-Reports from the big woods are to the effect that they are full of hunters, and the like of it was never known before. Nearly all of the hunters are foreigners, mostly from Ohio, and there is one consolation, they will soon have to leave as the season expires in a short time, and wee be to him who continues to slaughter deer after that. We hope the citizens of the different localities will rigidly enforce the law.

-Supt. Hillard is busily preparing for the Teachers' Institute, which will convene in this place one week from next Monday, 18th inst. He assures us that if the coming institute does not eclipse all former efforts the fault will not be his. He has engaged some of the finest talent to be had in the country, and those who attend will certainly have a rare treat. It is to be hoped that the weather may be propitious and that all the teachers in the county will be present and come prepared to participate in the exermonwealth office since Luther Vought's | cises.

-The following item, clipped from Monday's Derrick, will be interesting to many of our readers: "Horace Fox, of Foxburg, Forest county, was married on Thanksgiving to Miss Addie E. The happy event will take place in the Baptist church on Thursday December 14." The above means our friend Geo. M. Kepler, who has our congratulations.

-In several localities in this county a fatal disease has been making sad inroads into the hog crop, some of the farmers losing nearly all of their stock from its effects. The result of this condition of things has been a demoralization of the market for dressed pork up to this time, and the indications are that many will be slow to make purchases during the season, through fear of getting a diseased article. As far as we have been able to learn no remedy for the trouble has been discovered, and the disease in nearly every instance proves fatal .- Brookville Repub-

-It was rumored on Monday that one of the numerous hunters near Marienville had been shot and killed by his partner while hunting bear last Thursday or Friday. We were unable to trace the report to a reliable source, and as we have talked with parties who came from there on Saturday, who had heard nothing of it, we judge it to be a false alarm. It will not be surprising, however, to hear that such an accident has actually occurred, when we consider the number of hunters now engaged in that section, and many of them green at the business and liable to shoot at the first moving object they see in the woods.

-It may not be generally known and a half miles, on Beaver creek. It has a complete locomotive and 8 or 10 cars, and is used for transporting logs and timber to Polen's and Wheeler & Dusenbury's mills. The train makes the run in about 20 minutes and does the work of 15 or 20 horses. It is said to work like a charm and is the pride of its projector, Mr. Polen. The locomotive is named "N. P. Wheeler," and those who have seen it say it is a little beauty. Mr. Polen has confined himself exclusively to manufacturing lumber for other parties since he came to this county, and has been universally successful. It is quite common to hear people say that when he takes hold of a job it will be "cracked through a-whooping".

-The Buffalo Express says that while the Buffalo, Pittsburgh & Western railroad is reaching out with the new Toledo line the report comes that it contemplates branching out in still another direction. An important scheme is on foot to develope the coal, iron and lumber fields of Clarion county, Pa., by the building of a road on the Allegheny river near Eagle Rock to New Bethlehem, Clarion Co., a distance of sixty miles. A company under the name of the Tionesta & Clarion Railroad Company has been organized, of which President Jones of the Buffalo, Pittsburgh & Western is President. This road would reach the famous fields of the Fairmount coal company at a distance of fiftyfive miles from Eagle Rock, while the distance via the Allegheny Valley Ry. is ninety miles.

-On the morning of October 30th, 1882, John Harries left his home in Reynoldsville. Since that time no tidings of him have been received by family or friends. No motive can be ascribed for his absence. Mr. Harris is a man 42 years of age, dark complexion, dark eyes, dark hair sprinkled with gray, and about 5 feet 8 inches in height. When last seen had on black coat and vest, brown overalls and broad brimmed black hat; is a stone mason by occupation. Any information concerning him will be gratefully received by his sorrowing wife, Mrs. Ann Harries, Reynoldsville, Pa. Exchanges please copy.

It is reported that the Squire Neil property has been bought by some parties from Mercer county. We are unable to state positively.

Since Fred, the blacksmith, left us we all have to go smooth shod, speaking from a Darwinian stand point. Our young men are all gone; Sunday school and preaching are things of the past; Griffin is away to stay awhile and we have no music lessons or singing schools; there is no good place to ride down hill unless you go ever-sofar; no magic lantern man comes this way; and there isn't much syort visiting the school. This isn't much of a place for fun.

Mr. Demunn is quite well again. School is going on nicely with a not very large attendance.

We notice that the directors of Alle gheny Twp., Venango Co., have just completed a very nice school house on the road between here and Pleasantville, on the hill on this side of Mr. Dinsmore's. We see only one fault with it: it is too small.

Squire Hotchkiss has not crossed the Rubicon in his "b'ar" count yet. He still lingers at ninety-nine. He expects to file a six-pronged notch for the bundreth one.

Forest Oil Operations.

From a reliable gentleman who has been in that section for some time, and knows whereof he speaks, we get the following items of interest concerning

drill on the north end of the Enterprise Transit Co.'s land, south of the of Silver preparations have done. It Cooper tract, and are building another will change light or faded hair in a rig in the extreme northeast corner of few days to a beautiful glossy brown. the same tract.

The Ash well, on the Stewart tract is liable to become a mystery. It was supposed to be dry and had apparently been abandoned, but last week the drillers approached the well from several different directions in order to throw off suspicion, and now the drill is again bouncing.

Vensel & Co. are drilling on subdivision 54 of warrant 3179, Jenks twp. This well is near the gas 'wells that Dr. Towler drilled last year.

The Gailey Bros, are putting up a rig on 3133, and J. Welch is putting up one on 5235.

The Grace well on 3193 is still drilling. So is the Shultz well on Lot 7 of the Cooper tract.

The Reno well is being watched anxiously by the scouts. It will be in this week, that is, if they want it to

The riots and ructions on the Cooper tract between the Anchor Oil Co. and Shultz, Dimmick & Co. are at present all quiot. 'Squire Cole has his office at Foxes, ready for business at a moment's notice.

We learn, also, that the Tionesta Oil Co.'s well, on 5211, Beaver Valley, is being closely watched by the company itself. It will be down this week, if no bad luck overtakes it.

All is quiet on Whig Hill, and the indications are that operations have been abandoned there, at least until spring opens.

In addition to the above the Derrick of Monday contained the following from the Cooper tract:

The difficulties of operating in the Cooper tract can only be realized by those who vist the place. It is remote from the railroad, being ten miles from Garfield and about the same distance from Sheffield. The roads lead over steep hills, and the little teaming that bas been done has cut them up until less than half a load can be hauled by a single team. One operator who located a rig last week said it would require until January to get the drill started, and he did not think very much could or would be done in there, even with good roads, before next spring, except to get rig stuff on the 6 February term, 1879. David Landers will have to put a ground. The probabilities are that five wells will be completed near and on the Cooper tract this month. The number may be less, but it cannot be greater. Those which stand a chance of being completed are: Shultz & Co's, on the Cooper; Reno oil company's, Patterson & Leedom's and I. A. Breuneman's on tract 2,735; Murphy & Co's and Anchor oil company's on 3,193. Clark & Foster are drilling on the Cooper, but it is scarcely probable they will reach the sand this month, and some of the others may be delayed by bad
