FACTS AND COMMENTS.

Utah Commissioner Pettigrew thinks that polygamy will die of itself. He has observed that the young men of education are not polygamists.

Oscar Wilde proclaims that next fall he will come back to America, then go to Australia, and ultimately to heaven. The Detroit Post would be very happy if he should make up his mind to reverse his route.

A cotton exposition, similar to that at Atlanta in 1881, is assured for this year at Louisville. Two hundred and fifty thousand dollars have been subscribed by the citizens, and the necessary building will at once be erected.

It having been assert d by the New York press that the \$75,000 damages awarded in the Fleming-Livingston breach of promise ease, recently decided in that city, were the largest ever given in a like case, St. Louis came to the front with a \$100,000 award rande some years ago.

New York is one of the most generous cities in the Union in supplying her school children with educational appliances. In estimating the relative sost of education per capita in various cities, it must be taken into account that New York gives education absolutely free to the pupil, supplies him with books, papers and pencils, while in many other cities this is not the case. The city's bill for school supplies during the past year was \$124,830.39.

A few years ago a wide field was open for young men in the telegraph offices throughout the country. Now young women take their places as operators to a great extent, and the young men have to seek other avenues of employment. According to the Scientific American, "mining and electrical engineering present a wide scope for capable young men, and there would seem to be a growing demand for skilled talent in either depart-

The Pall Mall Gazette tells a little story of an accident that happened lately at an election in a Queensland sugar district, where the planters were doing their utmost to return their candidate. The story is as follows: " Hang you, sir," cried an excited planter to a storekeeper, who was bold enough to support the anti-planter candidate, "didn't I bring my hands to your store and let you charge them what you liked for your rubbish? And now you vote against us!" "And hang, you, sir," retorted the unabashed store-keeper, "what if you did? Didn't I pay you twenty-five per cent for doing it?" The accusation was not denied.

The table which follows gives the value of the leading products of last year. The figures are significant of the country's vast wealth:

54,000,000

63,750,000

80,000,000

81,000,000

It is claimed that the American method of sending transatlantic mails is decidedly superior to that employed by the English. The government of Great Britain is under contracts at present to send its mails to this country by the White Star, Cunard and Inman lines. This prevents the employment of the fastest steamers on the ocean, such as the Alaska and Arizona, of the Guion line, and the Elbe, of the North German Lloyd. American merchants are permitted to designate the steamer by which their letters shall go, and in this way they are enabled to have their letters accompany any mer-chandise they may send. The English method places merchants at a disadvantage in this respect. While specially addressed letters are sent as directed it frequently happens that freight coming by a fast vessel arrives here several days in advance of the invoice which may have been sent on the same day by a slower boat.

Last year no less than 300 persons were killed and 1,000 seriously injured in and about the anthracite coal mines of Pennsylvania. Most of the accidents were occasioned by falls of roofs and explosions of fire-damp. The former were especially fatal, and they have recently become a frequent occurrence, owing to the great rush in the collieries whenever the work of mining is brisk. There were twentyseven more deaths from accidents in the mines last year, than in 1881. Many of those injured never recover. Some have arms and legs torn off, and others are maimed and crippled in various ways. During the last two years 573 persons were killed and 2,024 were injured in and about the anthracite collieries of Pennsylvania. This has caused great distress and misery in many humble homes, and the Philadel-phia Times thinks "if it is possible to provide some plan by which the business could be robbed of its perils, it is the part of statesmanship to do so."

The astronomical discoveries of 1882 were larger than for many years, and included no less than eleven planets, raising the total to 281, and three

Three hundred and seventy-five thousand persons work underground in Great Britain.

Thurlow Weed at Home. Concerning Thurlow Weed, the Warwick of American politics, the world has long had intimate knowledge, but Thurlow Weed, the practical philanthropist, was comparatively unknown even to his most intimate assoclates. Whatever may have been true of his earlier and more active days, when he was the power behind the throne, and one of the most potent of all agencies in public affairs, it is certain that the last two decades of his life were crowded with kindly deeds. His home in West Twelfth street, New York city, was the resort of the stricken in purse and spirit, no less than the Mecca of aspiring politicians. Years ago-and for years-there was a sight to be witnessed every Saturday afternoon in front of the Twelfth street home not to be seen anywhere else in New York. It was a score or so of little girls, all of cleanly appearance, but all giving evidence of poverty in their dress, who were weekly applicants for his bounty, and no one of whom ever went away from his door empty-handed. Once when a committee of one called at his house on a Saturday afternoon with a carriage, to request his attendance at the first reception of the New York Press club, a throng of these little ones were before his door. Mr. their dress, who were weekly appliwere

before his door, Mr. was Weed expressed the pleasure it would give him to meet the working journalists of the city, or as he expressed it, "the boys in the harness;" but, he added, "you must wait until I feed my chickens." After the children had been loaded with his gifts, he proceeded to the rooms of the Press club, where, by the way, he gave some good advice to those who were only entering upon the road he had traversed to its end. He frankly admitted that day, as he always did in his declining years, the great changes which had been wrought in journalism since he was an active member of the profession. No man knew better than he in his later years that the newspaper had become the vehicle of information rather than of opinions. As he once tersely put it, "the world don't care what an editor thinks about a fact,

but it does care a great deal for the fact itself." Yet there was never a more omnivrous reader of newspapers, although orous reader of newspapers, although latterly he used the eyes of another instead of his own, and usually those of the daughter who devoted her life to him. It was not only political news that claimed and obtained his attention, but all the record of events, great and small, that combine to make up the daily journal. The knowledge of this character came to the knowledge of a reporter for a daily paper in a peculiar way some years ago. The reporter had been detailed to a case of distress which had been reported to porter had been detailed to a case of distress which had been reported to the office. In the performance of this duty he encountered one of those pictures of misery which can only be seen in a great city of startling contrasts like New York. It was a bitterly cold night in the latter part of November, and in a room on the top floor of an East side tenement-house, in which there was neither fire nor food and no furniture save two remnants of chairs, a woman was found with two little a woman was found with two little children. The next morning a description of the scene was given in the newspaper, together with a short state. a woman was found with two little newspaper, together with a short statenewspaper, together with a short state-ment of the cause of her misfor-tunes. That afternoon a second call months, but that was the best that could be tunes. That afternoon a second call was made for the purpose of giving done. Around the bottle was a newspaper, Now a newspaper was a rarity in our home,

office for her relief, and she was then found in comparative comfort. A stove had made its appearance, there was a supply of coal, the closet had been filled with provisions, and mother been filled with provisions, and mother and children had been provided with stout shoes and warm stockings. The woman gave a description of her benefactor so full and correct that the reporter had no difficulty in recognizing Mr. Weed. When that afternoon inquiry was made of him as to the fact, Mr. Weed admitted that he had "helped" thing else failing, the next morning I dispatched one of my boys to the nearest rail road station, many miles distant, to obtain a bottle of the Safe Cure. The druggist said the demand for the Cure was so great he could not keep it in stock, and be had to zend to Kansas City for more. It was more than inquiry was made of him as to the fact, Mr. Weed admitted that he had "helped" thing else failing, the next morning I dispatched one of my boys to the nearest rail road station, many miles distant, to obtain a bottle of the Safe Cure. The druggist said the demand for the Cure was so great he could not keep it in stock, and be had to zend to Kansas City for more. It was more than inquiry was made of him as to the fact, Mr. Weed admitted that he had "helped" the could not keep it in stock, and be had to zend to Kansas City for more. It was more than inquiry was made of him as to the fact, Mr. Weed admitted that he had "helped" the could not keep it in stock, and I was all year. been filled with provisions, and mother Mr. Weed admitted that he had "helped look, half of scorn, half of pity, as much as the women a little," but exacted a to say,

burgh school of medicine, found a carefully made wedge of flannel impacted firmly in the pharnyx, completely se-cluding the glottis, and inducing

speedy suffocation. In an attempted suicide by a young man laboring under mania, with active suicide impulses, in the Cumberland and Westmoreland asylum, a piece of blanket rolled into the form of a cone, was found to have been pushed back into the gullet, and he was dying rapidly from suffocation. Had he succeeded, the true cause of death might quite possibly have been overlooked, even had an examination of the body been made,

An Incident in Virginia.

Our old friend, Mr. Wm. Claughton, of Heathsville, sheriff of Northumberland Co., Va., says: "We have many good medicines in our parts, but nothing which equals St. Jacobs Oil, the Great German Remedy. My family keep the Oil in the house at all times, and use it for almost everything that a medicine can be used for. They claim that it is unequaled for rheumatism and all bodily pains."—Tappahannock (Va.) Tide Water Index.

Ohio, has competitively stuffed a sixty- 123,912 officers and teachers and five foot sausage.

ELDER MOSE KITE.

His Hair-Breadth Escapes from Sees and Unseen Poes.

Trey Kansan Chief, January 18, 1863.

Most of our older citizens well remember Mose Kim (who lived in Potersburg Bottom), the hero of our State's early political history, who was of stalwart build and powerful physique; who in 1888 led a cotony of our people to Pike's Peak; who fought the Indians on the plains and was shot through the body; who on his return here after the rebellion was converted and baptized by Elder Henshall, of the Christian Church at Potersburg Bottom, and became a revival preacher of celebrity all through this section. They will also recall the fact that, attacked with consumption and reduced to a skeleton, he was obliged to remove to the Rockies in the hope of saving his life. None thought has would succeed. Last fall, however, the editor of this paper met him at the ever, the editor of this paper met him at the head of the Republican river, bigger and more robust than ever. "Why, I thought you had died of consumption long, long ago,

"Me? I never had consumption, man! though people thought that was what alled me, and I thought so myself. But the doctors had sent me on a wild goose these after a dozen other diseases, just as fatal, and this was the wildest one of all."

DOGOED FOR YEARS

by a more dangerous unseen enemy that was by a more dangerous unseen enemy that was ever getting me more completely in his clutches. I was shot by an Indian in a fight on the plains, but that wound healed readily and gave me but little trouble. After I returned to Kansas and commenced preaching, I first began to give way. I had a dull feeling, accompanied with a pain in the right side. Dr. Butler, our family physician, said my liver was out of order, caused by the malaria of the bottoms. I had always had an appetite like an ostrich, but my direction became like an ostrich, but my digestion became seriously impaired. While on the circuit preaching, I consulted a doctor, who said I had dyspepsia. After that, distressing pal-pitation of the heart followed, and the physipitation of the heart followed, and the physician said this was caused by my indigestion and diseased liver, which would probably terminate fatally. Sometimes I had a ravenous appetite, at others none at all. I was feverish and then chilly. My food seemed to do me no good. A specialist toid me I had a tape worm! Then I was troubled with unusual quantities of water and a frequent desire to urinate, which was done with difficulty and great pain. The specialist said I had a touch of the gravel, caused by the use of the alkaline water of the plains. I then began to suffer severe pains in the loins and the small of the back, accompanied with sudden attacks of dizziness, during which I had to sit or lie down, to avoid falling. I had to sit or lie down, to avoid falling. was forced to abandon

her a small amount which and I sat in my chair looking it over when some charitable person had sent to the my eye providentially fell upon an ari the office for her relief, and she was then

the women a little," but exacted a promise that no mention should be made in the newspapers of the circumstance; nor has the incident ever been published until now. This case has not been mentioned in such detail because it was at all an anomaly in the life of the veteran journalist, but rather as typical of the man in that aspect of which the world knows so little.—Harper's Magazine.

Novel Methods of Suicide.

To ascertain the cause of death in a recent case of suicide in the Calton jail, Edinburgh, Scotland, Dr. Handyside, lecturer on anatomy in the Edinburgh school of medicine, found a care-

Remarkable Works of Human Labor, Nineveh was 14 miles long, 8 miles wide and 46 miles round, with a wall 100 feet high and thick enough for three chariots abreast. Babylon was 50 miles within the walls, which were 75 feet thick and 100 feet high, with 100 brazen gates. The temple of Diana, at Ephesus, was 420 feet to the support of the roof; it was 100 years in the building. The largest of the pyramids was 481 feet in height and 53 on the sides; the base covers 11 acres, and the stones are about 60 feet in length and the layers are 208; it employed 320,000 men in building. The Labyrinth in Egypt contained 300 chambers and 12 halls. Thebes, in Egypt, presents ruins 27 miles round, and 100 gates. Carthage was 29 miles round, Athens was 35 miles round, and contained 350,000 citizens and 400,000 slaves. The temple of Delphos was so rich in donations that it was plundered of £10,000,000, and Nero carried away from it 200 statues. The walls of Rome were thirteen miles round.

In the Methodist Episcopal church A farmer's wife in New Lisbon, there are now 20,463 Sunday-schools, 2,588,147 scholars.

professor of Chinese in Yale college, formerly United States minister at the court of Pekin, author of the "Middle Kingdom," one of the fullest and most authentic standards on China and its customs, devotes a few paragraphs to the "cat and dog" question. He says travelers have so often spoken about birds'-nest soup, canine hams, and grimalkin friensees, rats, snakes, worms and other culinary novelties that their readers get the idea that these articles form as large a proportion of the food of the natives as the foreigner's description of them does of his narrative! "A few kittens and pupples are sold alive in cages," whose "flesh (if eaten) must be far more cleanly than that of the omniverous hog." The school geoggraphies of the United States often contain pictures of marketmen carrying baskets of cats and pups, with a string of rats and mice hanging by their tails, conveying the idea that these form the usual food of the people. During a residence in Canton of twelve years (previous to 1848) Mr. Adams says he "never saw rats or mice in the market and never heard of but one man who had seen them. In fact they are not so common or so easily caught as many other kinds of animals and, therefore, not as cheap." He once asked a native if he or his countrymen ever used rat-soup. man replied he never had, but, if they should, "we might mix cheese with it (of which the Chinese have a perfect abhorrence), and then the dish would suit us both!" Dogs and cats, rats and mice are no doubt eaten now and then, but, says Mr. Williams, "to put them and other strange things in the fore front of the list of eatables is to give a very distorted idea of the food and every-day living of the Chinese people."

A Nebraska justice of the peace fined his own son \$15 for contempt of court, but the boy not being able to pay it, and the father having only sixty-five cents about him, the fine was remitted and the paternal boot

The electric incandescent pocketbook is the latest; it is always light.— Drummer.

Consumption in its early stages is readily cared by the use of Dr. Pierce's "Golden Medical Discovery," though if the lungs are wasted no medicine will effect a care. No known remedy possesses such soothing and healing influence over all scrofulous, tuberculous and pulmonary affections as the "Discovery." John Willis, of Elyria, Onio, writes: "The 'Golden Medical Discovery does positively care consumption, as after trying every other medicine in vain this successed." Mr. Z. T. Phelps, of Cuthbert, Ga., writes: "The 'Golden Medical Discovery' has cared my wife of bronchitis and incipient has cared my wife of bronchitis and incipient consumption." Sold by druggists.

MR. EDWARD SCHIEFFELIN proposes to de vote a portion of a large fortune, made by mining, to the exploration of Alaska. He will begin his researches by ascending the Inkee river as far as possible in a steam launch.

Dr. Pierce's "Favorite Prescription" is a nost powerful restorative tonic, also com-ining the most valuable pervine properties, specially adapted to the wants of debilitated ladies suffering from weak back, inward fever, congestion, inflammation or ulceration, or rom nervousness or neuralgic pains. By

Texas farmers sold last year \$59,000,000 worth of cotton, \$23,000,000 worth of cattle, \$7,000,000 worth of wool and mutton, and \$1,000,000 worth of horses and hides.

THOUGH SALT RHEUM

Does not directly imperil life, it is a distressful, vexations and resolute complaint. Patient endurance of its numerous very small watery pimples, hot and smarting, requires true fortitude. If the discharged matter sticks, tches, and the scabs leave underneath a reddened surace, the disease has not departed, and Hood's Sarsaparilla, in moderate doors, should be continued.

FAMOUS CASE IN BOSTON.

"My little four-year-old girl had a powerful eruption on her face and head. Under her eyes it was regular coulding red and sore, like a born. Back of her left ear we had to shave her hair close to her head. Five or six physicious and two hospitals gave up her case as incurable, seve that she might outgrow it. When it began to matarate I became abruned. In three weeks, with Hood's Sarsaparilla, the sores began to heat; two bottles made her eyes as clear as ever. To day she is as well as I am." JOHN CAREY, 184 D Street, South Boston.

ATTEST: I know John Carey. He is an houset, good nan, whose statements are worthy of entire credit. I believe what he says about his child's sickness CLINTON H. COOK, Milk Street, Boston,

HOOD'S SARSAPARILLA. Sold by Drogglots. \$1; six for \$5. Prepared only by C. I. HOOD & CO., Aputhecaries, Lewell, Mass.

A Cure of Pheamonia.

Mr. D. H. Barunby, of Owego, New York, says that his daughter was taken with a violent cold which terminated with posumonia, and all the Bost physicians gave the case up and said she could not live but a few hours at most. She was in this condition when a friend recommended Dr. Wm. Hall's Balanm for the Lungs and advised her to try it. She accepted it as a last resort, and was surprised to find that it produced a marked change for the better, and by persevering in its use a permanent cure was effected.
