THIS Legislature, with all the Democratic promises which have been so lavishly scattered about, seems to make no greater progress in legislation than others that have gone before. The one hundred days fixed by law as the limit, are nearly up, and but few bills have been passed, far fewer than bad gone through at a corresponding date at the last session. The programme on the part of the Democratic leaders is to hurry through the appropriation bills and pass the Democratic apportionment in the House and send amending it and giving it a semblance of fairness, the purpose is to adjourn, leave the matter at issue and have an extra session of the General Assembly called by the reform Governor for the purpose of making an apportionment of the State. As under the Constitution the Legislature can sit sixty days in extra session, and as the full time allowed will doubtless be spent in fruitless attempts to get up a satisfactory apportionment, the reform members of the present House will be able at the end of their labors to pocket CIRCULARS are being sent to soldiers \$1,600 of salary, which is more than Western agents, who set forth that for General Assembly since the provisions ten dollars 160 acres of good land can of the new Constitution requiring biennial sessions went into effect .-Harrisburgh Telegraph.

These simple facts are well known, and the highest medical authorities agree that nothing but iron will restore the blood to its natural condition; and also that all the iron preparations hitherto made blacken the teeth, cause headache, and are otherwise injurious.

BROWN'S IRON BITTERS will thoroughly and quickly assimilate with the blood, purifying and strengthen-ing it, and thus drive disease from any part of the system, and it will not blacken the teeth, cause headache or constipation, and is positively not injurious.

Gents:—Upon the recommendation of a friend I tried Buowe's Ison Bittes as a tonic and restorative for my daughter, whom I was thoroughly convinced was wasting away with Consumption. Having lost three daughters by the terrible disease, under the care of eminent physicians, I was loth to believe that anything could arrest the progress of the disease, but, to my great surprise, before my daughter had taken one boule of Bhowe's Ison Bittess, she began to mend and now is quite restored to former health. A fifth daughter began to show signs of Consumption, and when the physician was consulted he quickly said "Tonics were required;" and when informed that the elder sister was taking Bhowe's Ison Bittess, responded "that is a good tonic, take it."
