small splint in developing may give much more pain, shown by lamoness, than one fully formed. Ring bones and ossified side cartilages, in their early stages, may be recognized as causes of a peculiar stiffened gait, with the weight thrown upon the heels. The lameness

nearly or entirely disappears before the bony deposit appears about the middle his own chronicle, and whatever praises and lower pastern. Strains of posterior and other ligaments and tendons of the lower limb evidence themselves by the local symptoms and alteration in gait. But there are cases of temporary lameness, from very obseure causes, attribut. able only to a sudden strain of some ligament whose exact situation can only be surmised.

The short, quiet step of the horse, with that inflammation of the feet known as chronic laminitis in which the weight is thrown upon the heels of the fore limbs, is easily recognized. In the less frequent affection, navicular discase, the weight is thrown upon the toes, the gait is short and the lameness. slight at first, is increased by exercise. Corns are discovered by rapping and pinching the sole, at the space between the bors and the quorters in the fore feet. Disease of the frog is self-evident by the peculiar odor. A sand crack sufficient to produce lamenece cannot escape observation. Accidental injuries to the feet will generally be known by the history of the case. Lameness in and about the hip joint is most requently the result of strain, and is to be recognized by the peculiar want of movement of the hind quarter, and if of long standing, by the wasting of the muscles of the region. Stifle joint lameness, either the result of laxation or of disease, may be known by the dragging of the toe, and by the local symptoms. Bone spavin is mannested by positive signs, but more especially by the stiffness in the bending of the hock joint and by the dragging and sudden catching up of the limb, and above all by the disappearance of all lameness during exercise, to reappear after rest. Bog spavin, a disease of the true hock joint, gives rise to a similar lameness.

Chinese Proverbs.

Many of the Chinese proverbs have their counterparts in English; the difference of expression, however, being in many cases obaracteristic. 'Throw a trap to catch a whale," is rendered, "Throw a brick to allure a gem." "Not to cry s inking fish," is rendered in Chinese : "The melonseller declares his melons sweet." "Take care of the pence, called "dawn," and is a delicate rosy pink, just tinged with gray. capped in the race of life as he. He has been high sheriff and lord lieutenant of selves," becomes, "Count cash as though been high sheriff and lord lieutenant of his county, and was one of the land commissioners in 1880. Furthermore he rolling stone gathers no moss," is translated, "The swallow plastering its nest is labor lost,"-this being a very happy allusion to the migratory habits of that bird. "Preparing is preventing," an old English expression, has its counterpart in "Get the collin ready and the man won't die;" while "Too many cooks spoil the broth" is rendered by the curious expression, "Seven hands and eight feet." "There is a black sheep in every flock" becomes, "Crows are black all the world over." And the oft-quoted sayinof "Robbing Peter to pay Paul" as sumes the form, "To pull down the western wall to repair the eastern.' Speaking of the scarcity of good men, the Chinese raying: "There are two good men; one of them is dead and the other unborn.'

THE IMPENDING PATE.

An Interesting Chapter from the Life of a Proving the part from the Life of a Proving and Hastanian. (Hoston Giobe.) The readers of this paper were more or less amazed at a most remarkable statement from one of our leading eliticens which appeared in yesterday's lesue. So unusual were the cir-cumstances connected with fit, and so much com-ment did to occasion on the streat and in accident cumstances connected with it, and so much com-ment did it occasion on the street and in social circles, that a representative of this paper was commissioned to investigate its details and verify its facts. The article reforred to was a statement made by Mr. B. F. Larrabee, of the New York and Boston Dispatch Express com-pany, whose office is on Arch street. Mr. Lar-rabee was found by the newspaper man in his private office, and on being questioned, said: "Well, sir, logically I have been dead, but really I am as you can see me. A little over a really I am as you can see me. A little over a year ago I was taken sick. My trouble was not severe at first and I thought it was the result of severe at first and 1 thought it was the result of a slight cold. Somehow I folt unaccountably tired at times, although I took an abundance of sleep. Then, again, I had dull and strange pains in various parts of my body. My appe-tite was good one day and I had none whatever bars 245,000, the next, and my head pained me much of the time. A while afterward I noticed much that time. A while afterward I noticed much that was peculiar about the fluids I was passing and that a sediment, soum and a strange accumu-lation appeared in it. Still I did not realize that these things meant anything serions and I allowed the illness to run along until on the 28th day of October I fell prostrate while walk-ing along Tremont street. I was carried home and did not go out of the house until the mid-dle of December. I then went down town and attempted to attend to my business until the 18th of last January, when I was taken with a very severe relapse. My symptoms were ter-rible. I was fearfully bloated; I suffered se-vere pains in all parts of my body and it was almost impossible to get my breath. For six days I never laid down and never slept. I was constantly attended by my regular physician, Dector Johnson, and Dector Bowditch also came to see me nearly every day. There was no doubt that I was enforting there the Doctor Johnson, and Doctor Rowditch also came to see me nearly every day. There was no doubt that I was suffering from Bright's disease of the hidneys in its worst form and last stages, accompanied by other troubles in my liver and heart. In spite, however, of the skill of the physicians, I kept growing worse, and finally they tapped my side in the vicinity of the heart, taking away forty-six ounces of water. This relieved me for the time, but J soon became as had as before. Then the doc-tors gave me up entirely, declared I could not soon became as had as before. Then the doc-tors gave me up entirely, declared I could not live more than twenty-four hours, and my daughter, who was reaiding in Paris, was tele-graphed for. Still I lingered along for several weeks, far more dead than alive, but never giving up hope. One night -it was on the 20th of April, I very well remember--my attendant, who was reading to me, began an article which described my disease and sufferings exactly. It told how some severe cases of Bright's dis-ease had been cured, and so clearly and sensi-bly did it state the case that I determined to try the meaus of cure which it prescribed. So I sent my man too the drug store, procured a I sent my man too the drug store, procured a bottle of the medicine unknown to my physi tians and friends, and took the first dos o'clock. At that time I was suffering intense-ly. I could not sleep; I had the short breath-and could scarcely get any air into my lungs. I was terribly bloated from head to foot, and the was terribly bloated from head to foot, and the motion of my heart was irregular and painful. The next morning I was able to breathe freely: the pain began to leave me and the bloating decreased. I continued to take the medicino, and to-day, sir, I am as well as I ever was in my life, and wholly owing to the wonderful, almost miraculous power of Warner's Safe Kid-ney and Liver Cure. I do not know what this medicine is made of, or anything class about it, but I know it saved my life when I was given up by the doctors and had really been dead for weeks: that it has kent me in perfact health up by the doctors and had really been dead for weeks; that it has kept me in perfect health ever since, and has cured many of my friends to whom I have recommended it. There are a number of very remarkable cases in Lynn and Salem, as it in this city, that it has cured. My recovery is so remakable that it has excited much attention, and physicians as well as others have investigated it thoroughly. I am glad they have, for I feel that the results of such a wonderful cure should be known to the thousands in all parts of the land who are anfthousands in all parts of the land who are suf-fering from troubles of the kidneys, liver or heart, in some of their many daugerous forms." The representative of the press thanked Mr. Larrabee for his very frank and clear state-ment, and was about to leave the office when a compared to be and the two and indical if the

ment, and was about to leave the office when a gentleman stepped up to him and inquired if he were seeking information about Mr. Larrabee's sicknoss and recovery. The scribe replied that he was, whereupon the gentleman said: "And so am I, and I have come all the way from Chicago for that very purpose. Kidney troubles seem to be alarmingly increasing all over the country and I have a were near releover the country, and I have a very near rela-tive who is afflicted much as Mr. Larrabee was, I have been to see the physicians of whom Mr. Larrabee speaks, and I tell you, sir, it is sim-ply wonderful." Larrabee no see the physicians of when are, larrabee speaks, and I tell you, sir, it is sim-ply wonderful." "What did they say?" asked the man of news. "Say ! why, sir, they fully confirm everything Mr. Larrabee has stated. I went to see Dr. D. A. Johnson, at 20 Worcester street. He was absent when I called. and so I stepped into the Commonwealth hote, where Mr. Larrabee was living at the time of his sickness. Mossra. Brugh & Carter are the proprietors, and I asked them about Mr. Larrabee's case. Mr. Brugh pointed to the electric annunciator and said, "Why for weeks and weeks every time that bell rang I said: That means the death of Mr. Larrabee. No one around the hotel ever dreamed that he would recover, and when the doctors would come down from his room they would sbake their heads and say there was no hope. The arrangements for the funeral were made and his recovery was simply a miracle." "I then called on Dr. Johnson, who said that Mr. Larrabee's case was a very remarkable one. He was his family physician and expected his death every hour for a number of weeks and never called to see him during that time but be was prepared for it. The doctor said the recovery was due to Warner's Safe Kidney and Liver Oure, and if he had friends, male or female, troubled with Albumen or any kidney troubles he should certainly advise them to use this remedy. Dr. Johnson said kidney difficulties are more common than most people think, and that many symptoms which are supposed to be other discases arise from the kidneys. He said that ladies after gestation are specially subject to albumiuous troubles which require prompt attention. **AXLE GREASE** B. st in the world. Get the genuine. Ho said that ladies after gostation are specially subject to albuminous troubles which require prompt attention. "Well, I then came down and called on Dr. H. Ingersell Bowditch on Boylston street. The old doctor was inclined to be reticent, but fully confirmed all I had previously learned. He had attended Mr. Larrabee, and supposed him beyond all hope, and he was afterward restored, as he said, by Warner's Safe Kidney and Liver Cure. "I next went to see Dr. Melvillo E. Webb, at the Hotel Chuv, for you see I was determined SEND 25c. in stamps for 6 Blinds Ajar Releiners, which obviate strings. Acam BLINDS-AJAR GO., 735 Broadway, New York. Country Agents wanted. "I next went to see Dr. Merville E. Webb, at the Hotel Chury, for you see I was determined to be thorough in the matter. I found Dr. Webb a most clear-headed and well-informed gentleman, and he said: "I know of Mr. Larrabee's case from having YOUNG MEN If you want to learn Telegraphy in a new months, and be certain of a situation, address Valentine Bros., Janesville, Wis, ARD-A handsome set of cards for 3c. stamp. oliectors. A. E. BASSETT, Rochester, N. Y. genticman, and he said: "I know of Mr. Larrabee's case from having thoroughly investigated it as a medical direc-tor of a life insurance company, and it is one of the most remarkable cases I have ever met. Mr. Larrabce had all the manifestations of a complication of diseases, and in their worst forms. He had albumen and casts in the urine. aud a terribly diseased liver and sulcen. In-deed, he was so bad that he threw himself upon the floor, and, with his head upon a hasseck, struegled for breath. It was on the night when he was so bad, and whon all his medical adviser-had long given him up, that he began using Warner's Bais Kidney and Liver Cure. The next morning at 10 o'clock he was able to breathe freely, and has been ever since. I sub-jected him to the most thorough examination possible, after his recovery, and "I can't flod out about him." His kidneys, liver, lungs and heat are perfectly well and sound. I can only add that, from what I have seen, I would un-heattatingly recommend this remedy." The conclusions from the statements above made which come to the newspaper man as well as the general public, must be two-fold. First that a modern miracle of heating has been per-formed in our midst, and that, too, by the simplext means and one which is within the that a modern miracle of healing has been per-formed in our midst, and that, too, by the simplest means and one which is within the reach of every one. It should be remembered that Bright's disease is not usually a suddan complaint. Its beginnings are slight and its growth alsw. The symptoms by which it may be detocted are different with different persons, no two people usually baving the same. This fact was manifest in the case of Mr. Larrabee, and he had no idea of the terrible complaint which had attacked him until it became fixed upon him. Secondly, testimonisis of such high character and so ontspoken in tons, conclu-sively prove the value of the remedy and its

superior nature to the proprietary articles with which the putlic have been flooded. "The greater includes the less," and the remedy which has been proven so valuable and has saved a life after it was brought down to desith's door, must unquestionably be certain in all minor troubles which are so disaatrous unless takes in time. taken in time.

Cardinal parasols are decidedly fashionable, a freak which will probably prove profitable to the oculist.

It is the correct thing to have the whole costume en suite, and fans as well as parasols are shown to match sateen, foulard and brocade dresses.

Ruches of silk, pinked out on the edges, or else cut bias and fringed out, are again in fashion for trimming dress-They should be very full to look well.

A new bow for the garniture of dresses has three colors of ribbon in it such as blue, red and bronze when dark shades are used, while for lighter bows pink tilleul green and sky blue are combined.

The new colored veils of chenille dotted talle add a gay touch to the costume, but they require the flowers or feather garniture of the small bon net and are not becoming to the face in warm weather.

Light colored grenadine dresses are again in fashion. Turquoise blue, Nile green and lavender shades are chosen for young ladies. They are trimmed with silk laces, and worn with many natural flowers.

The design for a pretty fan, for which a prize was awarded to a young Japan-ese artist, shows four different views, representing the foliage of the different seasons. Held in one way the fresh green leaves of spring are seen; another view of this side shows the rosy blush of summer blossoms. On the opposite side are drifting red autumn leaves, while in another view there is seen a lone bird on a bare bough amid the falling snow.

Jaunty looking corsages for young girls are shown, made of tinted satin, nun's veiling or French muslin, adorned throat, with Marguerite sleaves reaching to the elbow. In front they are open all the way down, but laced together over a chemisette of silk embroidered tulle, with silken cords the color of the corsege material. For older persons this style is reproduced in fabrics of velvet or moire. . .

An elegant dress for a brunette is the same shade, with a border and pan- air.-London Truth. els of darker red roses clustered together without foliage. Another, also for a brunette, is of yellow satin with a lace overdress and cordons of yellow roses with foliage of dark brown leaves.

A man sued an Ohio editor for \$10,-000 damages and was awarded one cent. Bicomington Eye.

The Retort Courteous.

The late Colonel W. B. Snowhook, an old and weil-known Irish lawyer of Chicago, though of advanced years, never showed gray hair nor confessed to being an old man. Some years ago Mr. Charles McDonnell, an old oitizen, still among the living, who was a practicing lawyer at that time, was counsel in a case on trial in which Colonel Snowhook was counsel on the other side. In their closing arguments, before giving the case to the jury, Mr. McDonnell having concluded his speech, Colonel Snowhook spoke:

"Your honor, and gentiemen of the jury," said the coionel, "I am surprised that the counsel on the other side,

whose gray hairs indicate his age, and onght to indicate his wisdom, should make the statement he has made"-and then proceeded with his argument.

Mr. McDonnell followed. "Your honor, and gentlemen of the jury," he said, "I acknowledge the reference of counsel of the other side to my grey hair. My hair is gray, and it will coutinue to be gray as long as I live. The hair of that gentleman is black, and will continue to be black as long as he dyes.' - Chicago Journal.

Learning to Swim.

There really is no mystery in learning o swim-an accomplishment which is possessed in perfection by the most stupid of frogs. More than once I have

explained how any one can tea h himself. The trunk, less the a ms, is heavier than water; with the arms it is to be worn over shirts of white surah. nun's veiling or French muslin, adorned with embroideries. They are high at the in the breath when he is preparing to make a stroke, and expelling the breath while he is making it. Let any one do this and keep calm, and he will find that he can swim. But, perhaps, it is better to acquire confidence by a preliminary course of floating. To do this it is only necessary to lie flat on the water, stretch out the arms with the

paims of the hands downward, throw back the head, and whenever the body made of copper red tuile over faille of sinks low, slowly to fill the lungs with

The advisability of a Baptist ecumenical conneil is under consideration. A committee appointed last year to consider the matter have reported unfavor-ably, on the ground that the Baptists are not ready for it. The report after a long discussion was laid on the tablo, It beats all how accurately a jury will from which it would appear that the occasionally size up an editor's pile.-- sentiment of the meeting at least was in sentiment of the meeting at least was in favor of the council.

" Biz," a Commercial Name,

"I never was in favor of war," said an old Arkansawer, "but I notice that some of the world's greatest men are not of my opinion. Now there's old Trademark. He's a great man, and he believes in war." "Old who?" asked a bystander.

"Old Trademark."

"Who the deuce is Trademark ?"

"No wonder they call us ignorant when such fellars as you show your lack of schoolin'. Didn't you never hear of the great German military man, Trademark ?"

"I've heard of Bismarca."

"That's a fact. 'Biz'-mark. I knowed that it was some sort of a commercial name."

wise and good, and secret and just, ingenious and honest, and in those things which have a latitude use your own

also as a preven ive against four various torms, also as a preven ive against fover and ague and other intermittent fevers, the "Ferro-Prosphor-ated Elixir of Calisaya," made by Caswell, Hazard & Co., New York, and sold by all Drug-gists, is the best tonic; and for patients recover-ing from fever or other sickness it has no equal.

25 Cents Will Bay Treatise upon the Horse and his Diseases. Book of 190 pages. Valuable to every owner of horses. Fostage stamps taken. Sent post-paid by New York Newspaper Union, 150 Worth Bireet, New York.

Let it be un derstood once for all that Carbo-line, a deodorized extract of petroleum, will positively restore hair to bald heads, and there is no other preparation under the face of the sum that can accomplish this work.
