A Trade Which Interests All-Profit in Prescriptions--Brugs that Have the Jacquest Sale--The Use of Opium.

every member of the human family is more or less interested in the drug trade. The child in the cradle and the venerable man or woman tottering on the verge of the grave, are dependent upon drugs for their physical happiness or misery. The trade is one of the most important carried on in the civilized or unevilized globe. It employs many hundreds of millions of dollars is capital, and affords thousands upon thousands of storekeepers and clerks an honest means of making a something of the inside mysteries of a trade of so much importance to all mankind, a reporter of the Chronicle visited a popular drug store in this city, and had a long talk with an accomplished apothecary. The man of drugs was engaged in filling a physician's prescription, and when he had completed the compound and was at leisure he said :

"Now there is a compound that is composed of exactly four ingredients. One of the ingredients costs at wholesale exactly two cents; the That night we carefully trudged second, one cent; the third, two cents, the whole eight cents."

The Fisherman's Floral Calendar.

That the fisherman has a vein of poetry in his composition is e-inced by the following incident, related in a report of the United States fish commis-sion. A Narragansett fishermen being asked if the squetague came earlier to Point Jugith last year, replied: " About the same time. They expected them in February and got the seines ready. They had them in the water in March. I always judge by the dandehons. When I see the first dandelion, the scup come in. I watch the buds, and when the buds are swelled full, then our traps go in. When the dan-delien goes out of bloom and runs to guesses right he is relieved by the man seed, then the scrip are gone. That is true one year with another, though they vary every season. I am guided by the blossoms of other plants for other fish. When high blackberries are in bloom we catch striped bass that weigh from twelve to twenty pounds; when the blue violets are in blossomthey come early—you can catch the the joke so hugely. A Little War Story.

Aleck Sweet, the Teles Siftings man, tells a good story of the early days of the war. His regiment was leaving Texas, anxious to reach the seat of war before the conflict ended. Let him tell the story for himself :

"Just before dark one afternoon, we passed a comfortable-looking farmhouse, the owner of which was busily engaged, with a very anxious expression of countenance and a long pole, driving a number of pigs under the The impression that forced itself upon us on observing this conduct was that he thought the pigs would be safer there than they would be in the immediate vicinity of our camp. his insinuations."

"I agreed to assist Bob in wiping out the insult, on condition that I should have one-half of the pork. back to the house where we had seen the farmer trying to steal the pigs away from us. The Insect Population.

In 1849 Alexander von Humboldt estimated the number of species of inseets preserved in collection at between one hundred and fifty to one hundred and seventy thousand; Europe alone being represented by more than three times as many species of insects as of phanerogamous plants. Ten years ago Dr. Gerstacker estimated the number of species of insects to be two hundred and twenty-five thousand, five times as many as the known species of all other classes of animals together. If we assume that there exists in the whole world only three times as many insects as there are phanerogamous plants-the latest estimation of which approaches two hundred and twentyfive thousand-we arrive at the startling sum of about seven hundred and fifty thousand. Bewildering as this estimate appears, it is probably too low. The oak alone gives shelter and support to four hundred and fifty species of insects, and the pine to more than two hundred, and one moth alone has thirty-five different species of paragreat deal of calomel, now very little sites. Without going any further in our calculations we may quite safely our calculations we may quite safely assert that, if the number of species of all other classes of animals should be doubled by new discoveries-which is rather improbable for some classes, and quite impossible for the vertebrates-the number of the species of insects would be more than five times as many as that of all other animals taken together.

Get money honestly if you can, but get money," was a foolish father's advice to his son. Get money, if you can honestly, makes but a slight alteration in the order of the words, but varies the sentiment considerably. There is no harm in making money. It answereth all things. Used rightly it is a power for good, and there is money enough in the world to form a lever by which the mass of humanity could be lifted, to a certain extent, out of its depths of sorrow and despair. Money we must have for money makes the mare go. Some can make money who have no faculty for saving. Would you save you must know how to deny those who would borrow and never repay, as well as those who beg simply because they are too lazy to work. There are men who never want to see you except to ask the favor of a loan. They will ask for just one word with you, and that one word is sure to be money. An impecunious fellow met a rich acquaintance, and not liking to ask directly for a loan, and, "Friend Smith, if you had ten THE STORY OF A DREAM. ance, and not ilking to ask diestly for a loan, said, "Friend Smith, if you had ten dollars in your pocket, and I was to ask you for the loan of five, how many would remain in your pocket?" "Ten dollars, to be sure," replied the rich man, without a moment's hesitation. He had gumption, and knew too much to part with his money by any such

rule of subtraction.

Oh, I see, said the impecunious man thus rebuffed. He was able to owe. He was one of the Micawber sort—always waiting for something to turn up. How like some people who are sick. They think to get well by letting disease take care of itself. But diseases do not heal themselves, and too late their victims full often find this out to their sortows as death as a constant. sorrow as death seizes upon them. Had they been wise in time they might have added many years to their lease of life. The cure was nigh them, as it is nigh to all who re this medley. These paragraphs tell this medley. These paragraphs tell the story, as a patient perusal will prove. Those who have keen insight and can read between who have keen insight and can read between the lines may solve the conundrum the sooner for it, but upon all, light will dawn ere they read the final word of our story.

Light will dawn, we said, and so it will, light of hope and help. Light is what a certain individual wanted. Mr. Jones we certain individual wanted. Mr. Jones we will call him. He was very sick. Consumption had fastened its fangs upon him. He had long neglected catarrh, and laughed at the idea of taking anything for it when advised to do so, and so went from bad to worse. His lungs became diseased, a hacking, churchyard cough racked him almost to pieces, and he was fast wasting away. A mere shadow of his former self, he scarcely slept at all at night, or slept only to dream horrible dreams. Talk of nightmare! A whole circus troupe, horses and all, seemed to make his bed the arena of their wild perto make his bed the arena of their wild per-formances. In this case money did not make the mare go, for he spent a deal of money on doctors and physics and was nothing bettered. He ate little, and was fast going down to an untimely grave, leav-ing his wife a widow and his four bright children orphans, when, lo! on one eventful night he dreamed for once a bright and happy dream, which our next paragraph will

Death, the black-visaged monster, until then stared him in the face, but the until then stared him in the face, but the dream brought him hope. He saw a bright, white-robed angel in his dream, who said, "I come to bring you good news. Here is your care—sure, safe, harmless, prompt and reliable. Get well and seek to take health thereby to others. Behold the cure!" With these words the angel was gone, but ere the trail of light which followed him had annished the dreamer saw clittering in the the trail of light which followed him had vanished the dreamer saw glittering in the light three golden letters—G. M. D. "What can it mean?" he said to himself, as he awoke from his slumber. "I have had a Good Many Dreams before, but never such as this." Startled and surprised he aroused his wife and to her related his vision. Alm, the could not solve the newborn Remember. she could not solve the problem. Remem-bering all the medical advice, and the physic and the expense involved since her husband became sick, she expressed the hope that the letters were not intended to suggest that a Good Many Doctors must yet be consulted in addition to all that had been interviewed. He groaned in reply and remarked that if he had to consult any more there would have to be a Gold Mine Discovered in order to pay

Every day for a week he and his faithful spouse searched diligently for a key to the problem. In the dictionary, in such newspapers as they happened to have, in books, on placards on the walls—everywhere they sought—hoping to find a clew. Letters stand for words, and they hoped to light upon the words that should suggest the cure. They Grieved Many Days over their lack of good luck, as they said, and the Good Man Dreamed again and again, but saw no more angels. Hope deferred maketh the heart sick. "Oh, that the angel had Guided Me Definitely and Given More Directions," he

Definitely and Given More Directions," he exclaimed, again and again.

Nearly two weeks had elapsed since the night of the Great Mysterious Dream, when there came to the house a pamphlet. Tired with his exhausting office work, which he still pursued, determining if possible to die in the harness, Jones was about to throw the pamphlet in the fire when something prompted him to examine it. Surely, thought he, here can be nothing that will Pierce this Gloom Most Distressing, or Give Me. Disheartened, any relief. Poor man, he had worked letters over in his mind, and made so many combinations with them, that made so many combinations with them, that they occurred in almost every sentence he uttered. They entered even into his pray-ers. Heaven Grant Me Deliverance, he would say, nor let disease Grind Me Down, and so forth, ad infinitum, and a mile or two

Mentally tortured and suffering in every fiber of his body, what won ter that he read page after page of the pamphlet. It was a work on diseases, and in the morbid state of his mind its contents seemed to suit him. It spoke of almost every disease that flesh is heir to, but oh, joy! as he read, a Glimpse Most Delightful of light stole in upon him. "Eareka! Eureka!" he cried. "Wife, I have it, I have it."

Everybody in the house heard him cry Eureka, and rushed to the room to hear what he had found. All expected to see some Great Miracle Done, and then came the ex-planation. Simple, of course, but why had he not thought of it before? Oh, what a rev-elation! Here was hope for him and for all consumptives. Here, howe for suffering

he not thought of it before? Oh, what a revelation! Here was hope for him and for all consumptives. Here, hope for suffering friends and neighbors. That night hescarce could sleep, but when he did, he again saw a bright vision of golden letters, in fact, a Glittering Monagram Deciphered readily, and reading G. M. D.; and again P. P. P., and yet again F. P., and one huge P, around which these others were entwined, and then W. D. M. A. All the letters blended, yet each was distinct. All he had seen in the book, all he again saw in his vision.

Now he could get well, and once well, he would be a missionary, a Glad Missionary Devoted to the work of telling others how they might get deliverance. He went through the list of diseases among those of his own acquaintance, from John Robinson, whose torpid liver gave him constant headache and severe bilious attacks, or 'r aigh the list of those suffering from alcors, coughs, weak and diseased lungs, to his friend, General B.——, who was as near the grave as he. And for all these, as well as for himself, the Grave May Disappear from present vision, and each may be Given More Decades of life than they had hoped to have years. Against the milder cases he marked P. P. Against the serious cases he marked G. M. Looking back upon his past experience, Mr. Jones feels Grateful Most Decidedly, and continues telling the old story of his sickness, his vision, and his restoration to health; for all the sick are not well yet. But he has had the pleasure of seeing, as he says, Good Miraculously Done to hundreds upon Good Miraculously Done to hundreds upon his personal recommendation.

Perils of California Agriculture.

Briggs' great orehard illustrates the dangers of planting on riparian bottoms in California, Briggs was offered \$60,000 for his orchard in February. It was on an affluent of the American river, that falls into the Sacramentomiles below. He declined selling. A few days later the whole orchard was buried beneath ten thousand tons of coarse gravel and boulders brought down in a rushing flood from the auriferous gravel mines above. In the twinkle of an eye every tree disappeared. Only here and there could be seen a treetop to indicate the locality of the orchard which a few months before was famous for its wealth of varied fruitage. It is now forever debarred from resurrection by a dense forest of willows thirty feet high covering the whole surface. But the indomitable Briggs planted more extensively elsewhere, and he still leads in production and in successful realization. In such a roaring flood on American river, Sacramento, Smith's extensive and most ornate public gardens, valued at \$100,000 an acre, were swept away bodily, and the brother owners were ruined. Every year such floods destroy thousands of acres of he richest bottoms along our rivers.

Sitter of Besten Herald:

DEAR Sim.—During my form of service in the Internal Revenue Department of the United States, at the time my office was in this city, I was afflicted with a severe attack of kidney disease, and at times cuffered intensely. I received the medical advice of some of our feet physicians for a long time, without being benefited by their prescriptions. Being discentaged by the failure of the doctors to being me, and being urged to use Hunt's Remedy by a friend who had tested its merits, although reluctant to try a patent medicine, I was finally induced to try the Remedy, and procured two bottles of it, and commenced taking it faithfully according to the directions. Before I had taken it three days the excruelating pains in my back had disappeared, and before I had used two bottles I was entirely cured. Whenever, from oversertion or a violent cold, the pains in my kidneys return, a few does of Hunt's Remedy quickly effects a cure.

Before closing I beg to mention the remarkable cure of a friend of mins in New York City, to whom I meanmented this valuable medicine. He was suffering mended this valuable medicine. He was suffering severely from an attack which was pronounced by his physician a decided case of Bright's Discose of the Kidphysician a decided case of Bright's Disease of the Kidneys. I obtained two bottles of Hunt's Remedy for him, and he commenced taking it, and began to improve at once, and was speedily restored to health, and he attributes the saving of his life, under the blessing of a merelful Providence, to Hunt's Remedy.
